The members of the crew were saved. The Flaminian sighted the U23 at 10.15 o'clock on Monday. The crew prepared to lower the boats and at the same time the vessel was sent ahead at full speed. The submarine easily overhauled her, however, and fired three shots, signalling her to stop. The Flaminian was stopped, and the crew, abandoning all personal belongings, got off in small boats. King George to Set Example In Use of Alcoholic Liquors

His Majesty Writes to the Chancellor of the Exchequer Urging Drastic Measures to Cope With the Drink Question

King George has added his plea to that of the ship owners, and in some cases, that of the Laborites themselves, that some vigorous measures be adopted to cope with the question of drunkenness, which, it is urged, is having its effect of delaying the delivery of munitions of war.

The King has volunteered, if it is necessary, to give up the use of all alcoholic liquors and to issue an order against their use in the Royal Household. Such a notification has been sent up to David Lloyd George, Chancellor of the Exchequer, by the King's Private Secretary, Lord Stamfordham. The letter of Lord Stamfordham follows:

The following letter, dated Buckingham Palace March 30, has been sent to David Lloyd George, Chancellor of the Exchequer: "Dear Chancellor of the Exchequer: The King thanks you for so promptly proceeding to have a full report of the proceedings at yesterday's meeting of the deputation of employers. His Majesty has read it with intense interest, but also with deepest concern. He feels that nothing but the most vigorous measures will successfully cope with the grave situation now existing in our armament factories.

"We have before us the statements not merely of the employers, but of the Admiralty and the War Office, which are responsible for the munitions of war and for the transport of troops and their food and ammunition. From this evidence it is without doubt largely due to drink that we are unable to secure the output of war material indispensable to meet the requirements of the army in the field, and that there has been such a serious delay in consequence of the necessary reinforcements of supplies to aid our gallant troops at the front.

"A continuance of such a state of things must inevitably result in the prolongation of the horrors and burdens of this terrible war.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. AN ACRE FOR PATRIOTISM

Running parallel with the patriotism and production campaign is the movement on the part of a large section of western farmers to set aside one acre of their 1915 crop, and to devote the proceeds from this to be devoted to the relief of destitution arising out of the war. This is not a selfish move to take advantage of the higher prices due to war conditions, but a definite effort and sacrifice in the cause of humanity. The spirit behind such a movement is most commendable and the endeavor to give the generous impulse concrete expression in a definite amount of land devoted to a special purpose is a more practical way to implement a generous resolution. By all means have patriotic acres—voluntary taxes are the easiest to bear and the most fruitful of good.

The Advocate's classified ad. on page 6 are result bringers.

"I am instructed to add that, if it be deemed advisable, the King will be prepared to set an example by giving up all alcoholic liquor himself, and by issuing orders against its consumption in the Royal Household so that no difference shall be made so far as His Majesty is concerned, between the treatment of the rich and the poor in this question.

Signed) Lord Stamfordham, "King's Private Secretary"

The question of drink and its effect on the work which is considered necessary for the successful prosecution of the war, overshadows at the present moment, everything else in public interest. The press and the public favor some drastic measures, a majority of the newspapers expressing the belief that total prohibition, which would apply to all classes, is necessary.

The government, however, has not yet reached a decision on the question, though if Mr. Lloyd George and Lord Kitchener have their way it is believed there will be total prohibition. To bring this about the government must have an act of parliament passed.

It is pointed out that to prohibit the sale of liquor only in the localities where men are engaged in the manufacture of munitions would cause a great outcry, and that, aside from total prohibition, apparently the only way with dealing with the matter is further curtailment in the hours of its sale.

The matter will require long consideration for here are questions of compensation and the finding of employment for the thousands of men and women who would be thrown out of work.

At a meeting of the Glasgow liquor dealers it was decided to ask Lloyd George to receive a deputation from them which will suggest a drastic reduction in the hours for sale of liquor. The same deputation will confer with the labor leaders.

To whom it may concern: This is to certify that I have used MINARD'S LINIMENT myself as well as prescribed it in my practice where a liniment was required and have never failed to get the desired effect.
