

1923

Dear Grassetto,

I am sorry to hear that it is your intention to leave us for Upper Canada, the field here is certainly well occupied; at the same time, with the many opportunities you have had of acquiring professional knowledge, with your talents and studious disposition, together with your gentlemanlike habits and manners, you could not fail shortly to establish yourself in an equal footing with the rest of your medical brethren.

Should you finally decide upon Amherstburg, or indeed, to whatever town you may bend your steps, I feel confident of your success, and in leaving Quebec please me you carry with you the respect and good wishes of all, but more particularly of your professional friends.

Believe me yours faithfully
