The Game

There was a large attendance. The ice was very hard, and the game in spots was lively. The visitors were no match for St. John's, however, though Archibald and Cavanagh gave a fine exhibition, and Burnham in goal was marvellous. He saved at least thirty-five or forty shots and was responsible for saving the team from a terrible defeat.

The referee gave the visitors every latitude.

Governor Present

H. E. the Governor and Mrs. Davidson were present and enjoyed the game.

After the game the teams proceeded to Wood's West End Restaurant, where a pleasant couple of hours was spent. Mr. Higgins acted as Chairman, and after a good menu had been disposed of the following toast list was gone through:

- "The King"—Prop. The Chairman.
- "The Visitors"—Prop. G. Herder; Resp. R. Proudfoot.
- "The City's Team"—Prop. R. Proudfoot; Resp. G. Herder.
- "The Press"—Prop. J. M. Tobin; Resp. Representatives.
- "The Ladies"—Prop. W. Hutchings; Resp. C. B. Archibald.
- "The Referee"—Prop. G. Herder; Resp. W. J. Higgins.

Speeches were also delivered by J. Vinnicombe, F. W. Angel, A. House and C. J. Colbourne, whilst songs were interspersed by R. Burnham and S. Pearce.

TO FLY OVER THE OCEAN IN LESS THAN 15 HOURS.

(Continued from page 1.) The estimated wind velocity, the fuel supply to be carried will be based on the requirements for making the entire distance at the actual flying speed of the machine.

That is, there will be enough gasoline aboard to fly the machine at 60 miles an hour for more than 30 hours. Soon after leaving the coast of Newfoundland, the fliers will be in the regular track of Atlantic liners, and it is thought that they will at no time be out of sight of vessels. If the motor should stop at the 10,000-foot level, the machine will have a gliding radius of 15 miles in any direction. A wireless telegraph will be carried which will put the fliers in touch with any liner within 100 miles.

One of them will fly the boat while the other attends to the navigation. It will scarcely be necessary for the navigating officer to look over the side of the cockpit in the flight between the two continents, so complete will be the equipment to tell the altitude, angle of flight, speed, direction and position.

Both the Governments of Great Britain and the United States will be asked to send vessels to different points on the course. The navigator of the air craft will be furnished with a chart showing the location of these vessels and the approximate location of every trans-Atlantic liner. It is also proposed to make the flight a yachting event in which the owners of private yachts will view the flight from mid-ocean.

"The chances for success are about nine out of ten," Mr. Curtiss told Mr. Wanamaker. "It is largely a question of mathematics and money."
