

COUNTRY NOTES AND PRICES

KING'S COUNTY, NOVA SCOTIA.

The farmers in this section are now busily engaged in applying the first spray to their orchards. The most sheep-sick are now convinced of the good results of an insecticide and Bordeaux. The pastures are well turned into pastures and the meadow lands give promise of a good crop of hay. Imported hay, pressed, is \$14.50 a ton, home grown which is very scarce. \$12. There is little call for cows owing to the scarcity of hay and the exorbitant price of short feed.

The seedtime has come, and with it the general spring rush. There have been many showers and drying winds, and much cold, but on the whole farmers hope for a prosperous year and many letters indicate that it will be so.—*Bacon Watts.*

HASTINGS COUNTY

Trenton.—Fall wheat and clover is looking very fine and the last few days heat them up a little. There is more growth at the present time than we had on the 24th of May last year. The spring looking very fine. The clover, however, as it has been very dry to us this spring. What is looking well is also good and there are prospects for a good hay crop.—*J. P.*

FOR SALE AND WANT ADVERTISING

TWO CENTS A WORD

READ BY 15,000 PEOPLE WEEKLY

THIS DEPARTMENT is one of the most valuable in the Paper. At a cost of only two cents a word, you will receive anything you wish to buy or sell, or situations wanted or offered. **THE ADDRESS must be omitted as part of the advertisement, and each initial or number counts as one word. Minimum cost 25 cents each insertion. When replies are to be sent to box at our Office, notice extra is charged for post pay on replies to be sent to advertiser. Cost must accompany each order.** **COPY must be received Friday to guarantee insertion in issue of the following week.** **NO BLACK-FACED TYPE or display of any kind will be allowed under this head, thus making a small advertisement as noticeable as a large one.**

MISCELLANEOUS ADVERTISEMENTS

WANTED—Persons to grow mushrooms for sale at home; waste space in cellar, garden or farm, can be made to yield fifteen to twenty-five dollars per week. Send stamp for illustrated booklet and full particulars. Montreal Supply Co., Montreal. e-10

\$13 to \$14; alaska, 88 to \$10; oats, 50c; peas, 81; rye, 75c; fall wheat, 90c; spring, 90c; buckwheat, 65c; barley, 60c; butter, 25c to 30c a lb.; eggs, 15c a doz; chickens, 60c to 90c a pr.; hogs, 8c to 9c a lb., h.w.; Hay, 15c to \$20 a ton.—*J. K.*

WELLINGTON COUNTY

Mount Forest.—Seedling is going to be very late again in this district. On high dry land, sandy or gravelly, seedling is well on, probably from seedling to one half done. On stronger land, land, especially if flat or naturally wet, nothing whatever has been done yet, and it will be impossible to get on it for a week or ten days, as the heavy rains of the week have left it water than it was when the snow went.

Fall wheat has wintered splendidly, and promises well. Clovers are exceptionally strong and very thick on the ground. The prospects for hay and pasture are first class. Feed appears to be plentiful throughout. Most farmers have wintered cheaper than in the fall. Grass has started well, but we need more heat to make pasture.—*A. H.*

BRANT CO.

Brantford.—Farmers have finished sowing their small grains. Owing to the heavy rain lately, the land is too wet to work. The rain is very acceptable, however, as it has been very dry to us this spring. What is looking well is also good and there are prospects for a good hay crop.—*J. P.*

NEW-JORK COUNTY

Courtdaan.—Pastures are rather short as yet. Crops are about half sown. The weather has been too cool for vigorous plant growth. Many farmers have been compelled to turn their cows out for want of feed. One farmer who has not sent without silage for 2 years, finds it also empty this spring. Some cows are thin but the majority are in good condition. Potatoes, 50c a bu.; 75c a bag; milk cows, \$40 to \$70; spring calves, \$35 to \$60; calves, 50c; hogs, 8c to 9c a wt.; timothy hay, \$13 to \$14 a ton; clover, \$12, milk v. hay, \$25; the butter in 30 days, 15c a bu.; barley, 55c; corn, 65c to 70c a bush, 80c to 85c; fresh eggs, 15c a doz, creamery eggs, 12c a doz; pigs, 27c; colored cheese, 11 1/2c—*A. B.*

COSHIP

Situated about one and a half miles north of the Railway station at Orms- town, Que., is the farm and home of Neil Sangster, one of the foremost breeders of Holstein cattle in Quebec. The herd now comprises over 35 high quality animals. The herd is headed by the splendid stock bull, Inferno, 3229, by Count of Maple Hill, 2343, dam Queen De Kol 2nd, 1659, with milk record of 92 lbs. of milk a day, and over 15,000 in 12 months. This sire was purchased from O. W. Clemson, St. George, Ont. Judging by the appearance of the offspring, he is proving his worth. Barely has it been our privilege to see as fine a lot of youngsters.

