**TECK HUGHES**—  
The amount of high-grade ore in sight is now much greater than was generally supposed and exceeds the expectations of the operators themselves.  
A new rich vein recently opened has been found to run through the property instead of only one section of it, as was expected.  
Shareowners are holding firm, refusing to sell but buying more, firm in the belief of much higher prices, in view of the near approach of dividends.  
Low, 58c.; Present, 91c.; Margin, 30c. This is an attractive Gold Stock.
