For Singers and Speakers.

The New Remedy for Catarrh is Very Valuable.

A Grand Rapids gentleman who represents a prominent manufacturing concern and travels through central and southern Michigan, relates the following regarding the new catarrh cure. He says: "After suffering from catarrh of the head, throat and stomach for several years, I heard of Stuart's Catarrh Tablets quite accidentally, and, like everything else, I immediately bought a package, and was decidedly surprised at the immediate relief it afforded me, and still more to find a complete cure after several weeks' use."

"I have a little son who sings in a boys' choir in one of our prominent churches, and he is greatly troubled with hoarseness and throat weakness, and on my return home from a trip, I gave him a few of the tablets one Sunday morning when he had complained of hoarseness. He was delighted with their effect, removing all huskiness in a few minutes and making the voice clear and strong."

"As the tablets are very pleasant to the taste, I had no difficulty in persuading him to use them regularly. Our family physician told us they were an antiseptic preparation of undoubted merit, and that he himself had no hesitation in using and recommending Stuart's Catarrh Tablets for any form of catarrh."

"I have since met many public speakers and professional singers who use them constantly. A prominent Detroit lawyer told me that Stuart's Catarrh Tablets kept his throat in fine shape during the most trying weather, and that he had long since discarded the use of cheap lozenges and troches on the advice of his physician that they contained so much toxic, potash and opium as to render their use a danger to health."

Stuart's Catarrh Tablets are large, pleasant-tasting lozenges, composed of catarrhal antiseptics, like Red Gum, Blood Root, etc., and sold by druggists everywhere at 50 cents for full treatment.

They act upon the blood and mucous membrane, and their composition and remarkable success has won the approval of physicians, as well as thousands of sufferers from nasal catarrh, throat troubles and catarrh of stomach.

A little book on treatment of catarrh mailed free by addressing F. A. Stuart Co., Marshall, Mich.

R. MITCHELL & SONS,

Nelson P. O., Burlington Jct. Sta.

GOSSIP.

Mr. Gerald Wade, of the Dept. of Registrar of Live Stock, and who has been connected with the Dominion Shorthorn Association for the past twelve years, has been appointed Assistant Secretary of the Dominion Shorthorn Breeders' Association, and Assistant Editor of the Herdbook.

Mr. Jas. A. Russell, Precious Corners, Ont., writes that the Yorkshire sows advertised by him in this paper are show animals, are from imported sows and boars, and are bred to imported boars. He can give pairs not akin. The younger stock are choice, and will make show animals, under one year, next fall, and he guarantees satisfaction. See his advertisement and write for prices.

A bulletin from the U. S. Department of Agriculture says: Fortunate indeed is the farmer who is situated where he can secure sugar-beet pulp. For fattening, we have been too much inclined to condensed rations, largely made up of cereals, hay and water, too dry and too compact, requiring too much of the digestive organs. Sugar-beet pulp enters readily into any balanced-food ration designed for specific purposes. No single item makes a food ration. This statement is as true of corn as it is of pulp, and vice versa. I would not undertake to discourage the use of cereals in the proper place in a food ration. I do wish to encourage the introduction of other food along with them, especially succulent foods, a good type of which we find in sugar-beet pulp. It is available in large quantities. It is nutritious, and its sanitary effect is remarkable. Its aid to digestion is its strongest recommendation. The Dresden Sugar Company have made it possible to transport beet pulp to all parts of the country by drying it out, so that this food is now within the reach of every feeder who has to purchase stock food. See their advertisement of Molasses Stock Food, which is kiln-dried beet pulp with molasses added.

TRADE TOPICS.

THE NATIONAL HERB COMPANY, of Washington, D. C., is pleased to announce to the readers of the "Farmer's Advocate," that they have recently opened up a Head Office in Toronto, for the sale of Perkins' American Herbs. This remedy is put up after a perfected prescription of Dr. J. H. Perkins, who has spent about thirty years of his life in the discovery of an herbal medicine that can be accepted by all as a perfect, safe, and potent household remedy. His formula, embodied in this medicine, includes a Brazilian root which acts upon the kidneys. The herbs, barks and roots of which this medicine is composed are said to be used and known to every doctor of prominence in the world as containing most valuable medical properties.

THE ELGIN FACTORY is the largest in the world. The daily output is 2,000 watches, and 102 different kinds are manufactured. The watches go to every part of the world, and are sold even in Geneva, Switzerland. The different parts of a watch are manufactured in different departments by different people, who have devoted their lives to that particular kind of work, and have been trained to a delicacy and exactness which is more important in watchmaking than in any other mechanical industry. These parts are then assembled as they are needed in another department, where they are put together by experts, who handle them as easily and almost as unconsciously as a great pianist will strike the keys of his piano. The completed watch is tested and timed, and then, strange to say, is put into a refrigerator with the temperature below freezing point and kept there for a number of days to cool off. After it has been frozen, the watch is taken to a furnace, where it is allowed to lie for several days more in a temperature of 95 degrees. This particular discipline is intended to teach the watch that it must not mind changes of weather, and that the steel and other metals of which it is made must not allow themselves to contract or expand by cold or heat. You can learn a good deal in a watch factory.—William F. Curtis, in Chicago Record-Herald.
