Great Success of the Indoor Cycle Show at San Francisco.

Records Broken There—The Maple Leafs Hustling.

THE TURF.

Mr. W. J. Paisley, of Clinton, who raised the trotting mare Wanda, has just sold Lucy, sister to Wanda, to Mr. Beattle, of Clinton, a well known horseman. The price paid was a \$300 driving horse and \$275 cash. Mr. Beattle was a the original respective. the was the original purchaser of Wanda.

THE STARTING MACHINE. The Australian starting machine, for

starting horses on a race course, was tried at San Francisco a week or so ago, and all the turfmen there declare that it was entirely successful and a great advance in racing methods. The machine consists of a light gate extending completely across the race track at the starting point. The gate is hung on a slanting wire on either side of the track, the wire stretching from a height of fifteen feet or more down to the track level, making an incline on which the gate is drawn upward and forward In front of the horses. The gate is by wire ropes and heavy weights. When the starter touches a button the gate springs upward and forward, and the horses lined in front of it have a clear course. The jockey can urge his horse forward at the moment the signal to start is given, the gate getting well out of the way, before the horses can bound forward at their first stride. From six to ten horses were sent off in perfect alignment, and without a hitch of any sort. All the jockeys and turfmen were greatly pleased with the experiment, and the gates will be used there exclusively hereafter.

BASEBALL. FLYS.

Daddy Downs has signed his contract with Victoria, B. C. Thomas Breen, the secretary of the

Pastime Baseball Club, of London, has issued the following challenge to the Chatham club: "The Pastime Baseball Club, of this city, would like to arrange a game with your team at some early date. Let us know as soon as possible if you can play us, stating

Manager George Chamberlain, of the Guelphs, has been in Toronto looking after players for the coming season. The Mercury says he was successful in his quest, and the prospects are now bright for having a rattling good team on deck when the season opens. "Daddy" Downs, Jeff Blakey, Congalton and Woods will probably be with the Leafs. Morgan, who caught with the Birmingham, Ala., team in the Southern League in 1893, will also likely be given a chance to show what he can do. McIlroy has not made up his mind whether he will stay in Guelph or try his luck in some other club. If he goes the Leafs will lose a very good third

"Class B has not a chance in the world to survive the Good Friday meeting," said a prominent Toronto sign). vesterday

CAPITAL BICYCLES. W. Mann & Co. wish to inform those who have called to see the Capital bicycles and have been disappointed, that they are now on exhibition at warerooms, 189 Dundas street. The Capitals have a one-piece crank and axle, eccentric chain adjustment, coil spring steering head, and many other points of advantage not on any other wheels. All who have seen them have expressed their opinion that they are superior to any other wheels. They are well worth seeing, whether you intend purchasing or not.

LONDON BICYCLE ACADEMY. For the benefit of their customers, W. Mann & Co. have started a bicycle school in the East London Hall. This will be under the supervision of Mr. J. W. Hyman. All who have already purchased 1896 bicycles, and all of those who yet do so will have the academy privileges without charge.

METEOR DELEGATES. Messrs. Alf. Talbot, Frank Smith, W. H. Abbott, Richard Evans and Thos. Jones were last night appointed to represent the Meteor Bicycle Club at the annual meeting of the C. W. A., to be held in Toronto on Good Fri-

RECORD BREAKING AT FRISCO. night. The first event on the programm last night was an exhibition quarter mile by J. E. Edwards, who rode to beat Oscar Osen's record, made last week. Edwards succeeded in lowering the record to 29 1-5 seconds. The first eighth was ridden in 14 4-5. Chas. S. Wells, the Bay City wheelman, lowered the indoor record for one mile in the first heat of the mile handicap to 1:12 2 5. His fractional time was: Quarter :45, half 1:14 1-5, three-quarters short time.

97 was the principal business which occupied the attention of the members at last night's meeting of the Meteor Bicycle Club. Good men are in the field for every position in the club's gift, except the secretaryship, to which Mr. E. Ramsey was elected by acclamation; and also of reporter, which Mr. J. Pendergast secured in the same manner. The club's delegates to the annual meeting of the C. W. A. in Toronto on Good Friday received instructions to support Quebec for the annual meet. Several new members for the ensu-ing year were added to the roll, and

the club membership promises to be even larger next year than it was this. Tom Duggan, the Australian who is

now in England, has challenged Billy Smith to box for \$1,000 a side. Patsy Latham, of Pend Mills, writes: "Patsy Latham, president of the Pond Mills' Boxing School, will fight Bob Elliott, M.D., ex-champion of the said school, but now of the medical school, London, for a six-round contest for points, for any sum between \$100 and \$500. Fight to take place one week after agreement, at any place agreed upon. I hope to hear soon from the M.D. through your valuable paper." CRICKET.

