

PREFACE.

This book gives, in convenient form, a compilation of the series of articles on cyanidation as they have appeared in the pages of the MINING AND SCIENTIFIC PRESS between January, 1906, and October, 1907. The contributors are the leaders in this branch of metallurgy and they describe the practice in mills all over the world, from Nevada to New Zealand, and from the Transvaal to Korea.

T. A. RICKARD,
Editor.

SAN FRANCISCO, October 12, 1907.
