#### A Pretty Shamrock Insertion.

Arden's Crochet Cotton No. 30 is used, and a crochet hook No. 5. Work 10 chain, \*, 1 slipstitch in the 6th from the needle. Turn. 1st row: 8 chain, 1 treble in this loop twice over, 8 chain, 1 double in the 6th of the 10 chain.

2nd row: Turn. 2 double, 10 treble, 2 double in each of the 3 loops. 4 double on the stem, 1 double in the last chain. Thus 1 shamrock is made. Make another, beginning with 26 chain, then repeat from \*. Join with 1 double the middle of the 1st leaf of the 2nd shamrock to the middle of the 3rd leaf of the 1st shamrock. 5 double on the stem of the 2nd shamrock.

Make a line of shamrocks the length

A Pretty Shamrock Insertion.

of the lace required, then, without breaking off the cotton, begin the 2nd line of shamrocks with 10 chain, 1 slipstitch in the 6th from the needle. Complete the 1st shamrock of the 2nd line like the 1st shamrock of the 1st line, with 5 double on the stem; then 18 double on the chain separating 4 shamrocks. This brings us to the point opposite a shamrock. Now begin with 10 chain as in the 1st shamrock of the 2nd line, and repeat, not forgetting to join the shamrocks together.

Straight Edge.—1st row: 1 double in the top of a shamrock, 14 chain, 1 double in the next. Repeat.

2nd row: 15 double under every 14 chain. Work this straight edge on both sides of the shamrocks.

#### Collar for a Girl Six to Eight Years.

The shape of this collar is dainty and graceful, with its three points to the back and two points to the front, and is quite a change from the ordinary sailor collar. It is made of soft white washing-silk, cut all in one piece, trimmed with two rows of coffee-colored guipure insertion in a pointed-leaf design, with a wavy edge, and finished off with a vandyked net lace the same color. A row of French knots is worked on both sides of the insertion. The neck is inserted in Paris binding.

Materials: Half a yard of white silk, one and a half yards of narrow guipure insertion, one and three-quarter yards of lace three inches wide, twenty inches of Paris binding, thick crewel silk for the French knots.

Fold the silk in half with the two selvages facing the worker, the double fold to the left and the two raw edges to the right. Measure up the double fold, which is the middle of the collar, seven and a half inches. Measure from double fold along the selvage close to worker to the right two and three-quarters inches and place a pin. From this pin measure upwards six inches; then make a curved line from this last point to the seven-and-a-half-inch point and continue the line from the six-inch mark straight to the pin, the two-and-three-quarter-inch mark. Cut along this line for the neck. Take out

all pins. Now the pointed edge of the collar is marked, keeping the silk flat on the table as before.

Measure six and three-quarter inches from the back of the neck along the double fold. Place a pin half-way from these two points. Measure six and three-quarter inches to the right and place a pin. From this last pin measure in a straight line towards the worker six inches; then one and three-quarter inches to the right from this point and place a pin. There are now four pins in

A useful and Ornamental Collar.

the collar. A line must be drawn from pin to pin, slightly curved on the two upper sides. In drawing this line the shape of the collar must be the guide. Cut along the line. The collar must now be trimmed. First tack the two rows of insertion in place, then sew round both edges, securing each point of the lace. Make the French knots in four rows according to the design.

Hem the two short edges of the

#### Spring Dresses

Style and durability blossom into beauty and economy in Simpson-Eddystone Shepherd Plaids—the cotton dress goods with perfectly fast colors. These calicoes have been the standard of the United States for over 65 years. Some with a new silk finish.

Ask your dealer for Simpson-Eddystone Prints. If he hasn't them write us his name. We'll help him supply you. Don't accept substitutes and imitations. The Eddystone Mfg. Co., Philadelphia. Established by Wm. Simpson, Sr.

### This Washer Must Pay for Itself

A MAN tried to sell me a horse once. He said it was a fine horse, and had nothing the matter with it. I wanted a fine horse. But, I didn't know anything about horses much. And, I didn't know the man very well, either.

So I told him I wanted to try the horse for a month. He said, "All right, but pay me first, and I'll give back your money if the horse isn't all right."

Well, I didn't like that. I was afraid the horse wasn't "all right," and that I might have to whistle for my money if I once parted with it. So I didn't buy the horse, although I wanted it badly. Now, this set me thinking.

You see, I make Washing Machines—the "1900 Gravity" Washer.

And, as I said to myself, lots of people may think about my Washing Machines as I thought about the horse, and about the man who owned it.

But I'd never know, because they wouldn't write and tell me. You see, I sell all my Washing Machines by mail. (I've sold 200,000 that way already).

So, thought I, it's only fair enough to let people try my Washing Machines for a month, before they pay for them, just as I wanted to try the horse.

Now, I know what our "1900 Gravity" Washer will do. I know it will wash clothes, without wearing them. In less than half the time they can be washed by hand, or by any other machine.

When I say half the time I mean half—not a little quicker, but twice as quickly.

I know it will wash a tub full of very dirty clothes in Six Minutes. I know no other machine ever invented can do that, in less than 12 minutes, without wearing out the clothes.

I'm in the Washing Machine business for Keeps. That's why I know these things so surely. Because I have to know them, and there isn't a Washing Machine made that I haven't seen and studied.

Our "1900 Gravity" Washer does the work so easily that a child can run it almost as well as a strong woman. And it don't wear the clothes, nor fray the edges, nor break buttons, the way all other washing machines do.

It just drives soapy water clear through the threads of the clothes like a Force Pump might.

If people only knew how much hard work the "1900 Gravity" Washer saves every week, for 10 years, and how much longer their clothes would wear, they would fall over each other trying to buy it.

So said I to myself, I'll just do with my "1900 Gravity," Washer what I wanted the man to do with the horse. Only, I won't wait for people to ask me. I'll offer to do it first, and I'll "make good" the offer every time. That's how I sold 200,000 Washers.

I will send any reliable person a "1900 Gravity" Washer on a full month's free trial! I'll pay the freight out of my own pocket. And if you don't want the machine after you've used it a month I'll take it back and pay the freight that way, too. Surely that's fair enough isn't it?

Doesn't it prove that the "1900 Gravity" Washer must be all that I say it is? How could I make anything out of such a deal as that if I hadn't the finest thing that ever happened for Washing Clothes—the quickest, easiest and handsomest Washer on Earth? It will save its whole cost in a few months, in Wear and Tear on clothes alone. And then it will save 50 cents to 75 cents a week over that in Washerwoman's wages. If you keep the machine, after a month's trial, I'll let you pay for it out of what it saves you. If it saves you 60 cents a week, send me 50 cents a week till paid for. I'll take that cheerfully, and I'll wait for my money until the machine itself earns the balance.

Now don't be suspicious, I'm making you a simple, straightforward offer. You don't risk anything, anyhow. I'm willing to do all the risking myself! Drop me a line today and let me send you a book about the "1900 Gravity" Washer that washes clothes in 6 minutes. Or I'll send the machine on to you, if you say so, and take all the risk myself. Address me this way: W.H.V. Bach, Manager "1900" Washer Company, 357 Yonge Street, Toronto, Ont. Don't delay. Write me a postcard now, while you think of it.