EXTRAORDINARY MATCH. News of an extraordinary cricket match played recently in Australia has just reached here. The game was between Burwood and Paddington. Only seven men went to the wickets for the latter team, and of these one retired, and two were not out. Nevertheless, five of them made centuries and the total footed up to 725 for five wickets. AQUATIC.

YALE MEN FOR ENGLAND. New Haven, Conn., March 10 .- The members of the Yale crew who are going to Henley were taken before Walter Camp yesterday afternoon, and each under oath attested that he was an amateur. by Fetherstonhaugh & Co. Below will be found the weekly record of all patents granted in the above countries to Canadian inventors, which is furnished by Messrs. Fetherstonhaugh & Co., patent barristers, experts, etc., Bank of Commerce building, Toronto, from whom all information may read-

ily be obtained: Canadian patents—Walter Barnhart, sash locks and holders; Conral H. Hoff, Edwin J. Cashmore, sporting rifles; George W. Johnson, calendars for pencils, penholders, etc.; Edwin Plant, water closet; Patrick Gorman, self-loading street sweepers; John W. Whitman, windmill mping machine; G. Menzies, sash farners; Abraham C. Scarr, can-opening devices; G. I. Root and John Kerr, car brakes.

American patents-Arthur Dumbrint, driving mechanism for bicycles; Wm. J. Gurd, automatic lighter for gas stoves; J. J. Hamilton, means for changing motion; Oliver W. Ketchum, button and button fastener; Ed. A. Parson, bicycle lock; Albert R. Pingel, car axle lubricator; George I. Root, car brake; Misael Authier, slipper (de-

## THE GRAND TRUNK.

An Opinion From Herapath-Supt. Mc-Guigan Talks in Stra ford.

Herapath's Railway Journal, Feb. 28: A good deal seems to be expected from the new general manager of the Grand Trunk: among other things the prevention of snow storms. That familiar adjunct of the Canadian winter unfavorably affected the traffic return of the past week, but a city paper was "in hopes that the new management would have spared us the everlasting chapter of excuses with which the old board had made us painfully familiar." Another glib critic termed it a "snow storm traffic return." That unfavorable weather is entirely accountable for the setback is shown by the fact that, whilst there is a decrease of £6,396 on the line, the Chicago and Grand main Trunk branch shows an increase of nearly £2,000. For the eight weeks date the gain is nearly £44,000, which shows that, though Mr. Hays cannot control the elements, he can sensibly influence business.

Mr. F. H. McGuigan, the new general superintendent of the Grand Trunk Railway, who visited Stratford on Saturday morning, after inspecting the different departments in London, was interviewed by a Her-San Francisco, March 10 .- Interest in ald reporter. Asked as to what prosthe great indoor cycle racing tournament is pects there were for the men in the unabated, the building being crowded every shops getting full time, Mr. McGuigan said no one could possibly regret the short time imposed upon the employes any more than the Grand Trunk officials themselves, and he felt satisfied that as soon as the company's trade and finances warranted a different state of things it would be speedily inaugurated. McGuigan said many other railway companies besides the G. T. R. had been compelled to put their men on

SEVERAL CHANGES. Among the latest changes on the Grand Trunk staff are the appointment of Mr. Charles J. Haight to the sition of freight claims agent, vice Mr. J. Broughton, resigned, and the dismissal of Messrs. Malcolm Mac-Farlane, bridge and building engineer of wooden structures, Stratford; A. J. Bailey, inspector of wooden structures at the same place, and F. W. Hatcher, inspector of wooden bridges, Montreal. Mr. Haight is an Englishman by birth, and has been employed in the Grand Trunk Railway for 22 years. He was at one time commercial agent of the company at Detroit, and latterly manager of the Commercial Express Fast Freight Line at Buffalo. Mr. Haight has many friends in Montreal, where he served for several years. Inquiries at the general manager's office elicited the information that the new freight claims agent would take charge on or about the 15th of April. Three clerks have been employed in this office, and all have received their formal dismissal pending the consolidation of the work. which will show whether their dismissal is to be permanent or not.

It is stated that the system of train dispatching in use ou the New York Central will shortly be adopted by the Grand Trunk The system is a very different one from that now in vogue here, but is considered much

Each one of us is hemmed in by the horizon of his own times; imagination alone can penetrate peyond it.

