SUNLIGHT SOAP

is better than other Soaps but is best when used in the Sunlight way. Follow directions.

SUNLIGHT WAY OF WASHING

FIRST.—Dip the article to be washed in a tub of lukewarm water. Draw it out on a washboard and rub the soap lightly over it. The particular not to be washed, all over. **THESE** roll it in a tight roll, lay in the tub under the water, and go on the same way until all the pieces have the soap rolled on, and are well-soiled.

Then go away for thirty minutes, to one hour and let the "Sunlight" Soap do its work.

SECOND.—After soaking the full time rub the clothes lightly on a washboard, and the dirt will drop out. Turn the garment inside out to get at the seams, but don't use any more soap. Don't scrub, but wash through two and three times, and don't scrub through two and three times, and don't scrub through two and three times.

Then wash through two and three times, and don't scrub through two and three times.

Then wash through two and three times, and don't scrub through two and three times.

THE GREAT DREADNAUGHT AN ENGINE OF DEATH

THE LARGEST AND MOST POWERFUL BATTLESHIP IN THE WORLD
AND THE GREATEST NAVAL ACHIEVEMENT OF THE CENTURY

The battleship Dreadnaught was launched recently at Portsmouth, England, by King Edward.

The ceremony was the most simple possible, the King having vetoed all decorations and pageantry in honor of the death of his father-in-law, King Christian.

There was a moment of suspense after the King touched the electric button removing the last block, as the huge ship hesitated and appeared to be reluctant to take the water. But ultimately, she glided down the ways in safety.

Among the occupants of the royal stand were the American Naval Attaché, H. Gilboon, and the other attaches, the Admiralty officials and a few technicians, Lieutenant-Commander John privileged persons.

THE DEADLY DREADNAUGHT.

The launch of the Dreadnaught, the largest and most powerful battleship of the world's navies, marks the first stage in what the British admiralty claims as the greatest achievement in naval construction. On October 2, 1905, only a few days over four months ago, work was commenced at Portsmouth on the vessel, the first of a new class.

The Dreadnaught, the first of a new class, is the largest and most powerful battleship of the world's navies, marks the first stage in what the British admiralty claims as the greatest achievement in naval construction.

the past British vessels have carried four 12-inch guns throwing 850-pound shells; the Dreadnaught will have ten of these weapons of a new type with a muzzle velocity of 49,568, as compared with the 33,622 of the guns carried in as recent battleships as the Majestic, an increase in power of fifty per cent. In a great sea fight the Dreadnaught will be able to discharge every minute ten projectiles weighing 8,500 pounds with sufficient velocity to send them 25 miles or to penetrate about 116 inches of the hardest armor at a range of about two miles. Unlike all British and foreign battleships built in the past thirty years the new addition to the fleet will carry no big guns smaller than the great 12-inch, eight except eighteen three-inch quick-firers for repelling attacks by torpedo craft. She will mount neither 8.2-inch, 7.5-inch, nor 6-inch guns, she will be the biggest warship afloat and she will have only the biggest and most powerful guns. The secrets which will be incorporated in the huge hull are still hidden, but it is known that they tend to economy as well as efficiency. The Dreadnaught will cost ten per cent. more than any other battleship.

Her guns have a range of 17 miles. The Dreadnaught will have only the biggest and most powerful guns. The secrets which will be incorporated in the huge hull are still hidden, but it is known that they tend to economy as well as efficiency. For Breakfast Luncheon or Tea

A few small biscuits easily made with Royal Baking Powder. Make them small—as small round as a napkin ring. Mix and bake just before the meal. Serve hot.

Nothing better for a light dessert than these little hot biscuits with butter and honey, marmalade or jam.

You must use Royal Baking Powder to get them right.

ROYAL BAKING POWDER CO., NEW YORK

When Princess Ena Weds the King of Spain

Madrid, Feb. 23.—Your correspondent obtained at the court marshals' office the full programme concerning the marriage arrangements and ceremonies decided upon for the nuptials of Princess Ena of Battenburg and King Alfonso.

King Alfonso will send an ambassador extraordinary to London to sign the marriage contract and attend to other legal formalities. The contract will be immediately ratified by Edward VII. on the one hand, and Alfonso XIII. on the other.

ENTRANCE INTO SPAIN.

The Queen will enter Spain by way of Irun and at this point at the frontier all the grandes of Spain will await her arrival in full panoply, wearing their ancient robes and coronets. There will also be a great military display, horse, foot and artillery, the contingent being composed of regiments that have never been defeated in battle but, on the contrary, covered their flag with glory. The speech of welcome will be made by the chief of the special embassy appointed by King Alfonso for this occasion. The English ambassador will attend, too.

After these ceremonies, her Royal Highness, her mother and suite will embark on a special train for Madrid. Spanish railways are proverbially slow, but less time than usual will be made by the train carrying the bride as deputations and officials must be received at every station. And there will be a steady current of oratory, music, military display and gun firing.

