

YUKON GOVERNOR ADVOCATES REFORM

Alex. Henderson Tells Dawson
People They Should Seek Mor-
ality As Well As Gold

GOOD RUN OF SOCKEYES

Standard Oil is Investing in North-
Mackenzie & Mann Buy Conrad
Group of Mines

Dawson, Y. T., July 17.—Alexander Henderson, Governor of Yukon territory, arrived at Dawson on Monday, and made a speech from the deck of the steamer in front of Dawson before landing. A big crowd assembled to hear him.

The new governor voiced the sentiment that moral diligence should be exercised as well as the striving to win gold. This reference to moral diligence aroused the suspicion among the miners that he has in mind the closing of the dance halls. Governor Henderson, however, in an interview, intimates nothing definite concerning any proposed reforms. He assumed the duties of his office Monday.

THE SOCKEYE RUN

Catch Hundred Fish to Boat on the
Skeena River

Vancouver, July 17.—Salmon fishing in the Fraser has reached the turning point. There were some fairly good catches last night, and it is expected that all the canneries will be busy before the end of the week. At all events the fish are ascending the river in considerable numbers. The highest catch per boat reported today was thirty-five. However, the average catch was much lower than ten fish, while others caught as low as four apiece.

The season on the Skeena promises to be a good one, despite the earlier unfavorable reports. Passengers on the last boat state that the boats were averaging one hundred fish. At the Bulkley cannery several thousand fish, occupied the wharf waiting until the cannery could handle the previous catch.

BUY CONRAD GROUP

Mackenzie & Mann Pay Million and a
Half for Windy Arm Properties

Vancouver, July 17.—"Conditions in the North are good this summer," said Mr. P. R. Fleming, traveling freight and passenger agent of the Canadian Pacific Railway, who has just returned from a trip to White Horse and other points. "There is no boom, but exceptional prosperity prevails. I understand considerable success is attending the mining operations of the Guggenheims in the Athabasca."

"The independent operators are also doing well. I was informed that Mr. G. Henshaw cleaned up \$10,000 on McKee Creek in eight days, with equally good prospects for the rest of the season. There is unusual activity in the copper mining district near White Horse. Two of the principal properties now being developed are controlled by Capt. John Irving, of Victoria, and Col. Thomas, of New York. The Irving group is shipping forty tons of high grade ore daily via the White Pass and Yukon Railway, and thence by boat to a smelter at Prince Rupert, where there is a smelter at present. Mr. John Houston, ex-M.L.A., was down at the wharf to forward to Vancouver printers the "copy" for the first issue of his new weekly. For some reason or another Mr. Houston has not yet located in the new city, and there are rumors that prospective rivals with a "pull" are using strong influence to crowd him out of the field.

Mr. Houston is making his home with the provincial policeman. His parting instructions to the purser as the boat backed out was to send back the printed copies of the new sheet on the next steamer. Mr. Houston may have trouble before securing a location for his place, which is now stored on the wharf at Prince Rupert. He has intimated that if he isn't given a square deal there will be something doing. The veteran editor generally says what he means.

Looseness of The Bowels.

It is very seldom during the summer months that most people are not troubled with "looseness of the bowels." Sometimes it only goes that far, but generally it develops into Diarrhoea, Dysentery or Summer Complaint and has a tendency to weaken the whole system.

When the bowels get loosened up in this way and you wish to check the unnatural discharge without bringing on constipation, there is only one remedy to use, and that one is Dr. FOWLER'S EXTRACT OF WILD STRAWBERRY. This remedy is not an experiment as it has been used in thousands of families during the past sixty-two years.

When you ask for Dr. FOWLER'S you get it, as many unprincipled druggists will try to palm off a cheap substitute on you.

Miss M. Hopkins, Roseview, Sask., writes: "I have used Dr. FOWLER'S EXTRACT OF WILD STRAWBERRY and found it is all it is recommended to be for Diarrhoea and Summer Complaint. We would not be without a bottle of it in the house."

Manufactured by The Milburn Co., Limited, Toronto, Ont. Price 35c.

INVESTING IN NORTH.

Vancouver, July 17.—That the faith of miners and prospectors who have been locating and developing mineral claims in the White Horse district, well founded is about to be demonstrated by the expenditure of a large amount of capital in the purchase and development of well known groups of claims in that section by representatives of the Standard Oil company.