Toronto, March 10.-Hon. Mr. Gibson has laid on the table the report of the Ontario Agricultural College for 1895. It is a volume of over 400 pages, and is profusely illustrated with photogravures of buildings and drawings of grasses and insects. The report of the president, after stating that the work during the year was satisfactory, refers to the unique position the college holds among educational institutions, having wholly to rely upon its merits. The number of students in attendance was 250-150 in the general course and 100 in the dairy school. Of those in the general course exactly 80 per centnearly all farmers' sons-were from Ontario. Six of the 100 dairy students were non-residents-four from Quebec and the Eastern Provinces, one from the United States, and one from Wales. The average age of students in the general course was 20 years, and of those in the dairy 23 years. The Presbyterians lead in point of num-bers in the general course, while the Methodists are most numerous in the dairy course. The establishment of a preparatory department in July last has enabled the college to make a more satisfactory classification of students. The report also contains the reports of the various departments, showing the progress made during the year.

Mr. Taylor (North Middlesex) introduced a bill to repeal the provision in the municipal act, requiring notice of action for damages one month after

The bills incorporating the Anglican Diocese of Ottawa, and granting certain privileges to the sick children's hospital, Toronto, received their third

In reply to Mr. Little, Hon. Mr. Gibson stated that he did not know that the chaplains employed at the Penetanguishene Reformatory were engaged in any outside work.

Mr. Marter will ask what steps have been made towards a final determination of the jurisdiction of the Dominion of Canada and the Province of On-tario in the matter of inland fisheries. The Attorney-General gives notice of the following bills: Respecting land-lord and tenant; respecting dower; respecting the quieting of titles; to amend the judicature act, 1895, and the law

marriages. Mr. Hardy gives notice of two bills: For the better protection of justices of the peace and other public officers, and respecting the estates of insolvent deceased persons.

## CHEESE AND BUTTER.

Annual Convention of Ontario Makers at Guelph.

Importance of Cleanliness Urged-Pa trons Should be Educated by the Cheesemakers-Handling Tainted Milk-The Preparation of Cream for Churning.

butter makers of the Province assembled at the Ontario Agricultural College dairy school on Friday to discuss the various phases of their industry before the season of 1896 begins. In the morning the delegates to the convention inspected the dairy school and watched with interest the practical

operations there in progress. The president, in his opening address, urged on all cheese makers the importance of cleanliness in their own persons, their factories, and the surroundings. Patrons should be impressed with the advisability of keeping better cows, growing corn, build-ing silos, and taking more care of the

President Mills welcomed the delegates. He said the average man is Come Up in the United States Senate and untidy, many are dirty, and he urged cheese makers to keep their nails and teeth clean, and not chew or smoke. The best breed of cattle for dairying was the grade, and he advised judi-cious culling, so that the herd should crewds to the Senate galleries yesteralways be choice in its individual mem-EDUCATE PATRONS.

Mr. T. B. Millar gave a well prepared paper on "Handling Over-Ripe conference report agreeing to the Milk." He advised the cheese makers House Cuban resolutions. to educate their patrons in taking steam applied until sufficient milk is quickly. The milk should be set at Hoar did not press this to consideraa temperature of 82 or 84, a rennet tion, and it went over. test should be made when the proper mence cutting the curd early, cook quickly, and draw off part of the curd well immediately after milking; cepting the House Cuban resolution. air and mature well before salting. Do not salt till the color is even and the curd mellow. Many other points were touched upon in Mr. Millar's valuable paper.

Mr. S. R. Lee, Molesworth, and Mr. J. W. Mitchell led in a profitable dis-

cussion which followed. TAINTED MILK. Mr. S. R. Steinhoff spoke on "Hand-ling Tainted Milk." Patrons, he said, took it for granted that so long as At 3:10 p.m. Mr. Mitchell pressed his the milk was not sour it would be accepted. Making cheese of tainted milk was injuring the trade. The process of ripening cheese made of tainted milk is hastened by covering the cheese with a clean, light cloth, and being kept in a temperature of from 86 to 98 degrees, which will throw off the tainted flavor. In all cases tainted milk a pure starter should be used. The curd should be kept up to a temperature of 97 after the whey is run off. One of the most difficult cases in dealing with milk is to detect milk containing gases when it is not tainted. Keeping milk in a milk-ing yard has a tendency to cause a manure flavor. The feeding of turnips to cattle was strongly condemned by all the speakers. In the dis-cussion that followed, Mr. Bothwell

and Mr. Rodger were the chief speaks. "Separators and Separating Milk" Sprague, instructor on separators, Provincial dairy school. He entered largely into the mechanical arrangement of the factory, the position of the separator, the speed at which it should be run, etc. Mr. James Stoneouse and Mr. J. H. Findlay contributed interesting speeches on the subject.
CREAM FOR CHURNING.

