

# SERVICEABLE SPECIALTIES.

PICHI, (*Fabiana Imbricata*), is an emollient, sedative and diuretic in diseases of the Urinary Organs.

It has been found efficient in gonorrhœa, cystitis, dysuria, urinary calculus, and all irritable and inflammatory conditions of the bladder and urinary tract.

The pharmaceutical preparations of Pichi are Fluid Extract and Solid Extract Pichi and Soluble Elastic Capsules Pichi, 5 grs.

CACTUS GRANDIFLORUS is a heart tonic *par excellence*. In these days when so many persons die of heart failure, the selection of a heart tonic is important.

According to J. Fletcher Horne, M. D., in *London Lancet*, it is especially valuable in nervous and functional disorders of the heart, where digitalis and strophanthus are unsatisfactory, such as palpitation, irregularity, fluttering, intermission, slow or rapid action arising from debility, worry, dyspepsia, or the excessive use of tea and tobacco, comprehensively classed as cardiac erethism.

CREOSOTE is of all the methods of treating consumption the most satisfactory.

We supply creosote in Soluble Elastic Capsules (Cod Liver Oil, 10 minims, Creosote, 1 minim,) and Enteric Pills of Creosote coated with a material that resists the action of the gastric juice but dissolves in the duodenum.
