Historical and Doctrinal

EDITED BY THE

**Rev. Charles Randall Barnes,**  
A.B., A.M., D.D.

(NEW YORK UNIVERSITY)

Illustrated by nearly Four Hundred  
Engravings, Maps, Charts, etc.

Within the Reach of All

**O**UR distinguished author, DR. CHARLES RANDALL BARNES, is peculiarly fitted for the preparation of a work of this kind. His wide experience as a long-time pastor, in numerous charges, and as an earnest worker in Sunday schools has taught him the crying need of a work which, while popular in style and to be sold at a very low price, should yet embody the results of the latest research in all the fields of Biblical knowledge. Moreover, as a collaborator for several years with DR. JAMES STRONG on *McClintock and Strong's Cyclopedia*, he enjoyed an excellent preparation for the labor required. His wide acquaintance likewise enabled him to avail himself of the valuable assistance of able specialists, whose names appear in the Introduction and are signed to their several articles. So vast is the range of Topics and so extensive the available material that no one person can be master of it all. These signed articles, as well as others, furnish up-to-date facts and the results of the latest researches.

**C**UMBERSOME AND COSTLY CYCLOPEDIAS are available only to the few who have money to purchase and leisure to consult them. They have their sphere, but, for the above-mentioned reasons, it must be limited. **There is a very large class vitally interested in the subjects to whom they are inaccessible.**

In the PEOPLE'S BIBLE ENCYCLOPEDIA we present a work that will be exceedingly serviceable for all classes. It has features which render it invaluable both to the professional student and to that large class of persons who, while desirous of information respecting Bible Topics, are not in possession of the necessary books to study them satisfactorily. While sold at an exceedingly low price so as to bring it within the reach of all, it will be found to cover the whole ground in an exceedingly satisfactory manner, so simply told as to be easily understood by those of very limited education, and yet imparting much valuable information to the advanced student or professional man.

Did space permit, the discussion of these different features might be very largely extended. We aim here merely to sketch some of the leading features of the work in the briefest possible manner.