An ably prepared paper on "Prepa-

# ration of Cream for Churning," was read by Mr. T. C. Rogers, instructor in butter making at the Provincial dairy school. It dealt largely with the factors employed in the cooling, ripening and preparation of the cream for the churn. Among other things he said, where proper provision is not made for cooling the cream, it is sure to be ripened and churned at too high a temperature, and will give to the butter a soft, oily texture that will debutter a soft, oily texture that will de-

ly prepare themselves for their pro-

butter a soft, oily texture that will de-crease its value. Cream is ripened to improve the yield, flavor and keeping

quality of the butter. What we want to learn most is to know how to

control the lactic acid in the cream so

as to secure a uniform ribeness from day to day at a temperature that will

not injure the butter. The most satisfactory temperature at which to ripen

cream is 60 in winter, a lower tem-

perature being more suitable in sum-

mer, as the n.ilk at the time of separ-

ating already contains more lactic

LAKE SHORE, BOSANQUET. March 10.-Miss Harrison, who has been clerking in Maylor's store in Forest for several years, gave up her position about

the 1st inst.

Hydrophobia has broken out in the eastern part of Bosanquet. One little boy died in Arkona recently from the bite of a mad dog. Malcolm Watson's dog was shot before it had done any harm, but it is the only one yet on the Lake Shore.

Jim Brand is very little better, but is able to sit up for a very short time at once. We read recently of a horse that died in Forest over 40 years old. Now let us hear about an old cookstove which is in good working order though 42 years in constant use. It is at the home of Hugh Johnson, Lake Road East, and was purchased by him from a peddler for \$38. It was made in Buffalo, and has done all the cooking, and has never cost much for repairs. Next!

### AILSA CRAIG.

"Advertiser" Agent, C. Walker. Ailsa Craig, March 10.-Miss Winnie Cameron, milliner at White & May's, returned home on Saturday, from an extended visit with friends and relatives at Brantford and Toronto.

Died yesterday, March 8, after a few day's illness of inflammation of the lungs, Donald, son of Mr. John McEwen, town line, Lobo. Deceased was 30 years of age. Funeral will take place on Tuesday afternoon from the residence of his father, for

the Nairn cemetery.

A concert will be given by the Sons of Temperance in the town hall, Ailsa Craig, on Friday evening, March 13, with a view to organizing a lodge here. A good programme will be given by the West McGill-Guelph, March 9.—The cheese and vray and Clandeboye lodges. A pleasant

STRATHROY.

"Advertiser" Agent, J. D. Meekison. Strathroy, March 10.-Mr. William Spurr, an old resident of this town, died at the residence of his son-in-law, Mr. A. Carrothers, Saturday evening, at the age of 86 years. The funeral took place yesterday afternoon for the Strathroy Cemetery, and was largely attended by friends of the deceased. Mr. B. Spurr, of Chatham, was in town attending the funeral of his father, Mr. Wm. Spurr.

# CUBAN RESOLUTIONS

Again Go Over.

Washington, March 10 .- The prospect that the Cuban question would reach day. Mr. Sherman, chairman of the Committee on Foreign Relations, gave notice that he would move during the morning session the adoption of the

Com- Cuba, particularly so far as they concern the interests of the United States. At 11:50 Mr. Sherman moved the whey as soon as possible. Stir the adoption of the conference report, ac-

Mr. Hale (Rep., Me.,) spoke ener-getically against the resolutions. He said he did not think the Senate possessed the information justifying the resolutions, recognizing the belliger-ents. He did not think the inflammatory statements made by senators in justifying the resolution were backed up by facts, and quoted the course of the

resolution seating Mr. Dupont as senator from Delaware, and it was held to be a question of higher privilege than the conference report on the resolutions, so that Cuba went over.

A FEW STRONG STATEMENTS

Extracts from the Letter of a To-

ronto Lady.

The ladies always appreciate quality and genuine merit in goods used in the home. The popular Diamond Dyes are a source of comfort and satisfaction to all housewives. This fact is strongly proven by the grateful letters that are sent in every week by users of Diamond Dyes. Mrs. Rice, 161 Franklin avenue, Toronto, says: "I have been was the title of a paper by Mr. Mark using Diamond Dyes for the past year with great success; would use no others. I am sure if there were more people that knew how much they could save by using Diamond Dyes, the dyers would have to close up their establishments.'

There are no failures when Diamond Dyes are used; they are always reliable, sure, brilliant and unfading. Ask for the "Diamond" and do not accept any substitutes.