Mr. Sangster started breeding registered Holsteins some six years ago, by selecting the best in each get, and although he has made numerous sales from time to time, he has never sold a herd of splendid quality and constitutional vigor. For several years in succession he has captured the dairy test prize at the Eastern Ontario Fair Stock Show. He has the first Holstein cow to qualify in the Canadian Record of Performance as Queen, in Rhosie Queen, 4332, 4 years of age. She gave in 270 days, 12597 lbs. of milk, and 422 lbs. of butter, and produced a calf in 11 months from commencing the test. The second cow to qualify was Madam Dot, 2190, 5 years of age, with 11518 lbs. of milk, and 430 lbs. of fat in 303 days. She dropped her calf within 11 months and 15 days from commencing the test. Her second calf, by H. Bollett, Cassel, Ont. A two-year old of his own breeding, Verona, 6419, qualified with 976 lbs. of milk and 320 lbs. fat in 19 months. He has 7 cows and heifers now running in the test.

Mr. Sangster is a strong advocate of the Record of Performance test believing it a better way to determine the true value of a cow over the short period test.

The product of the herd is put into cream and shipped to Montreal city for milk and cream. We found Mr. Sangster's stock in fine condition, notwithstanding the scarcity of feed in that section, but we found the secret of it was a fine corn crop last fall and an overflowing silo. Many silos have been made from this herd from time to time, and we're pleased to say that from his first advertisement, many Canadian and Ontario Dairyman Mr. Sangster made a splendid sale. Such a herd in the hands of such a capable farmer and stockman will be of incalculable value to the dairymen of Quebec.

GORDON H. MANHARD

Gordon H. Manhard, of Manhard, although a young man, has won the Canadian Holstein herd second in quality to none on the continent. This herd is headed by Brightest Canada, imported from the Canary Mercedes Brightest made 25 598 lbs. butter in 7 days, 109 1/2 lbs. butter in 30 days. This sire's dam Sadie Vale Concoria, made 30 664 butter in 7 days, and 12 1/2 lbs. in 30 days, while his dam Canary made 25 363 lbs. butter in 7 days, and 102 1/2 lbs. in 30 days.

Several of the females in this herd have official records worth having. Besides they have and stockman will be of conformations so necessary in a milking animal. Rachel Sechilardo Clothilde 7423, this milk cow, made 37 373 lbs. of milk in 7 days, 1136 lbs. in 14 days, making 24 1/4 lbs. butter in 7 days. Seven Spot DeKol, a young cow, produced 73 lbs. milk, 19 504 lbs. butter in 7 days, her dam's record being 598 1/2 lbs. milk and 22 1/2 lbs. butter in 7 days. Dirko Pel at 4 years old gave 597 lbs. milk, 23 1/2 lbs. butter in 7 days. Mr. Manhard expects her to reach the 100 lbs. a day mark. Two other cows were being officially tested at the time of our visit. They are DeKol Montel, who already has a record of 100 lbs. a day, and her sister, Nanette Topsy Clahide, both of which are making fine records. As the herd is young, officially in June, as he fully realizes the importance of this test in determining the true value of a herd, this farm is but a short distance from Clarks crossing on the Brookville and Westport R.R., and but a few miles from Brookville, O.T.B.

Mr. W. F. Stephen, Huntington, Que., writes: "My herd has come through the winter in fine condition, thanks to a good full silo last fall. The demand has been good for young bulls and I have already sold all the young stock for sale to my stock bull, Crown Prince of Lanesboro (1950) imported in dam by Robert Hunter and Sons. He will be five years old in June and has headed my herd for four years. He has left me some splendid cows, the well known appearance of being performer at the past when they came to maturity. He has grown to be a massive fellow, low set and well-developed. Is quiet and tractable. I expect to breed him to most of my early calves before I dispose of him. Owing to having a large number of calves to raise, I disposed of all my grade Ayrshires by auction last week, when they brought good prices. In the future I will confine my breeding operations to registered Ayrshires, for which there is a growing demand for the right type all over the continent."

Messrs. Smith & Richardson, Columbus, Ont., the well known importers, reports that they have just closed the sale of Baron Orr, imp. the fine 2 year old Clydesdale stallion, a winner at the recent Horse and Cattle Show, bred by Neil Bell, Stayner, Ont., at a very satisfactory price. This is the 10th stallion qualified with 976 lbs. of milk and 320 lbs. fat in 19 months. He has 7 cows and heifers now running in the test.

WELL DRILLING MACHINES

Over 1000 done and doing, for drilling either deep or shallow wells in any kind of soil or rock. Mounted on wheels or skids. With mechanical or hand operated pumps. Single and double. Any mechanic can operate them easily. **WILLIAMS BROS., Ithaca, N. Y.**
