

BIG COAST STRIKE TO START TODAY

If Union Promises Good Industrial Vancouver will Be Tied Up

Vancouver, B.C., June 3.—If the promises of labor union leaders are made good, Vancouver will be "tied up" in the industrial sense on Monday morning. Today no other subject than that of the striking of the labor and the employing is being talked of on the streets. Some half-hearted efforts at mediation have been made but the fight seems to be well advanced on both sides and there is a disposition in both camps to have the battle as big as possible while it lasts and have it over with. The question will be settled whether Vancouver will be a town of closed general business. Today interest centres around the attitudes of the B.C. Electric Railway men and workmen employed at the single power and electric plants that supply current for street cars and industries. The two chief labor leaders, Pettigrew and McVey, have agreed to deliver the closing of all power and lighting and to stop the street cars as well, so as to cause all union workers in the city to quit. For two days the street railway men have been voting whether to strike or not. They must have a three-fourths majority. If they strike a serious situation will be created. If they do not the tie-up will not be called for but will be largely to the building trades.

Many Non-Union Men in City. As there are already thousands of non-union men in the city, especially in the building trades, the strike would not have a very appreciable effect on general business. The trouble started with a carpenter's strike. The men asked for four and a half instead of four dollars a day. The bosses offered four and a quarter, complaining at the time that their contracts had been made for the four dollar basis, but there were hundreds of workmen who were not unionists and the day the strike started these non-union men were put on and open shop declared by a dozen big contractors. Hundreds more men came in from Seattle. Suddenly the union men broke to the fact that their labor temple, for which the contract was signed in March, was being executed by non-unionists as an open shop. Fifteen days after the strike was called the contractors announced that every job they had was going ahead well and that they had plenty of men. The bricklayers saved the situation for the bosses by staying at work. Then the carpenters carried their advertisement to the labor council consisting of thirty-two unions.

Town Going Open Shop. "If you are a union man, we must all fight or unionism will die," they said. The labor council agreed that there should be a general strike, hoping in the interval before June 5th that the bosses would come to time and make concessions to take back the carpenters on a higher basis. Mayor Taylor who had been elected by the laborites, proposed mediator, and the city council secured the appointment of a committee, though several aldermen warned him that the attempt was useless and that the men and employers ought to be left to fight it out. The master builders backed by the employees association declined to accept arbitration, holding that the strike was over and that they had plenty of men and were getting along very well. Labor sent an appeal to the federal government, but the minister of labor to mediate, but the employers sent to him the same reply they made to the labor council.

Newspaper printers have wired to International President Lynch to inquire whether they will join the strike. No reply has been received. The attitude of the street railway and power men will not be known until Sunday night. If the street railway men put off the strike will probably not amount to much.

Quotient Remains in West. Ottawa, Ont., June 5.—R. L. Borden, when seen today in reference to a Winnipeg dispatch which stated that he would open the Winnipeg fair on July 12, said that he had not yet received an invitation to do so. He added that it would not in all probability be possible for him to remain in the west until that date.

A BOOK OF INTEREST TO HORSE OWNERS. Every horse owner worthy of the name takes a natural and commendable pride in keeping his horse in prime condition. With sensible feeding, proper care and a reasonable amount of work there is no trouble in doing this. Under such conditions a sound horse looks fine and feels well. It is always ready for service and brings the best results.

But accidents will happen, a slight wrench, a sprain, a cut or some unknown cause may result in lameness, Spavin, ringbones, curbs or splints come sooner or later to every stable. Taken promptly and treated properly, none of these troubles are serious. But if neglected or treated with wrong treatment, they quickly decrease a horse's ability for work as well as his cash value. It is more important, therefore, that every horse owner should have a good knowledge of the calluses, his ailments and diseases, and the remedies to be applied. He should know just how to treat all ordinary ailments, and just when it is necessary to call in the greater skill of the veterinarian.

