again.

Recessions of a point or more took place in many active industrial shares in the first hour, traders selling freely under the cover of a heavy buying-movement in the lower priced rails, particularly the Erie issues. Offerings were fairly well absorbed and before noon the main price tendency again appeared to be upward, Maxwell Motors A jumped 4½, and moderate strength was also shown by some of the oils. New weak spots cropped out from time to time in the specialty list. Call money opened at 4¾ per cent.

In politics Mr. Purdom was a staunch Liberal. He was a great admirer of the late Sir Wilfrid Laurier and always took a prominent part in Liberal gatherings throughout the district. He was a member of Kliwinning Lodge and of the Scotish Rite.

Tribute From Dean Fox. Dr. Sherwood Fox, dean of the University of Western Ontario, when he heard of the death of Mr. Purdom said: "In the passing of T. H. Purdom, the board of governors of the University of Western Ontario loses one of its hest-known and most University of Western Ontario loses one of its best-known and most-interested members. Although a husy man, he was never so busy that he could not find time to discuss any problem of vital interest to the university. Through his long life in London, he was in a position to become acquainted more thoroughly with the growth of a university in Western Ontario than any other man. As Mr. Purdom was a member of the arts committee of the board of governors, I, more than anyone else in the university, shall have reason to miss him.

Hon. W. S. Fielding States

Canadian Press Despatch.
Ottawa, Nov. 14.—The minister of finance, Right Hon. W. S. Fielding, stated today that for the present, and

ter of mines, and Hon J. E. Perrault, minister of mines for Quebec, early this afternoon upon this subject, and in this connection issued a statement to the press opening with the above announcement.

The deputation was heard in private, but it is understood that a number of members spoke on various phases of the problem. Their claim, generally speaking, was tuat gold is a commodity which can command the New York price and that its producers should be permitted to take advantage of this. The result, it was represented, would be that the Canadian producers of gold could not take advantage of the higher New York rate, and would consequently lose the difference between the Canadian and New York rates.

Everything the Farmer Trades In

Local Market

There was little frading on the local square this morning, and practically all the business transacted took place in the hay and grain sections.

Sever loads of hay reached town and were sold at from \$11.50 to \$12.50 per ton. The demand is not so urgent as it was last week and although there is a sale for every load, the scarcity is lacking, and buyers refuse to rise to last weeks' top of \$11.50 per ton.

Oats seem to be very scarce, and are snapped up quickly on arrival at the market. The price is unchanged at \$1.40 per cut.

There was no business in the fruit and vegetable section of the market, and outside of hay and grain the only produce reaching town is potatoes, with a few scattered loads of apples.

EXCHANGE RATES

New York, Nov. 14.—Demand sterling fell off more than 2c in New York today, touching \$4.35½, which is near the year's low figure of \$4.35 1-18 established last week.

Bankers attributed the recent and continued decline to a combination of circumstances which include the unusually heavy demand for dollar bills to pay for cotton, wheat and other agricultural exports to England, speculative selling because of the injunction of fiscal policies into the forthcomfing British general elections and sizeable transfers of balances from London to New York. Today's quotation represents a decline of more than 12c from the Nov. 1 figure of \$4.473.
