LIKE ME!

By RUTH CAMERON.

"I hate a person who is always losing his temper," I heard a woman say the other day, "but I do think one should have enough spirit to keep people from imposing on one."

She smiled, a No-m-a-a m-l-ain't-seen-y-o-u-r-canary smile. The inevitable inference of smile, tone and manner was this, "One should have enough spirit, but not too much—like me."

Yet she isn't a woman who is ordinarily called conceited. On the contrary! She is always wishing she had talents, or clothes, or looks, like yours and if you praise her for anything she is most deprecatory.

The Instinct of Self-Belief.

She is only unconsciously expressing an instinct of the human race, almost as deep rooted as self-preservation—the instinct of self-belief.

"It's all very well to be unselfish, but there's such a thing as being too unselfish," says one. "Now I think it's better for yourself and everyone around you to have a reasonable amount of selfishness."

In other words, just that amount of justifiable selfishness she conceives herself to possess!

"Idealism is beautiful," says another, "and the world couldn't get along without it; but if it's going to do any good it should be leavened with practicality. Rose, for instance, is altogether too idealistic. She hasn't having some common sense."

In other words, her own temper.

A DEFINITION OF CHARM.

A very clever short-story writer has one of his characters ask the other to define charm. Whereupon, says the writer (or words to this effect, I'm quoting from memory), "he proceeded to set forth the qualities which he considered charm and which, when he had finished, she found were his own qualities."

We never realize that we are imposing the ideal balance of qualities to ourselves. In fact we may not ever be conscious that we feel that way. If anyone taxed us with such a high opinion of ourselves we should refuse him indignantly and scornfully. And then we should probably say, "I hate self-satisfied people as much as anyone. Of course, I believe everyone should have a proper self-respect. But that's quite another thing."

Question—My sister and I do not get along well together. Do you think it is our duty to live together? We are the last of the family.—M. F. Answer.—It is unfortunate that you two sisters cannot be at peace in the same home, but if you have given the thing a fair trial better live at peace apart than in discord together. Doubtless you will get more happiness and profit out of occasional meetings when your idiosyncrasies don't get tired to wear on each other than out of the friction of constant uncongenial companionship.

SAFETY RAZOR.—We are Sole Mfrs. of the Giant Junior Safety Razors—50c. with 7 blades. CHESLEY WOOD, 282 Duckworth Street.—mav28.1f

Never leave milk standing in a tin can, but empty it at once into a crockery vessel.

The Real Thing!

Homestead Tea is the real thing, with a clean, clear-cut flavour that adds a zest to appetite.

Call and try some to-day—testing is the best way to judge.

Homestead
Tea, 50 cts. lb.

There's a smile in every cup of Homestead.

Max Resigned to Fate

Brussels Burgomaster, interned in German Fortress, Adapts Himself to Prison Life—Captivity Now His Normal State, He Says.

Paris, June 30.—Burgomaster Max of Brussels, interned in the German fortress at Glatz, is resigned to his fate, according to a letter written by him to the Havre correspondent of the Matin, in which he says:—
"I take no merit for enduring my fate stoically. Besides, I see in my patience only an application of the physical law that every being adapts himself to the conditions of life imposed upon him by circumstances. I have been shut up now 240 days, and captivity has become a normal state for me. The sufferings I experienced during the first weeks following my arrest are lessening more and more."

Be Bright, Well, Strong, Restore Youthful Looks!

Let your fight for better health begin now! Before you feel any warning of physical collapse, cleanse, and strengthen and build up your system. The one remedy for that tired droopy feeling is Dr. Hamilton's Pills, the acknowledged king of all tonic medicines. Thousands of men and women in the late years of life retain their youthful looks and feeling simply because they regulate their system with this old reliable family remedy. Nothing so good for the bowels, stomach or kidneys. Cures headaches, prevents biliousness, stops aching pains in the back and limbs. Get a 25c. box of Dr. Hamilton's Pills to-day.

If you spill ink on a carpet, soak it up immediately with blotting paper, then wash out with warm water and clean flannel and dry with a soft duster.

KEEP MINARD'S LINIMENT IN THE HOUSE.

From Reservist Hiscock

H. M. S. Eclipse,
Devonport,
England,
June 8, 1915.

Mr. John Churchill,
Seward's Mill,
Dear Friend,—In answer to your letter which I received a few days ago, I now take the pleasure of writing you. Very proud I was to hear from you. No doubt I was surprised when I got your letter. But very glad indeed to know I am not forgotten by you, and as you said I can't see how I should be, for the duty I have taken upon me is not only for my own benefit, but for the benefit of the whole Empire, which includes our little Colony as well; and which duty I am more than proud to have taken.

