## THE MODEL GRAIN CRUSHER This machine is preferred by farmers,

because it is run and adjusted without using a wrench. The frame is solid and has no shake. The crushing rolls can not get out of line. The feed is controlled by a new patent process, and can be stopped instantaneously. This Crusher ground 125 bushels per hour, driven by a portable engine. This is not a limit to its capacity. Driven by a horsepower with four horses Driven by a horsepower with four horses it has crushed 85 bushels per hour. This may be taken as the average. To grind very fine the output would be less, and if ground coarse it would be more. The gears are made with long teeth, so as to allow for the dressing down of the rolls when worn. It is set up ready to run with either tumbling rod or belt. We have no hesitation in recommending this artice to intending purchasers, as no one has yet been able to find fault with it. If the agent in your market town does not supply you, write to us. write to us.
