NEW SHIUBUILDING RECORDS.

WASHINGTON, Sept. 3. New records in American shipbuilding were made during August. Figures made public to-day by the Department of Commerce show that the monthly output in merchant ships, jucleding those built for foreign owners, was 295,849 gross tons. This included eighty-eight sea-going vessels of 283,099 gross tons. Forty-nine of these were steel, with a tonnage of 181,162, and thirty-nine were wooden of 91,997 tons. For the twelve months ending with August the total output was 1,787,730 gross tons. Before the European war the largest production in the United States was 614,216 gross tong for the year ending June 30, 1918.

CANADIAN OFFICER'S EXPLOIT.

LONDON, Sept. 3. (Canadian Press Despatch from Reuter's Ltd.)-Reuter's correspondent at the British headquarters describes the clever exploits of a Canadian officer at the Wotan line battle. In the dark hours of Monday morning he crept out to try and find a crossing over the river. He discovered a bridge, but thought he would investigate before returning to report this valuable find. The result was the detection of s heavy mine, fitted with contact wires, all ready to be laid. With wire cutters the of-ficer nipped through all the leads, and not long after the Canadian infantry streamed across the bridge in an endless flow. So rapidly did our guns get across the entrenched zone that sixinch high velocity shells since morning have been maintaining a continuous and harassing fire on the Marquoin crossing on the Cambrai road, whence all the heavy German transport had to escape. By eleven the Old Royal Naval Division had advanced nearly eight miles since vesterday morning, and are still going strong. Northward to the Scarpe our troops have done little more than steadily throw forward a covering flank. Our infantry outran the support of their guns despite the fact that the battergalloped forward in a way reminiscent of the long valley manoeuvres. The enemy gun fire was desultory and nowhere formidable, the enemy being evidently desperately short of artillery ammunition on this part of the front.
The surprise occasioned by the rapidity of our advance seems to have been complete. Many fires are springing up in many places far back of their lines. The Germans have dammed the Scarpe and the water has spread over considerable arears, but has not interfered with our progress.
