A GOOD BARN SHOULD

Amatite on the roof of H. J. Widness Barn, Park Ridge, N. J.

HAVE A GOOD ROOF

Amatite ROOFING
 Best for Every Farm Building Because It Needs No Painting

WHEN you go to buy roofing next time, ask the dealer how much he would charge to keep it properly painted for ten years.

You'll be astonished to see how much a painted roofing really costs. You will find that the painting every two years costs more than the roofing itself.

The best and most economical solution of the roofing problem for you is to buy Amatite Roofing instead of one that needs painting.

Amatite needs no painting or coating.

Lay it on the roof and the work is done for many years. You have no maintenance expense to figure on when you buy Amatite. The first cost of Amatite is its only cost for the entire period.

If Amatite costs twice as much per roll as painted roofings, it would still be more economical to buy because there is none of that big extra expense for paint.

But Amatite does not cost twice as much—in fact, it costs less. In other words, it is actually cheaper in the long run to cover your old roof with Amatite, than to keep on painting it year after year.

Write to-day for a Free Sample and Booklet on Amatite. It will pay you. Address nearest office.

No. 9 Hard Steel Wire

from top to bottom. Does it look strong? Do you know what No. 9 hard steel wire means? It means double the strength and durability of light wire fences. Means the toughest thing known to fence builders. Means the biggest and heaviest wire used for fencing in Canada.

Mr. Fence Builder, just stop one moment and think. You don't want to do the job over again year after next. Take a lesson from some of the two-year old fences you know. They are usually made, or partly made, of light, soft wires that break easily—of poorly galvanized wires that rust soon and up—of poorly fastened wires that slip. Your experience tells you these are the things to look out for. Keep them in mind and take a good look at

Ideal Fence

Look at one that's been up two, three, four or five years. If you'll examine carefully, we'll be satisfied with your judgment. Don't forget to look at the lock. It grips the wire on FIVE bearing points. We show it good and large below so you'll be sure to see it. No. 9 wires, No. 9 stays, locked as Ideal locks them at every crossing, there's not going to be any slips or breaks or holes in your fence and there's not going to be any sagging.

The railroads know how to fence for permanency. They are buying more Ideal than any other make. Farmers are following suit, fencing their farms to stay.

We'd like to talk Ideal fence personally to you for a few minutes. Write in and give us the chance. We'll send you a little book with the particulars to start with.
