ASPECTS OF THE COAL STRIKE. The seriousness of the Welsh coal miners' strik well shown by the fact that the output of coal in Great Britain since the outbreak of the war is 36,-500,000 tons, or 13½ per cent less than for the cor-responding period of the previous year. There have stocks of some companies which have been figuring in

service, which is the primary cause of the reduced particularly of recent days. The average price of 12 industrials 92.86 up 0.72; output. If the 150,000 Welsh miners keep up their demand for a 25 per cent, increase in ways, the outlook is serious, especially as Great Britain has to cern less the runaway character of the rise in a few John J. Elkin, of the Baltimore & Ohio Railroad

The desire on the part of the British people to subscribe to the War Loan has had a somewhat adverse effect on the London stock market. Partly from patriotic motives and partly because the new loan yielded rather more than 41/2 per cent, many holders of good securities unloaded their holdings for what they would bring, with the result that stocks have suffered somewhat severely while the Government loan was The only stocks to show any firmness were open. those which had a minimum price.

A factory census taken in the United States in 1914 has just been made public, and shows that there has been a large increase in the manufacturing industries in that country since the previous census which was taken in 1909. The United States is one of the world's great manufacturing countries. . .

The Dominion Trust Company, which went into liquidation some months ago, had five thousand depositors who had on deposit \$1,000,000, of which \$675,-000 belonged to people residing in British Columbia The company had an authorized capital stock of \$5, 000,000, of which \$2,278,030 was paid up. The last dividend, amounting to 2 per cent., was "sid on July 2nd, 1914, or one year ago. Following the suicide of Mr. W. R Arnold, managing director of the company an investigation into the affairs of the Trust pany was held when a deplorable condition was disovered and the company went into the hands of a liquidator. The liquidator has now declined to admit that any of the depositors have any claim to rank all roads from which returns have so far been receiv-ed for the first week in July amounting to \$6,754,290,