Well, John, I am feeling fine in health and enjoying myself lovely. But I guess I would be enjoying myself a little better if I were handy. I fact I would like for you all to be absent sea and flying in the air. I sometimes think I must be dreaming; but still it's real, and I suppose it will be no good for me to tell people when I come home if I do ever spare me to do so which I hope and trust He will. Some of the things which we have seen in England I don't suppose they will believe. You ask if I saw any of the Scilly Cove or New Perlican chaps. Well there are only three of us over here from Scilly Cove, but I haven't seen one of them. They are not out from this Depot. But I saw some of the Perlican boys. Mr. Pittman came over with me. He is now at Ramsgate, Dover, and George Pitts is here with me now on the Eclipse and William Hefford is on a trawler out from here. I see him often. They all are O.K. Pitts and I are here now on the Eclipse, waiting draft. We are likely to be going to sea at any moment.

Well, John, it's not much brighter now than when we came over here, and it don't look very much like ending yet. But I can tell you we are not downhearted, no. I think it's getting pretty hot with the Germans now. The yare putting their sailors in the field to fight. They don't care about coming out of the Kiel to face our fleet, for they know very well what is waiting for them.

I suppose the men home are beginning their old trade fishing by this time, and I sincerely hope and wish for a successful voyage to all. I was sorry to hear of the death of the persons you spoke of, but I suppose the old saying is true—they are better off.

And as I haven't got any more news at present and wishing to be remembered to all friends and with every fond love to dear . . . I must close my letter by wishing you, as a faithful friend, every success and godspeed through a happy summer. I am yours ever for a worthy cause.

AMBROSE HISCOCK,
Devonport, England.

EVERYDAY ETIQUETTE

"I have seen some envelopes with the address written on them on indented lines and so that each line is started directly under each other. Which is correct?" asked Behtra. "Both are used a great deal at present, the latter being the newer fashion," advised her sister.

Minard's Linalment Cures Diphtheria.

Briton in Dramatic Air Duel.

OBSERVER AND PILOT BURNED.

London, June 28.—A dramatic air duel, in which a British aeroplane, reconnoitering over the Belgian town of Poicappelle at a height of 4,000 feet met and engaged a large German biplane, which had double engines and propellers, is described by the eye-witness at the British army headquarters in a narrative made public to-day by the official press bureau. He writes:

"The German machine first circled around ours at the same time shooting a machine gun, but so far as known not inflicting any damage. Then our observer fired fifty rounds in return at a range of less than 200 yards. It had some effect for the hostile biplane was seen to waver and after more shots its engines stopped, the enemy airplane then dived to a level of 2,000 feet where it again platted its course, flying slowly and erratically.

"Under heavy anti-air craft fire from below, our pilot turned toward our line to complete his reconnaissance. When his machine was hit he decided to make for home, but the petrol tank had been pierced and as the aeroplane glided downwards on a slant the petrol was set alight by the exhaust and ran blazing down the front of the body of the aeroplane which travelled on to the accompaniment of a rattle of musketry as the unused rounds of machine gun ammunition exploded in the heat and the pilot's loaded revolver was discharged.

The pilot, however, did not lose control, and the aeroplane proceeded steadily on a downward course. Before it reached the ground a large part of the frame work had been destroyed. Even the hardwood blades of the propeller were so burned that the propeller ceased to revolve. When the machine finally landed back of our lines both officers had been severely burned, and the pilot climbing out of the blazing wreck tripped over a wire and sprained his ankle. The serviceable portions of the aeroplane were then collected and removed under the shrapnel of the German guns.

Makes Hair Grow

The time to take care of your hair is when you have hair to take care of.

If your hair is getting thin, gradually falling out, it cannot be long before the spot appears.

The greatest remedy to stop the hair from falling is SALVIA, first discovered in England. SALVIA furnishes nourishment to the hair roots and acts so quickly that people are amazed.

It destroys the dandruff germ, the little pest that saps the life that should go to the hair from the roots.

TORONTO 'VARSITY CUTS OFF PENSION TO HUN PROFESSOR.

Toronto, June 28.—Echoes of the agitation against the German professors in the University of Toronto last December, were heard at the meeting of the University's Board of Governors last week, when the resignation of Professor P. W. Mueller was accepted, and the pension of \$800 per year to Professor August Kirschmann, of Leipzig, was cut off.

Meeting of Patriotic

A meeting of the Patriotic Association was held at Rooms last night. The meeting was held in the presence of some fifty members. The reports of the various committees were submitted. The report of the Finance Committee showed that the Association had received \$4,183.65 had been expended \$3,183.65. The balance on hand was \$1,000.00. The report of the Executive Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Publicity Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Social Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Literary Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Music Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Art Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Religion Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Philosophy Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the History Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Geography Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Natural History Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Physical Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Biological Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Chemical Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Medical Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Legal Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Political Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Social Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Educational Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Psychological Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Physiological Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Astronomical Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Geological Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Botanical Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Zoological Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Anthropological Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Archaeological Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Ethnological Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Linguistic Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Philological Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Literary Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Historical Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Biographical Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Genealogical Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Heraldic Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Numismatic Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Palaeontological Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Epigraphical Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Papyrological Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Philological Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Literary Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Historical Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00. The report of the Biographical Science Committee showed that the Association had received \$1,000.00 and had expended \$1,000.00.