W. T. Jackson, familiarly known among his legal associates and among mining men as "Judge" Jackson, arrived here on July 7, and is a guest at the Commercial hotel. Judge Jackson, with his principal, Colonel Thomas, has recently spent some time in the neighborhood of Linn creek, in the White Horse district, examining claims and negotiating for the purchase of groups of such prospects as satisfied their examination. It is currently rumored here and well known in White Horse that Colonel Thomas represents the Standard Oil company, and that the investments now being made by him are on behalf of the mining department of that well comprehending capitalist enterprise. Colonel Thomas was formerly engineer for the British Columbia Copper company. The sum of \$310,000 is mentioned as the amount to be immediately expended in the purchase of the claims adjacent to the mine, and the investment, and negotiations looking to the completion of these deals are now well under way. Colonel Thomas will arrive in the north on Monday, and the entire business involved in the transaction, as far as local parties are concerned, will be finished.

It is needless to suggest that the purchase of these claims and the investment of Standard Oil capital in the mines of the north will prove only the precursor of enormous expenditure in the development of these mineral fields.

G. T. P. Route in B. C.

There are about 100 miles of the Grand Trunk Pacific route in British Columbia that have not yet been definitely located, and several parties of engineers are now at work on this section. The route being surveyed is designed to avoid the Grand Canyon of the Fraser river, where two tunnels would be necessary. The projected line leaves the north bank of the Fraser at Five Mile Bend, about the head of the Grand Canyon, goes through the head of the Tonoquah Creek, and thence down the valley of the creek to the Fraser river, ten miles below the Grand Canyon. From there it crosses to the south bank of the Fraser, which it follows for some distance, returning to the north bank at the mouth of Little Salmon River. It is expected that this route will bring the road a good deal nearer the Cariboo Mines than the course along the Fraser river, through the canyon. Montreal Gazette.

Coal Magnates to Visit West.

Fernie, B. C., July 17.—Senator Jaffray, vice-president of the Crow's Nest Pass Coal company, Mr. C. C. Dalton and Col. James Macdonald, all deeply interested in the success of the company, will leave Toronto tomorrow on a tour to inspect the workings of the mines in the Pass valley.

COUNCIL OF WOMEN.

Reports Presented on the Question of
Women Immigrants.

Vancouver, July 17.—The reading of reports formed the chief feature of the latter part of the morning session of the National Council of Women at St. Andrew's church. The recording secretary, Mrs. Willoughby Cummings, in her annual report, said that though the council had not advanced very much numerically in the past few years, compared with the first few years, it had done much good. Three life patrons had recently been secured in Miss M. J. Scott, Lady Pelk and Mrs. Austin, all of Toronto. The council had been asked to be allowed to affiliate with the National Council. Mrs. Ramsey McDonald had been chosen to represent the International Council of Women at the peace conference, recently held at the Hague.

The financial affairs of the council are in a healthy condition, the treasurer's report showing the following items: Balance in hand from last year, \$50.05; balance in hand after disbursements, \$230.34; total expenditure, \$1,275.75; total receipts, \$1,556.09. At the afternoon session the following resolution was passed: "Resolved that this National Council of Women do cordially endorse the principles laid down in the provisions set forth in the bill now before the Dominion government entitled 'The Juvenile Delinquents Act,' and that a copy of this resolution be sent to Mr. W. L. Scott, president of the Children's Aid society, Ottawa."

At the evening session was held in Pender hall, which was crowded. The principal subject discussed at today's session was immigration, a report on the subject of the reception of women immigrants being read by Miss Fitzgibbon. It showed that during the year upwards of six hundred women had been received at Montreal, most of whom had gone into domestic service, although many of them had been factory employees in the Old Country. In Toronto five hundred and fifty had been received, eighty-five of whom were children. Most of the women had taken work as domestic servants. In this case also the Scotch factory hands had added themselves to circumstances, and were among the most valued domestics in Toronto. The action of nefarious immigration agents in the Old Country who got \$1 per head for sending people out here, and frequently made false representations to them, was deprecated, as also the sending out of those afflicted with tuberculosis, who should not be allowed to land. Strong representations will be made to the government to the necessity of proper inspection on the other side before emigrants are allowed to embark, as the extreme hardship of those who have been turned back at the port of arrival, was too utterly sad to be contemplated with equanimity.