ALFONSO IN WAITING.

Ena and her mamma will meet Alfonso outside the park of Castle Fardo, four miles from Madrid. Fardo has no railway station, but the King is building one for his girl. When the train stops, the young King, his mother, the royal family, ministers, generals and officials will be in waiting, and there will be more music, speeches and cannon firing. After that is over the bride and groom and the two mamma's will mount an enormous state coach, drawn by sixteen horses, and travel to the palace. But the King must not enter, he must kiss Ena good-by 500 paces from the palace door and return immediately to the station. Even his mother is not allowed to enter—Spanish etiquette says she might feel called upon to harrange, or harass her future daughter-in-law. Six days Ena must wait before she can be made a bride according to Spanish etiquette, and each hour during these six days is spoken for by deputations from the Senate, courtiers, provincial and other authorities, generals, grandees, officers, citizens and who-not?

MARRIAGE CONTRACT PUBLICLY READ.

Two days before the wedding the marriage contract will be publicly read, even the financial settlements being made public. However, the Spaniards have a way of mumble-

when it comes to mentioning figures. So if Edward is unwilling to invest much money in Spain the world at large will not know it.

Meanwhile all Madrid will be admiring and criticizing the bride's trousseau on exhibition at the palace of the Council of State. Every time she will wear as Queen of Spain will be shown, except the stockings, for Spanish etiquette says that Queens of Spain have no legs. But they have feet, hence a whole roomful of shoes and slippers. The exhibition is so public that even beggars may gaze on the Queen's things, while a hundred Haberdashers stand guard over them.

THE WEDDING DAY.

On the wedding day Ena and her mother leave the palace in a simple closed carriage, under guard of policemen and detectives, who, however, must know enough to conceal themselves, and travel Madridward. Even if a dozen ministers of state and a hundred grandes de la corte are on the way, they would take no notice. Soldiers will have no salute for her, and cannon and brass bands are silent, for—mark the word—her majesty-to-be is strictly incog. But the carriage has slowly left the park when a horseman appears, bows low and silently rides at the side up to the gates of Madrid. The horseman is Alfonso of course. Kings of Spain have performed this stunt for time immemorial on their wedding day.

Ena is hustled to the palace of the State Council and into a large room there, the windows of which are covered with mirrors. In the room are twelve duchesses, all of them blessed with the hereditary privilege of helping to disrobe the Queen-to-be. Ena must change her linen, everything, and is then dressed in the wedding gown. The dressing room, by the way, is on the ground floor, and when Ena steps out in her finery the twelve duchesses carry her train, a dozen grandes bow to the ground, all kneeling, crumms boom, a dozen regimental bands bray and toot, and the assembled multitudes greet her vociferously. There is a sixteen-horse coach for her, the most gorgeous crystal palace on wheels one can imagine. No more incognito. Then Ena proceeds to church, to leave it as Queen of Spain.

Common Colds are the Cause of Many Serious Diseases.

Physicians who have gained a national reputation as analysts of the cause of various diseases, claim that if catching cold could be avoided a long list of dangerous ailments would never be heard of. Every one knows that pneumonia and consumption originate from a cold, and chronic catarrhs, bronchitis, and all throat and lung trouble are aggravated and rendered more serious by each fresh attack. Do not risk your life or take chances when you have a cold. Chamberlain's Cough Remedy will cure it before these diseases develop. This remedy contains no opium, morphine or other harmful drug and has thirty years of reputation back of it, gained by its cures under every condition. For sale by S. N. Wear.

\$5,000 REWARD will be paid to any person who can prove that Sunlight Soap contains any injurious chemicals or any form of adulteration.

5c. Buy it and follow directions. 5c.

LEVER BROTHERS LIMITED, TORONTO

BEFORE MOVING

We will sell our varied stock of wall Papers, and Chinaware at cost. Be sure and prove the above Bridgetown Book Store.

INTERNATIONAL BRICK & TILE CO.

Tenders will be received by the undersigned, at his office in Bridgetown, up to the 11th day of April, next ensuing, for purchase of the entire plant and outfit of the International Brick and Tile Co., situate at Bridgetown, in the County of Annapolis, consisting of the following, viz:—Real estate, nine acres, the larger portion being superior clay and sand, a forty H. P. boiler and engine, made by Matheson & Co., one sand moulding brick machine, capacity, twenty-five thousand brick per day; one pug mill for do.; one wire cut brick machine, capacity, twenty-five thousand brick per day; one crusher; two new kiln sheds; racks for drying bricks; one wharf, recently built; railway siding. All of the above in first class order and condition. Also pulleys, shafting, belting, wheelbarrows, trucks, and tools usually found in a well appointed brickyard. Sand and clay in abundance, and in easy reach of machines, very small expense in moving the clay and sand to the machines; no pumping necessary.

Each tender must be accompanied by a certified cheque for five per cent. of the amount of the tender. The highest, or any tender not necessarily accepted.
