LARGE CLUBS POURING IN BY EVERY MAIL.

EVERY ONE DELIGHTED WITH OUR BEAUTIFUL AND COSTLY PREMIUMS.

WE are glad to announce that our efforts to give the people of Western Ontario a Live, Reliable and Readable Newspaper have met with great success; and not only in the Eastern Sections, but large Clubs are steadily arriving from many parts of Central Ontario. Our Circulation now is much larger than any other paper in Ontario—outside of Toronto. We heartily thank our friends (both ladies and gentlemen) whose help we have attained to this position in the rank of Journalism. We can confidently count upon their assistance during the coming year. We want to reach 10,000 copies! Friends, let us hear from you. The first instalment of these beautiful Pictures (in Rustic or Oval Frames) of Messrs. Blake, Brown and McKenzie, have just arrived. We expect to send away at least 1,000 more of these fine Parlor Ornaments. Remember, either of the above sent to any one sending us a Club of Three Names; or all three for eight names at One Dollar each.

The Sewing Machines are being sent to many sections, and all express themselves thoroughly satisfied with them. No better Sewing Machines are made than the ones we offer as prizes. Silverware is being sent by every mail to young ladies far and near. Dozens of silver Spoons and beautifully Engraved Butter Knives are going to all sections.

PRIDE OF THE DAIRY!

THOMAS FORFAR, - Patentee.
WATERDOWN, ONT.

THE COMMON DASH CHURN, when made to work easily, is undoubtedly the favorite among Butter Makers, and this attachment is certainly an advance in that direction. It can be worked either with the lever or cross head on the shaft. The upward motion is the harvest of the work in the usual mode of churning with the common churn, but with this attachment the dash is raised by the spring, making the labor lighter. The dash is concave, and a cup on the staff for the purpose of forcing the air down through the cream, producing the butter much sooner. Also, the double cover, to prevent the cream from flying out on the floor, and on the clothes of the churner. By shifting the connecting rod, the power of the spring can be changed to suit the quantity of cream. It is the most simple, durable, and complete Churn of any now in use.

Agents wanted to sell Township and County Rights in the Dominion on reasonable terms.
