VOL. L. NO. 369.

CROP PROSPECT NOT SO B

Winnipeg Grain Operat
Conditions in Manit
Worst for Years—
Will Average Very L

DROUGHT DAMAGE IS EXT

Situation Somewhat B
Saskatchewan—Pro
Governments' Return
Awaited With Interest

WINNIPEG, July 9.—Partly the furious wordy warfare of a provincial election campaign and because there is so little good sport, the local press has little regard for the condition of the grain crop in this province. At the grain show, however, the bulls have it all their own way.

The Manitoba crop will not be a bumper crop, but it is not a failure either. The condition of the wheat is nearer 50 than 60, the corn is near 50 and every 24 hours of rain is making it worse. That may be an extreme view, but it is certain no one is looking for anything like an average crop this year. Even Brandon district, which among the optimists till a few days ago is talking of the grain being up. The conditions, of course, are largely according to the soil and in some parts of Southern Manitoba farmers are already plowing for the spring wheat.

On light lands there will not be a crop to harvest. Some lands which have succeeded in getting what little moisture there has been are showing better. But the grain is rotting in the soil, and even an average yield of 20 bushels will be a good thing. Farmers are getting anxious about the wheat and the corn. For miles and miles the soil is yellow and parched with the sun. The problem of the wheat is a little already serious in many districts.

Heavy rains right away and weather would no doubt save the wheat to a certain extent, but it is going to have the worst wheat yield of any recent year. Conditions are reported both in Saskatchewan, though the south of that province has suffered and Southern Alberta appears to have been damaged by drought quite as badly as this province, but further north conditions are better. A great deal of leading information is offered the

Official returns by the provincial government are about due and will throw a good deal of light on the situation.

In Saskatchewan.
REGINA, July 9.—Crop conditions in Saskatchewan remain practically unchanged from a week ago and change is in the direction of improvement following heavy rains which many of the northern districts rain was greatly needed.

In Regina district the wheat shows the growth of from 22 inches and in many places is all heading out. Prospects are good for an early harvest with a fair portion of the southern part of the province, south of Qu'Appelle, west of the Manitoba boundary, to the west in Swift Current district. The general impression is that crops there will be much better than in the north. In the more newly opened up districts depending largely upon the farm methods followed, the small rain will not prevent the harvesting of a fair crop if conditions continue favorable from now on.

Crops on the C. N. R. Prince Albert line north of Qu'Appelle are entirely below the average. So far as any dictation can at present be made of the province as a whole this will be below last year's total due to the big increase of acreage.

Redwood Forest Threatened.
VISALIA, Cal. July 9.—Fire threatens the largest grove of big redwood trees in the world, fifty miles from here, soldiers, forest rangers

Killed on Wedding's Eve
GENEVA, July 9.—A pathetic pine tragedy has happened on Jallouve mountain, 7,000 feet high, which is situated near here in Sa Emile Huser, a young Pole resident in Geneva, and a good climber, missed his fiancée that this should his last climb, as his marriage was arranged for the morrow. His fiancée subjected to his climbing, but he was enthusiastic, and attempted climb the sheer unknown peak of 3,000 feet. He fell 600 feet, and was killed.

CHICAGO, July 9.—With the mercury but two degrees lower than yesterday, which, with its restriction to 90 degrees, was the hottest July in the history of the local weather bureau, Chicago today recorded another heat victim, bringing the total deaths since the present torrid attack began up to 24. The official thermometer on top of the government building today registered 92 degrees. The heat in the streets was just stifling as yesterday. Scores of preparations were reported from all parts of the city.