A garden party has been in progress this afternoon, given by Mrs. R. G. Macpherson and Mrs. Robert Kelly at the home of the latter on Nicola street. This morning there will be a meeting at Pender hall, the dated events being an address on Canadian History Delected by Canadian Art, by Miss Fitzgibbon, president of the National Historical society, and another by Mrs. Dignam on the Possibilities of the Development of the Arts and Crafts in Canada.

Montreal has been chosen for next year's convention of the National Council of Women. At the election of officers, which will be held on Saturday, when the convention closes, there will, it is understood, be few, if any, changes in the officers of the society.

NO TAX ON JAPANESE.

Consul-General Nossie Receives a De-
finite Denial of Report.

Ottawa, July 17.—Consul-General Nossie, of Japan, on Thursday received a telegram from Mr. S. Morikawa, Japanese Consul at Vancouver, denying that a head tax of \$35 has been imposed on Japanese by British Columbia. When seen in reference to the matter, Mr. Nossie said: "Mr. Morikawa assures me no such tax has ever been imposed. His explanation to me is that Japanese coming to Canada are examined and must have \$25—that is, be worth that much at least—or they could not be termed paupers—but that is a very different thing to imposing a tax. So far as my information goes there has been no such imposition of a head tax. Besides, the British-Japanese treaty would not allow it."

Mr. Nossie also talked interestingly regarding the rumored flocking to Canada of Japanese to assist on the Grand Trunk Pacific construction. He explained that if the Grand Trunk Pacific intended getting laborers from Japan they would naturally have notified him, and they had not done so. So far as he knows—there are practically no more Japanese coming to Canada than there have been all along.

There is no legal obstruction to prevent them doing so. "How about the commercial treaty between Japan and Canada?" Mr. Nossie was asked. "It is working well, and Canada is now exporting more goods to Japan than ever before, especially such lines as flour, condensed milk, agricultural implements, steel nails, and paper. The trade in these is growing fast. The imports have been decreasing in the past few years, but this is due to tea and silk—but that I think is due to their present high prices and to keen competition from other countries that sell these commodities to Canada."

SOUTH SAANICH TAX RATE IS FIVE MILLS

This Was Decided at a Special
Meeting Held Last
Night

(From Friday's Daily.)
A special meeting of the South Saanich council was held last evening when the rate for the current year was decided upon. The rate struck was five mills on the dollar, four mills on the dollar for municipal purposes and one mill for school purposes. The total assessment for the municipality is approximately \$4,000,000.

The appointment of a clerk for the municipality was also made. A. R. Carmichael being given the position. The meeting which was held in the municipal hall at Saanich, was attended by the full council. The members spent nearly three hours in consideration of the assessment.

Saanich Trustees.

The regular monthly meeting of the Saanich board of school trustees was held in Royal Oak schoolhouse Wednesday evening. The full board was present, with C. E. King in the chair. Various communications, including reports and supplies were disposed of after which applications for the vacant positions as school teachers were considered. One of the applicants, Miss West Saanich, asked to be transferred to Gordon Heights, which was granted. The following appointments were then made:

West Saanich—Gladys C. Holmes, Prospect Lake—A. C. Frank, Strawberry Lake—Bertha Frank. The secretary, J. A. Jones, resigned his position because his business kept him away from the district most of the time. His resignation was accepted and W. W. Moore was appointed in his place.

Northwest Crops.

Toronto, July 18.—J. C. Smith, of W. D. Matthews & Co., has returned from a tour of Alberta and Saskatchewan, and reports that the harvest will be late, but if the weather continues favorable the crops will be good. Conditions of weather are improving, and was a factor and an important one in the west just now, for it promised work for all who cared to take such.

Laborer Killed.

West Selkirk, Man., July 18.—An Icelandic laborer was accidentally killed in the sand pit of the Winnipeg carter railway by falling under the cars.

