# IS CONDEMNED

Engineer Wright Claims Work

The sewer system of London is in a bad condition, and immediate steps will have to be taken to remedy the trouble. City Engineer Wright has been calling the attention of the coun-

# construction of the Victoria stre-sewer. This drain was built in 1908 is Blight & Fielder, of Chatham. It as parently worked all right until the spring, when numerous complain were made regarding it. Mr. Wrig investigated, and found that it we completely plugged up. He took to certain sections of the drain, as learned, it is alleged, that the Join had not been properly cemented to gether, and that in some instances to side drains were not within six inch-of the main sewer, allowing mud as CONSULT CITY SOLICITOR REGARDING CROMWELL ST Ald. Donnelly Brought Matter of the main sewer, allowing mud and dirt to fill in the sewers. As the re-sult of this alleged careless method of

of Filling Up Hole to Attention of Council. onstruction, it was impossible to use hem. In other cases the levels given contractor had not been followed,

Cromwell street occasioned quite a debate at the council meeting last night.
This is the street that is supposed to run through Anthistic's gravel pit on Wele condition of other sewers. In through Anth-arly all of them there was sedi- lington street.

Mr. Wright also called attention to the condition of other servers. In mough anthistle's gravel pit on Wellmearly all of them there was sediment in great quantities.

"The trouble is that the system was constructed for hygienic purposes only," said Mr. Wright. "For years, however, the city has been connecting up with surface drains, until now the sewers are not big enough to carry away the water. Consequently we are always in trouble, and will be until we are in a positionate take care of surface water in a separate system."

The city engineer suggested that either the Victoria sewer be taken up and relaid at a cost of \$1,500, or that a sewer cleaning machine be secured to open it up.

The latter could be obtained for \$240 for a 60-days' trial, and Mr. Wright was of the opinion that in this time, the cause of the trouble could be determined. If the machine were a success it could be purchased outright for \$1,275.

Hold the Contractor.

"In my opinion, the contractor could be held responsible for the poor construction of the Victoria street sawer," said Ald, Mitchell. "There is no doubt that the work was not properly done.

# struction of the Victoria street sewer, said Ald. Mitchell. "There is no doubt that the work was not properly done. My own idea is that we should lift the whole drain, and find the cause of the trouble beyond a question of doubt. If they did not do the work properly, think we can still hold the contractors liable, if they are responsible people." Ald. Richter tock the position that it would be better to use the cleaner, and get the drain open. It would be less expensive than digging it up, and once cleaned, the cause of the trouble could be discovered. However, he favored obtaining the opinion of City Solicitor Meredith on the liability of the contractors. This fact should be determined, and then the countly what action to take. Rev. Dr. Forbes' Strong Words in Wesley Hall Monday Night.

Night.

e man who drinks. Touching on the oblem of holding young men to the urch, Dr. Forbes expressed sympathy the boys who den't like to listen to apprayers and the singing of psalms, sey cannot be expected to pour out the strains of penitence as David, besure they never committed the sins that yold committed.

Mr. Currie was \$7 years old, and was born and a single of the strain of penitence as David, besure they never committed the sins that yold committed.
