The Collegiate Course of the Faculty of Medicine of McGill University, begins in 1895, on Tuesday September 24th, and will continue until the beginning of June, 1896.

The Primary subjects are taught as far as possible practically, by individual instruction in the laboratories, and the final work by Clinical instruction in the wards of the Hospitals. Based on the Edinburgh model, the instruction is chiefly bed-side, and the student personally investigates and reports the cases under the supervision of the Professors of Clinical Medicine and Clinical Surgery. Each Student is required for his degree to have acted as Clinical Clerk in the Medical and Surgical Wards for a period of six months each, and to have presented reports acceptable to the Professors, on at least ten cases in Medicine and ten in Surgery.

About \$100,000 have been expended during the last two years in extending the University buildings and laboratories, and equipping the different departments for practical work.

The Faculty provides a Reading Room for Students in connection with the Library, which contains over 15,000 volumes.

MATRICULATION.—The entrance examination of the Medical Boards of the different Provinces in Canada, is accepted by the University as equivalent to the Matriculation examination, which is held by it in the months of June and September.

COURSES.—The regular course for the degree of M. D., B. Sc., is four sessions of about nine months each. Arrangements have been made with the Faculty of Arts of McGill University, by which it is possible for a student to proceed to the degree of B. A., and M. D., B. Sc., within six years; the Primary subjects in Medicine, i. e., Anatomy, Physiology, and Chemistry, being accepted as equivalent for Honour Natural Sciences of the Third and Fourth years of the Arts course.

ADVANCED COURSES.—The Laboratories of the University, and the various Clinical and Pathological Laboratories connected with both Hospitals, will after April 1896, be open for graduates desiring special or research work in connection with Pathology, Physiology, Medical Chemistry, etc. A Post-Graduate course for practitioners will be established in the month of April, 1896, and will last for a period of about six weeks.

HOSPITALS.—The Royal Victoria, the Montreal General Hospital and the Montreal Maternity Hospital are utilised for purposes of Clinical instruction. The physicians and surgeons connected with these are the clinical professors of the University.

These two general hospitals have a capacity of 250 beds each, and upwards of 30,000 patients received treatment in the outdoor department of the Montreal General Hospital alone, last year.
