An equal traffic on the Northern Pacific Road will pay a dividend of more than 91/2 per cent. on its total cost. With its great and unquestioned advantages in distance, grades, climate and tributary fertile country, the Northern Pacific is assured of a vast and profitable business from the outset, with a large increase for the future.

The Value of Land Grants. The average price t which the twenty-six leading Land-grant Railroads have thus far sold their lands, is \$7.04 er acre—the highest average of any grant being \$13 98, and the lowest \$3.07. With few excepions, the average selling price has steadily in creased from year to year. The lands of the Northern Pacific Road are admitted, by all who have seen them, to be better and more salable than those of most other grants, but, sold at the general average of \$7.04 per acre, they will yield more than \$161,000 per mile of road—more than three times the possible cost of construction and equipment; or, at the lowest average of any grant (\$3.07), they will produce more than \$70,

0 per mile. These facts regarding Pacific Railroad earning, and the market value of Railroad Lands, as shown by actual sales to settlers, show the three-fold security of Northern Pacific Railroad Bonds. Construction. The road is now completed across Minnesota, (255 miles); work is progressing westward through Dakota, and 65 miles are under construction on the Pacific coast. Including purchased lines, the Northern Pacific Company now has under its management 57 niles of finished track. Contracts are let for the construction of 635 miles more, to be finished

before the close of 1872. The 7:30 Gold Bonds. The first mortgage bonds of this company, which, after full investi gation, we strongly recommend as a reliable and unusually profitable investment, and which now stand among the solid and favorite securities of the country, have the following leading features; THE Co-Partnership heretofore existing between the subscribers, under the style of TITUS & McDONALD, is this day dissolved by the principal and Interest are payable in gold—the principal in 30 years, and the interest semiin United States currency at pres nt rate of gold (109) these bonds yield 8 per cent gold
