I was the first to introduce to the public the Hubbard squash, American Turbin Squash, Marblehead Maranath Cabbage, Mexican Sweet Corn, Philney's Water-cress, and many other

New and Valuable Vegetables.

This season I have a new and exceedingly valuable squash, new varieties of corn, three fine melons, and other choice new vegetables for my customers.

My business is to supply what every farmer is anxious to get, the very best of vegetable seeds, with a hundred and fifty kinds on my four seed farms, right under my own eye, making new vegetables as excellent, besides importing their choicest varieties from European growers. A fine collection of flower seed, home-grown and imported, will also be found in my Catalogue, which will be sent free to all applicants.

As stated in my Catalogue, all my seed is sold under three warrants,—1st. That all money sent shall reach me. 2d. That all good orders shall reach the purchaser. 3d. That my seeds shall be fresh and true to name.
