Niagara Falls Threatened

(From the Cleveland Plain Dealer.) Unless the people of the United States who have an interest in preerving Niagara Palls exert themselves in behalf of the pending Burton bill they are likely to see this great natural spectacle forever rained by silffish corporations. The measure is before the foreign relations committee of the Senate, whose chairman is Cullmon of Illinois. It is greatly to be feared that the co-nothing policy of the Senate will prevent the enactment of this thoroughly desirable bill.

The action which Mr. Durton asks of Congress is mersly an extension of the present Burton law, which will expire by i mitation in June. This law is amply liberal in its terms, allowing the diversion of all the water that may be spared without the practical ruination of the wendrous cataract. Unless the act is extended the only limitation upon the privilege of the power companies to take water will be that written into the Canadian waterway treaty which permits the use of some seventy per cent. more water than is now diverted.

Ningara Falls belong to the people ci the two nations. They should not le : thoughtless as to permit the falis' , destruction; to do so would mean the surrender of a possession that could never be regained. It would be an offence beyond condensment to permit the expiration of the Burton law.

It is a situation eminently justifying a "write your congressman" polley. The Senate graveyard yawns for a people's measure, and the people should raise a mighty protest.