One of the quickest and best ways to get pointed on this matter is to read the little book, "A Treatise on the Horse and His Diseases," published by the Dr. B. J. Kennell, Co., Enosburg Falls, Vermont. The book is one which gives in simple, accurate and easy to find a valuable point in a book of reference. This book can be had free of charge by simply writing the publisher or by asking for it at any drug store where Kendall's Spavin Cure is sold. That means almost any drug store for Kendall's Spavin Cure is sold by almost every druggist in the country.

A MOTHER'S PRAISE OF BABY'S OWN TABLETS

Mrs. Allen Mason, Carleton, N.B., writes: "I have used Baby's Own Tablets ever since I have had children, and that is going on fifteen years. I have always found them most efficacious for all the ailments of little ones and feel that I cannot praise them too highly. My own children are just that of thousands of mothers who consider Baby's Own Tablets the only safe and sure remedy to keep in the house for their little ones. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont."

TO ASSIST WORK OF LABOR BUREAU

Resolution at Imperial Conference to Facilitate Filling of Vacancies.

Canadian Associated Press. London, June 5.—At today's session of the Imperial Conference, Rt. Hon. Sydney Buxton moved "That the governments of the various dominions should consider in concert with the imperial government the possibility and best method of utilizing the machinery of the various dominions for the exchange of vacancies in the United Kingdom by the Labor Exchange Act of 1919." The resolution was adopted by a vote of 14 to 1. The resolution is a step towards the facilitation of vacancies for employment as between the dominions and the United Kingdom.

Sir Wilfrid Laurier said Canada would not view with any favor any new system of labor exchange, and various objections had been advanced. The government did not look with favor on the direct promotion of the national system for labor exchange established in the United Kingdom by the Labor Exchange Act of 1919.

Favor British Goods. At the conclusion of Friday's proceedings, Hon. Arthur Meighen, premier of Australia, moved a resolution to the effect that it was desirable in the interest of the United Kingdom and the Dominions, that efforts be made for British manufactured goods and shipping being supported as far as possible by the labor council.

STEAMER GROUND IN ST. LAWRENCE. Quebec, June 5.—The Manchester Line steamer, Manchester Spinnaker, in command of Captain Payne, bound from Manchester to Montreal, with a cargo, ran ashore at the Crane Island, near Quebec, during a dense fog. The ship was proceeding up the river under half steam when she struck the rocks known as White Island, one of the most dangerous places below Quebec. After being grounded for about two hours the Spinnaker, with the rising tide, floated without assistance and proceeded on her voyage. According to the reports the steamer was considerably damaged forward and is making water freely, but the pumps were able to keep her fairly clear.

SMUGGLING OPIUM. \$30,000 Worth of Drug Discovered in the Canadian Soo. The Canadian Soo, Ontario, June 5.—The arrest of Felix Wagner, in the Michigan Soo, this morning on a charge of bringing opium from the Canadian Soo it developed that there is \$30,000 worth of opium here awaiting illegal transportation into the United States and many other arrests are pending.

Wagner has been recently discharged from Marquette penitentiary, where he underwent a two-year sentence for smuggling Chinese.

Canada's No Nemere Decree. Stratford, Ont., June 5.—The London conference rose to a man this afternoon when a resolution condemning the No Nemere decree was put. Then the big gathering broke into "God Save the King" and applauded. There was a mistaking the spirit of the conference as being a unit in favor of a strong resolution. The conference was a unit in favor of the strong resolution. The conference was a unit in favor of the strong resolution. The conference was a unit in favor of the strong resolution.

IN THE NEW GARDEN OF CANADIAN WEST

London Mail Publishes Article Dealing With Undeveloped Northern Alberta and British Columbia With Particular Reference to Mountain Section of G. T. P.

The grand Trunk Pacific is opening up in the hinterland of Northern Alberta, and British Columbia, a wonderful country upon which Nature has bestowed wealth with a lavish hand. How great are the possibilities of the country in farming, mining, lumbering, stock raising and fruit growing can only be imagined at present, but that it is a country with a great future before it is undoubted. The title "The New Garden of Canada," which Mr. F. A. Talbot has given to his interesting book on this tract of undeveloped hinterland, shows that he appreciated the fact that there was a country well worthy of attention. It is a country with enormous quantities of agricultural, mineral, timber, industrial—all living dormant.

