CLASS

AN ORGANIZATION IS REQUIRED.

A Communication of Much Interest
From a Johannesburg Gentleman.

He Suggests a Body Which Will Deal With All
Mining Matters and Will Become an Authority Too.

To THE EDITOR OF THE KLONDIKE NUGGET:
Sir, I would solicit a small space in the columns of your esteemed journal to advise the establishment of an institution which has been on the Transvaal gold-fields whence I estimate

been of indispensable service and benefit to the mining industry. I must confess on any article here I feel deeply chagrined and astonished to find that under the British flag such

magnitude of opinion prevails as to the legisla-

tive and administrative evils which exist in our midst. I might comment that it is a singular state upon the representations which are now being made on behalf of British interests by the secretary of state for the colonies to the transvaal government, during the latter's adoption of a more enlightened and liberal policy toward the mining industry of that country. This seems to me to be the condition of things prevailing in this remote corner of the Empire. President Kruger would obviously be justified in employing the "quique" argument with such triumphant effect that the white orchard affected by the Right Hon. Mr. Chamberlain would quickly suffice itself with the blushing tones of a pink carnation.

Recognizing as we do the elements of success

contained in the unity of strength and a full

organization thereof, I would respectfully

suggest to the committee which has been

set up with such public spirit their immediate

gravitation from which the community is not

sure the advisability of forming a chamber

of mines, of which a president and vice-president

and executive shall be appointed to be chosen

from amongst members who would consist of

representative mining owners and others interested

in the welfare and prosperity of these fields. Such an institution would undoubtedly enjoy financial influence and power

become the recognized medium of intercourse

between the government and citizen-owners

and, in safe-guarding the people's rights and

interests, it would speak with an uncertain

voice in vindication thereof; and in all

matters pertaining to the mining industry

act with that fitness of authority and effect

which attach to the opinions and utterances of a representative and responsible public body.

It ought, furthermore, to become a means of a semi-official character for the dissemination

of reliable information concerning the Klondike to the outside world. Miners would need

to consult their mutual interests and big business

with whatever knowledge they desired to possess in connection with their calling while an arbitration court might very wisely be associated with the constitution of the chamber for the hearing and adjustment of disputes. I confidently believe that the formation of such an institution would be of inestimable benefit to the country, and be capable of fulfilling functions as arbitrators and far-reaching as those performed by the Transvaal chamber of mines, which now covers its pastoral building containing muslin filled with samples of the mineral resources of the country; here the executive might meet once a week or more often to regulate subjects and adopt resolutions dealing with the large and important interests which are committed to their care and deliberation. In conclusion I may mention that I am given to understand by a prominent lawyer in this town that the corporation could obtain corporate powers under a special ordinance entitled "The Board of Trade Act."

I am yours, etc.,

MONTGOMERY LEITCHTON
DAWSON CITY, July 14, 1898.

Monte Carlo Closed:

The Monte Carlo was closed last week by agreement of the partners Jack Smith and Bill Gates, the latter gentleman better known

as "Monte Carlo" Bill.

There had been some money difficulties be-

tween them and \$1,000 of the bank in Gates' name had been attached by Smith. Anticipated arrangements are under way for re-opening the place which is in a very desirable location and was doing a good business.

Took "Nuggets" Out With Him.

Mr. Zach P. Highland one of the proprietors of the Nugget has gone to the outside in the interests of the paper. He will visit all the large cities of Canada including Ottawa and also many of those in the United States. He writes with a full complete file of the KLO-

NDE NUGGET, and before returning to Dawson he will see to it that this paper is well along the end of the land to the other side of the foreign circulation of the NUGGET will be supplied from our Seattle office. Mr. Highland flew the Orient last Friday.

A New Thawing Apparatus.

W. Allen is going up to the mines to test

new contrivance for thawing the ground

ice in the numerous appliances now on

the market for dealing with snow and frozen

ground, but heretofore they have been

generally unsuccessful and all the an-

other method of building a cordwood fire

the shaft or in the drift, and after the fire

burned out, and the smoke cleared away,

then what has been found to be thawed

out has been employed on up the present time

time has to wait for the fire to die out

the smoke is clear has been avoided in

some sections by using the fire at

night.

Perhaps It Will Come Today.

McA. H. Churchill, agent for the Columbia

Navigation Co., will give a first class boat

including riggs and berth train how-

ever the party which first goes

out sailing from Dawson the first

month from the outside to arrive in the

world from the outside to arrive in the
