

PROFESSOR HEILPRIN'S NEW BOOK.

ALASKA AND THE KLONDIKE.

A Journey to the New Eldorado. With Hints to the Traveler and Observations on the Physical History and Geology of the Gold Regions, the Condition of and Methods of working the Klondike Placers, and the Laws governing and regulating Mining in the Northwest Territory of Canada. By ANGELO HEILPRIN, Professor of Geology at the Academy of Natural Sciences of Philadelphia, Fellow of the Royal Geographical Society of London, Past-President of the Geographical Society of Philadelphia, etc. Fully illustrated from Photographs and with a new Map of the Gold Regions. 12mo. Cloth, \$1.75.

It may fairly be said that Professor Heilprin's interesting and authoritative book presents for the first time an accurate general account of the region which has so recently become famous. Much has been written about the Klondike, but a large proportion of this material contains so many exaggerations that a proper perspective is impossible. It was for the purpose of discriminating between fact and fancy by means of a personal knowledge of the region and its varied conditions that Professor Heilprin, an experienced traveler and the leader of the Peary Relief Expedition of 1892, made his journey through the region. He now presents the results of his observations in a series of graphic chapters which describe the features of the journey, the character of the country, and the life of the mining camps. To those specially interested in the practical possibilities of the region, the book will make a special appeal. Students will find it the first adequate presentation of the Klondike gold problem made by a geologist, and it will prove invaluable to prospectors and others practically interested, since it furnishes assistance not to be found in any other publication.

This book is for sale by all booksellers; or it will be sent by mail on receipt of price, by the publishers,