The journey to the New Garden of Canada can be made from Winnipeg on the Grand Trunk Pacific to the head of Lake McVey, and thence toward you must travel by packhorse through some of the most gorgeous mountain scenery in the world. At Prairie Creek which is practically the entrance to the mountain region, the railway is to run on a ridge on the south side of the Athabasca river. Here there is one of the finest views of the Athabasca river and the mountains. Roche Miette, a prominent rocky pinnacle, rises lined to the southwest, and looms up in state grandeur. This mountain is at an elevation of about 7,000 feet, and seen from Prairie-Creek, about twenty miles away. After leaving Prairie-Creek the line enters Jasper Park, five thousand square miles of Nation park reserved by the Dominion government for the preservation of game and for the perpetuation of fish and game in that section of the country. Mr. R. W. C. Lett, travelling passenger agent for the G. T. P., who accompanied Mr. Talbot in his trip through the country, is of opinion that Jasper Park is the most fully as attractive to tourists as the Yellowstone National Park in Colorado.

"The big game hunting the country bordering on Jasper Park has been excellent," said Mr. Lett. "Of course, shooting in the park is not permitted, but there are large unexplored areas outside the reserve that abound in big game. There is no reason why Alberta should not be as good a big game preserve as New Brunswick out of its moose country. There are large areas in the park where country where sheep are plentiful, and north of Jasper Park there are mountain sheep and goats in large numbers. Game is abundant in all parts of the park and beyond its boundaries."

Mr. Lett states that inquiries are being received from a large number of tourists as to whether or not it would be possible to secure guides in the park. He says that he has a large number of tourists who visit the place, even though the railway is not completed. The railway facilities at Jasper Park this summer will be to assist in the shipping of the tourists who are anxious to behold the wonders of the Athabasca mountains. Head-quarters for tourists visiting Jasper Park this summer will be at the Prairie-Creek Hotel, a new building which has been erected by the G. T. P. and which will furnish accommodation for the tourists who are anxious to behold the wonders of the Athabasca mountains. Head-quarters for tourists visiting Jasper Park this summer will be at the Prairie-Creek Hotel, a new building which has been erected by the G. T. P. and which will furnish accommodation for the tourists who are anxious to behold the wonders of the Athabasca mountains.

CEMENT SHORTAGE TO END SOON. Fifty car loads of cement will arrive in Edmonton in the course of the next few days for delivery to the various contractors. The cement is being shipped from the Calgary Portland Cement Works. The supply of cement is being increased to meet the immediate building needs of the city, though as much more material will be required for the work. Other consignments of cement are expected from Eastern Canada early this month. Archibald Brothers, contractors on the Taylor Block, first street, received the first of the cement from Calgary last week. They got a car-load. The cement shortage, apparently, is a thing of the past and will no longer tie up building operations.

FORCED TO GRANT LICENSE. Supreme Court of British Columbia Issued Order Compelling Commissioners to Make Renewal. Vancouver, B.C., June 5.—A. J. Fradhomme, proprietor of Savoy Hotel, Prince Rupert, obtained an order from the Supreme Court today forcing the license commissioners of the northern town to grant him a renewal of his license. It was argued that the commissioners refused him the license because the unions of Prince Rupert opposed it in view of the first of the cement from Calgary. Justice Clement agreed that this was proven and granted the order forcing the commission to act.

Crop Prospects Good. Prince Albert, June 5.—Crop conditions are extremely favorable in the district and farmers are predicting that with favorable weather all records as to yield will be broken this year. Wheat and oats in the district are farther advanced than for several years back and there has been just the right quantity of moisture. A heavy rain last night followed several warm days, and while it was not badly needed it was welcome.

