

illustrated and described in the catalogue which will be sent free on application.

The Canadian Year Book for 1904, the seventh year of its publication, has just been issued by Alfred Hewett, 50 Adelaide street east, Toronto. It is simply invaluable as a book of reference for anything that concerns Canada, and the greatest attention has been paid to accuracy. Governments of the Dominion and of the different Provinces, politics, tariff, sporting and athletic records, militia lists, exports and imports, fish and game regulations, banks and branches, postoffices with nearest railways, members of Parliament and of the different Legislatures, regulations pertaining to different departments of Government, rifle shooting, agriculture, principal events of 1903 in chronological order, trade, legal directory—these are a few of the matters covered by the Canadian Year Book. The book is embellished with pictures of the Dominion and of the different Provincial Cabinets. Those who had occasion to use the work in other years appreciated its value and will welcome the new edition.

"Something Pneumatic" is a monthly magazine devoted to the interests of pneumatic appliances and their motive power, published by Chicago Pneumatic Tool Co. The current number contains a number of views of important buildings and factories in different cities in which the company is interested. The magazine also contains the text of the opinion handed down by Judge Hazel of the United States Circuit Court, Southern District, State of New York, sustaining the Mosset drill patent owned by this company, and holding the Philadelphia-Keller drills to be infringements of the first and second claims thereof, and directing the entry of a decree for an accounting of profits and damages and injunction prohibiting the further manufacture, sale or use of such drills. The opinion of the court is published in full for the information of all parties interested.

Messrs. H. Alabaster, Gatchouse & Co., publishers of the Universal Electrical Directory, 4 Ludgate Hill, London, E.C., England, announce that the 1905 edition of that Directory is in course of preparation for its 24th annual issue in January next.

The Jeffrey Mfg. Co., Columbus, Ohio, have sent us their Bulletin No. 8 relating to the Electric Locomotives for Gathering Purposes made by them. The general features of these locomotives are shown in the various illustrations in the bulletin. The use of them has, we are told, many advantages. It reduces the wear and tear on the road-bed. The gathering of coal is performed with more regularity, causing less confusion, and the air of the mine, on account of the absence of mules and horses, can be kept purer.

We are in receipt of "Transactions of the Canadian Institute," Volume VII., Part 3, for March, 1904. Articles appearing in the book have reference to Sawdust and Fish Life: The Bacterial Contamination of Milk and its Control; The Chemistry of Wheat Gluten; The Nah-ano and their Language, and the Palaeochemistry of the Ocean in Relation to Animal and Vegetable Protoplasm.

The Cassella Color Co., 182-184 Front Street, New York, branches at Philadelphia, Boston, Providence, Atlanta and Montreal, have issued a neat little book of 71 pages, giving valuable instructions for the employment of their dyestuffs in garment dyeing, based upon experience collected in practical working. This book, "Garment Dyeing," should be in the possession of every garment dyer. A copy may be had by writing to the firm.

"Protection and Prices, and the Farmers' Home Market" by Watson Griffin, comprises a number of articles published as editorials in Industrial Canada during the year 1903 and the first five months of 1904, and refer to the conditions existing in Canada during that period.

Dixon's Ticonderoga Graphite Grease, and Dixon's Graphite Cup Greases, are the titles of a couple of dainty little brochures relating to the subjects indicated by the names, sent us by the Joseph Dixon Crucible Co., Jersey City, N.J.

The Canadian Co-Operator is a monthly magazine published by the Co-Operator Publishing Co. at Whitby, Ont., the first issue of which has just reached this office.

A change of management has been effected in our esteemed contemporary The Western Builder, of Milwaukee, Wis. Mr. E. M. Maxwell, who has been the publisher of the paper for the last year has relinquished his interest in it, it having been purchased by Messrs. F. O. Thomson and H. J. Knappen who will hereafter direct its management.

We have from the British Foreign Office, London, Diplomatic and Consular Reports as follows:—Trade of Consular District of Rostov-on-Don, Russia, for 1903; Trade of Chin-Kiang, China, for 1903; Trade of Havre and district, France, for 1903; Trade of Smyrna and district, Turkey, for 1903-3.

The Jones Magazine for June, devoted to the interests of the Jones Stoker, and published by the Jones Under-Feed Stoker Co., Toronto, has reached us.

#### LE CANADA POUR LES CANADIENS

Canadian Westinghouse Co., Limited, Bureaux Generaux, Hamilton, Canada, annonce: Nous croyons qu'il vous intéressera d'apprendre que nous sommes à construire un grand établissement à Hamilton pour la fabrication d'appareils électriques de toutes sortes. Cet établissement sera un supplément important au commerce canadien. Son équipement avec les machines des améliorations les plus récentes donnera de l'emploi à plus de mil hommes; les mêmes méthodes et les mêmes attentions aux détails, qui ont été un succès dans l'opération de notre fabrique d'Air Brake, durant les sept dernières années, domineront dans la direction de nos nouvelles usines.