GOVERNMENT'S POLICY BRINGS GOOD RESULTS

Protection of Game is Having
Effect of Increasing Its
Numbers

The following letter from A. Bryan Williams, chief game and forest guard, to J. Musgrave, secretary of the Vancouver Island Fish and Game club, and the accompanying extract from a report made to him by J. Russell, an official of the department, show that the increase in the number of game in the province, due to the policy of careful conservation inaugurated by the government:

"Dear Musgrave—I enclose herewith extract from Mr. Russell's report. He was away about a month and during 10 days of that time counted approximately 1200 head of misnamed game. These figures speak for themselves. A couple of years ago, prior to his appointment, one might have ridden for days over the same country and seen a few scattered bands and in some places probably none at all owing to the depredations of Indians, etc. In the Eastern Kootenay country the white-tailed deer are increasing rapidly and numbers have been seen by settlers and others. They are also reported to be very tame, owing to the fact that the government is stopping the slaughter of them by the Indians and others. I regret not having written before, but owing to my having been away, I have been unable to do so. Trusting that the enclosed report will interest you."

A. BRYAN WILLIAMS,
Provincial Game and Forest Warden.

The following is the extra from J. Russell's report referred to:

"At Black Point, to my surprise, about 10 miles this side of Highbar, I noticed one of the opposite side of the Fraser river sheep trails, I got my glasses out and located them. 27:1 none had, 22:2 ewes and 4 small rams; none have been seen in this district for years."

"On the 20th I camped at the mouth of French bar, I counted 84 deer and 38 sheep. 7 of these had lambs about 10 days old."

"On the 21st, 2 miles from Lone Cabin, I saw 39 deer and 8 ewes in one band, feeding together."

"On the 22nd I camped at Empire valley and saw about 40 deer during the day's ride."

"On the 23rd I camped at Churn creek on Sheep's Flat, and saw large numbers of deer, mostly separated."

"On the 24th I camped at Churn creek basin, in the heart of the winter range for sheep and deer; I have never seen such a sight; it was a moving mass of game; there were about 150 head of sheep, as near as I could count, mostly ewes and 1 and 2 year old lambs; I should judge there to have been about 400 head of deer in the basin."

"On the 25th I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 26th I counted about 242 head of deer, during a ride of 28 miles."

"On the 28th I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 29th I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 30th I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 31st I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 1st of August I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 2nd of August I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 3rd of August I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 4th of August I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 5th of August I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 6th of August I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 7th of August I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 8th of August I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 9th of August I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 10th of August I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 11th of August I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 12th of August I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 13th of August I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

"On the 14th of August I camped at French bar and went up the creek to the north of the head of the Fraser; I also saw the golden eagles make several attacks on the young lambs but did not see them get one; the mother put up a good fight and no doubt that the eagles get away with the larger part of the lambs."

WHALEERS COMMENCE WORK AT KYUQUOT

Steamer Otter Reached Sechart
Yesterday With News of
Inauguration

ST. LAWRENCE SEEN WITH WHALES

Had Prizes in Tow When Seen on
Wednesday From Steamer Otter—
Prospects are Good

The second whaling station on the west coast of Vancouver Island, that at Narrows Cut creek, Kyuquot Sound, commenced operations on Wednesday, when the steam whaler St. Lawrence brought a sulphur bottom whale to the new station. The Otter, which took a cargo of coal, barrels, etc., to Kyuquot for the Kyuquot whaling company, reached Kyuquot yesterday morning, according to a special dispatch received by the Colonist from a correspondent at the whaling station, bringing news of the commencement of work at the company's factory, and to visit Cape Scott, the island coast. The Otter, after leaving the new whaling station sighted the steam whaler St. Lawrence, sent the Sechart station, with whales in tow. As far as known she had three whales. The prospects for whaling off Kyuquot are said to be even better than off Barkley Sound. The Otter is loading a cargo of whale oil and fertilizer at the Sechart station and is expected to reach port today.

Interviews have been held by officials of the Pacific Whaling company and Mr. Doutrille, commissioner of wireless telegraph, who is soon to leave for the west coast, will be made by the government steamer Quadra to inspect the site selected for the Estevan point lighthouse in connection with which a wireless telegraph station is to be established, and to visit Cape Scott, Cape Cook and the Scott Islands, with a view to the establishment of the whaling stations of the company on the west coast, will be made by the commissioner to look into the matter of the installation of wireless telegraph in connection with the whaling factories. If wireless telegraph stations are established at the whaling depot the whaling company is willing to place apparatus on board its steamers.