To the Influence For Land Grant. Ottawa, June 5.—Capt. Jos. H. Patterson of Ottawa, president of the Federal Veterans Association, of the Dominion of Canada, says that the Pension Board veterans are arranging to control one hundred thousand votes at the next general election. He found a parliament independent of the sovereign executive, and the Dominion of Canada, says that the Pension Board veterans are arranging to control one hundred thousand votes at the next general election. He found a parliament independent of the sovereign executive, and the Dominion of Canada, says that the Pension Board veterans are arranging to control one hundred thousand votes at the next general election.

CROP OUTLOOK IS BEST FOR YEARS

W. J. White Says Land Values Will Greatly Increase as Result.

Ottawa, June 6.—W. D. Scott, superintendent of immigration, has received a telegram from W. J. White, Inspector of U.S. Agencies, dated Edmonton, of which the following is an extract: "The crop outlook pronounced the best for many years. I have seen spring wheat measuring fourteen inches and fall wheat which are found everywhere south and north of Regina and along the Canadian Northern one hundred miles east of Saskatoon to Edmonton. Splendid rains at the present time and ideal growing conditions. The large area of coal land tracts and large areas of land everywhere they are doing a good business. Prices of all lands will increase to fifteen per cent as a result of the year's crop."

TOFIELD CLAY DEPOSITS Believed Good for Earthenware.

Several fine Terra Cotta Tofield, Alta., June 6.—While the people of Tofield have been basting their faith in the town's future greatness on the rich agricultural districts and the large area of coal land tributary to it, there is reason to believe that the town has an asset even more valuable than these, but which until recently, was considered of little importance. This asset is the clay deposits which are found in the vicinity of the town, and which are not only suitable for the manufacture of the best quality of earthenware, sewer pipe, terra cotta and other clay products.

Through tests made last year proved conclusively that there is a large deposit of clay in the vicinity here, and the establishment of a brick manufacturing is now assured. The investigation of the clay deposits of another deposit of clay which is found above the coal, and if these tests are as satisfactory as the preliminary tests were, Tofield will soon be the centre of one of the most important manufacturing industries in the Dominion.

Professor H. R. Nes, of Cornell University, Ithaca, N.Y., who recently visited Tofield, and is believed to be the inventor of the clay belts of Canada for the Dominion government, says that the only clay deposit suitable for the production of pottery or terra cotta are found in Alberta. H. Mortimer, president of the Canadian Mining Institute, in a recent interview, predicted that the manufacturing of clay products would be a large industry in the Dominion of Canada, where not only the clay, but the fuel for baking it, exists in large quantities.

Man So Nervous and Sober He Shot Wife and Self. Toronto, June 6.—Mrs. J. E. Phillips, now in the hospital, with a bullet wound from a revolver in the hands of her husband, will take the stand in his defence when he comes up for trial next week. Mrs. Phillips has always been averse to the prosecution of her husband, and her evidence will show that the shooting was accidental and she will have experts to back up her evidence.

WEST SHOULD GET THE BEST OF PLAYS SOON. Albert Chavelier, the Eminent Artist, Discusses the Situation—Good Time to Educate Public—Object to Mixing Up of Shows at Theatres.

Calgary, June 6.—"Within five years I expect that all the best companies that are appearing in the East will be touring the Canadian Northwest," says the optimistic prophecy of Albert Chavelier, famous as an originator of "My Dutch" and a hundred other amusing phantasies and farces which have amused audiences all over the world, as he puffed at an inspiring pipe at the Alberta Theatre, preparatory to appearing at the Lyric for three whole nights this week.

Should Get the Best. "There is a great field here," he emphasized several times. "All it requires is organizing. There is plenty of money here, and there is no serious reason why you shouldn't get the best of plays. It is a little difficult to get a continuous circuit here yet, for there isn't the population to warrant it—well, not yet. But you will get it, and five years is my estimate."

Keep Plays Separate. "Keep your plays separate, and while you can, set a standard. Now is just the time in Calgary when the public can be educated in good theatrical plays—just at the beginning. Mix the plays at the same theatre, and the man who comes doesn't know what he is getting. Money what kind of thing he is getting to see. That fault is too potent for the States, where there has been a habit of dishing up a knockabout turn one evening and "Hamlet" the second. Separate the plays, and the man who comes will know what he is getting."
