CONSTIPATION

CURED BY THE USE OF
MILBURN'S
LAXA-LIVER PILLS

Constipation is one of the most frequent, and at the same time, one of the most serious of the minor ailments to which mankind is subject, and should never be allowed to continue.

A free motion of the bowels daily should be the rule with every one who aspires to perfect health.

Mrs. Fred Hall, 300 Hibernia Road, Montreal, Que., writes: "Having been troubled for years with constipation and trying everything I know of, a friend advised me to use Milburn's Laxa-Liver Pills. I used four and a half vials and I am completely cured. I can gladly recommend them to all who suffer from constipation."

Milburn's Laxa-Liver Pills are 25 cents per vial, or 8 vials for \$1.50, at all druggists, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

QUESTIONS AND ANSWERS. Miscellaneous.

TO KILL GRASS.

We have a field which we are intending to follow this summer. It is rather thick with what we call chain grass. What is the best way to fight it?

T. F. D.

Ans.—This grass is not known to us by this name, but it is possibly the grass commonly known as twitch, couch, or quack grass. The summer-fallow, if thoroughly worked, will likely eradicate it. Shallow plowing, with continued working with the broad-toothed cultivator, followed, if deemed best, by gathering and burning of the roots, will put an end to the pest, if it is quack grass.

BUCKWHEAT ON FALLOW.

I have a piece of land I am summer-fallowing this year, and I would like to hear your advice on it. It was very dirty with blue grass and Canadian thistles. I am thinking of taking either a crop of buckwheat or millet off it. Which do you think would be the better? I have heard that buckwheat is hard on the land. If millet, what should I sow per acre, and when is the best time to sow it, and would it do to feed horses?

ONTARIO.

Ans.—Sow buckwheat. It is not specially hard on land, but rather leaves it in nice condition.

HATCHING EGGS—MOLES ON SKIN.

1. Is there any way of removing moles in the skin?
2. Does it make any difference whether duck eggs and hen eggs are set together under one hen? We have tried it, and found that the birds didn't come out very well, some of them dying before they were quite out of the shell.

Ans.—1. A surgical operation by an expert is advised.

2. No; it should not make any difference in the hatching power of the eggs to mix them. Of course, the duck eggs should be set seven days previous to the hen eggs. The young ducks should be removed from the nests as soon as hatched, or the hen will likely trample some of them to death.

BOOKS.

Where could I get a good farm, stock, and apple book?

A. R.

Ans.—There is no general book on agriculture that covers all these branches fully. The Canadian Apple-growers' Guide, by Woolverton, price, through this office, \$2.25, prepaid, is fairly good, so far as that department is concerned. "Fruits of Ontario" is the title of an excellent bulletin that may be obtained free on application to the Department of Agriculture at Toronto. Successful Farming, by Rennie, \$1.55, prepaid, and Manual of Practical Farming, by McLennan, \$1.60, through this office, fairly good treatises on farm practice. Feeds and Feeding, by Henry, \$2.25, prepaid, is an authority in the line of stock-feeding, while Ventilation, 75 cents, and Physics of Agriculture, \$1.90, prepaid, by King, are books that every studious farmer should have.

PERMANENT PASTURE.

I have a 12-acre field, rather heavy clay, and wish to put it in permanent pasture or hay. My intention was to put fall wheat (summer-fallowing now), and timothy in the fall, then clover in the spring. Of course, that would only last a few years. I think alfalfa would do, as it is slightly hilly, and there is a good natural drainage. Kindly give me your opinion. Must I do anything after plowing now, or leave it to be cultivated in the fall when I put in the wheat and timothy?

WULFRUNA.

Ans.—Alfalfa might do very well on this field, but it does not stand close pasturing as well as some other plants and mixtures. For ordinary conditions of mixtures, a good permanent pasture would be alfalfa, 5 lbs.; alsike, 2 lbs.; white clover, 2 lbs.; orchard grass, 4 lbs.; meadow fescue, 4 lbs.; tall oat grass, 3 lbs.; meadow foxtail, 2 lbs.; timothy, 2 lbs. Timothy and clover might be sown, as you suggest, for hay. The summer-fallow should be well cultivated as often as possible with the broad-toothed cultivator throughout the summer.
