

**THE WORLD'S PRESS.**

**THE EMPIRE'S COUNCILS.**  
 London Times: Mr. Mackenzie and Mr. Bruce will be new members of the Council of the Empire. Both young men, both are products of the same school of statesmen which grew up overseas during the last century. They may be representatives of widely different shades of political thought, but it is in the very nature of its political opinions that the Empire finds one of its main sources of strength, and it is under stimulus of mutual discussion that its mingled elements may best be blended in a composite whole.

**TAXED TWICE.**  
 London Daily Chronicle: The taxation is a manifest hardship to the individual, and it is the trade interests of both the home and foreign countries. It would be an injustice to all concerned to avoid the tax by taxing the individual in his own country only, or dividing the tax between the two. But how to make a very complicated adjustment? A committee of experts appointed by the special committee of the League of Nations has been examining the question and its report shows how difficult the problem is.

**THE CITY BEAUTIFUL.**  
 Canada: It is time we thought of forming this commission; time because we have waited long and it is also time because we cannot any longer neglect the beautification of our city. It is our duty to develop it, to become one of the most important cities of the continent and it is our duty to do this development takes place harmoniously, with cohesion, that the more we progress the more beautiful will Montreal become. In dealing with this question we are working to our disadvantage, and must bear in mind.

**INDIA'S FINANCING.**  
 London Times: India's money has developed greatly during the last few years, and the country which once was a debtor to London for a few millions of capital a year now has more than a hundred millions invested in British securities. Whereas, further, before it was thought impossible to raise in India itself more than ten millions sterling a year for the expenditure, and that too by the methods of finance, a few years ago, twenty millions sterling has become a commonplace and is now subscribed from Indian resources.

**SUGAR AND COLOR.**  
 London Mail (Australia): The people are prepared to pay liberally for the support of industry on which the maintenance of the White Australia policy in small measure depends. This is not to say that they are prepared to pay any price, and that sugar, millers and refiners have to make in their impatience for the present agreement, the people are paying dearly for their white. This agreement terminates with the conclusion of the marketing of the present crop, but under it consumers have been and still are paying over wholesale for raw sugar.

**WHO, WHAT AND WHY.**  
 London Enquirer: A rather experience induced us to believe that people are interested in what than who's who.

**NEW MEANINGS CHANGE.**  
 London Free Press: Representatives say this country will see another billion-dollar Congress. A few days ago that would have been interpreted to mean that there would never go that high. Now it means that the figure is to go that low.

**Bill Serial at the Crescent Monday.**  
 London Free Press: Representative says this country will see another billion-dollar Congress. A few days ago that would have been interpreted to mean that there would never go that high. Now it means that the figure is to go that low.

**The Royal Stores, Ltd.**

**Majestic Announcement.**

Beginning Monday there will be screened at the Majestic what certainly can be claimed to be one of the greatest film productions ever seen by St. John's audience, "The Orphans of the Storm."  
 The name of D. W. Griffith is always associated with everything that is excellent and superior in the screen world. St. John's audiences have had the pleasure of seeing several of his masterpieces, such as "Broken Blossoms," "Way Down East," "Birth of a Nation," etc. but it is acknowledged by all competent judges that the work in the Orphans of the Storm excels that in any of the previous efforts. Nearly eighteen months were spent in the study of historical situations, costuming and the marvelous scenes occurring during the period of the French Revolution, to have the picture historically correct in every detail. It has involved an expenditure of nearly three million dollars.  
 The leading parts are taken by actors and actresses selected from an assemblage of the players. The cast is headed by the two sisters, Dorothy and Lillian Gish, and is noted for the first appearance on the screen of Joseph Schildkraut, said to be the handsomest actor in all Europe, while such outstanding characters of the Revolution as King Louis, Danton, and Robespierre are taken by actors of note.  
 Apart from its value as an entertainment, the picture affords a rare opportunity of securing a correct knowledge of the many incidents that occurred during this tremendous period. There will be but one show, commencing at 8:15 Admission 30c. We say to every admirer of a real picture, don't miss this treat.

**BE YOUR OWN VET.**

Save veterinary bills on your stock by using Minard's Best for Cuts, Bruises, Strains, Saddle Sores, distemper, etc.

**Shipping.**  
 Schrs. Nancy Lee, Capt. Wilshire, sailed for Bahia yesterday morning, with a cargo of codfish from G. M. Barr.  
 S.S. Rowena sailed from Salmonier yesterday for Gaston, taking 3,400 cords of pit props.  
 S.S. Canadian Sapper leaves Montreal today for this port via Charlottetown.
