PANDORA RANGE

for Coal or Wood

BECAUSE the Pandora Reservoir is made of one piece of sheet steel and is OVAL in shape it has no square corners, seams or grooves in which dirt can collect. The triple-coated, smooth-as-marble surface of *White Enamel* is easy to clean thoroughly. You can make the Pandora Reservoir absolutely sweet and spotlessly clean, so that fruit can be cooked in it without risk of taint. As it holds much more than a kettle, it is a great help at preserving time.

The *Enamelled Steel Reservoir* is only one of the many Pandora conveniences which save time, labor, fuel and money. Get our Pandora booklet and learn about the others.

BRAINY stove experts designed the Pandora Range. They introduced a *new system of flue construction* so that the draft for cooking would also be the draft for baking. With the Pandora you can have *the kettles boiling over every pot hole at the same time the oven is baking pies and roasting beef.*

Just think of *the time that this perfect system of flue construction will save for you* when you're hurrying to get a big dinner ready. Just think how much fuel the Pandora will save for you by doing the baking and cooking at the same time. And remember, no other range has this perfect system of flue-construction. Send for the Pandora booklet. It tells of other conveniences designed by our brainy stove experts.

Time

Why the
Oven is
such an
Excellent
Baker

HAVE you seen the Perfect Spring Door on the warming closet? It is the newest Pandora feature.

The ordinary door, when opened, is inside the warming closet and takes up valuable space.

But the Perfect Spring Door, when opened, is entirely *outside* of the warming closet. By being *outside* it adds *two inches* to the height of the space inside the closet. That *extra space* provides room for *fourteen* more dinner or dessert plates. The door cannot drop down and smash the dishes because the spring holds the door up out of the way until you desire to close it.

The Perfect Spring Door is a convenience worth having. There are more than a score of other conveniences on the Pandora. Our Pandora booklet tells about them. Send for a copy.

One reason why the Pandora oven excels as a baker is because the Fire-Box is amply large enough to provide all the heat the oven requires. Another is because the Sheet Steel Walls of the oven are uniform in thickness. This, together with the Special Flue Construction which carries the heat around the oven twice, assures absolutely uniform distribution of heat in the oven. Still another is because the main bottom of range is protected with a heavy coating of Fire Clay which prevents cold drafts, passing underneath the range, from cooling the oven.

Look at a batch of bread baked in the Pandora oven. The crust on each and every loaf is exactly alike. The Pandora oven is the sure-working, uniform oven that you've long desired. And it's in a range that's *guaranteed* to satisfy you in every particular.

Go and see the Pandora at our agent's in your locality.
