A Small Pill, bet Powerrui.—They that judge of the powers of a pill by its size would consider Parmelee's Vegetable Pills to be lacking. It is a little wonder among pills. What it lacks in size it makes up in potency. The remedies which it carries are put up in these small doses, because they are so powerful that only small doses are required. The full strength of the extracts is secured in this form and do their work thoroughly.

Chicago Gossip.

Henry A. King & Co., 12 King-street east, received the following despatch to-day from Chicago.

Wheat—While the excellent weather conditions were this morning regarded as a bearish factor, the rather steady cables caused an opening at about yesterday's final transactions, and the low point for the day was recorded at the start, Local traders and shorts accorded the market sufficient support to more than offset the offerings from Ohio and Michigan, where the harvesting is very fine. Receipts in St. Louis were quite heavy compared with last week, and double those of last year, which no doubt is responsible for the very bearish feeling of late in that market, though part of vesterday's decline there was recovered to-day. Closing Liverpool advices showed considerable firmness as compared with our weakness yesterday, with Paris 10 to 20c higher; Antwerp steady to 12½c lower. Bradstreet's estimated reduction in world's available supply of over 6,000,000 bushels was a strengthening feature, as against 1,160,000 bushels last year. While clearances are light, there seems to be a much better tone to the market than yesterday, and the closing Henry A. King & Co., 12 King-street east, received the following despatch to-day

Canadian Failures.

R. G. Dun & Co,'s analysis of the business failures in Canada for the second quarter of 1898 is interesting. The failures for the second quarter of 1898 were not only fewer, as weekly returns have shown but very much smaller than those of the first quarter. The number is nearly 40 per cent. smaller than in the first quarter of this year, and nearly 30 per cent. smaller than in the corresponding quarter of last year. The aggregate of liabilities is almost 34 per cent, smaller than in the first quarter of this year, and, being \$1,945,462 against \$2,939,351, in nearly the same ratio smaller than in the corresponding quarter of 1897. The decrease, moreover, is shared by manufacturing and trading branches, for in

Sharp Rise in December.

New York, July 6.—The Evening Post's London cable: The withdrawal to-day from the Bank of England of £105,000 in German coin and of £10,000 for Holland, in addition to the £242,000, has caused a sharp rise in discount rates, and makes the bankers skeptical of a further early reduction in the bank's discount rate. For this reason the stock market here was dull and drooping to-day. So far as Americans are concerned, operators here are discouraged by the persistency with which Wall-street sells on any advance here.

A Persian loan of about £1,500,000 is being underwritten, but not with eagerness; and a large brewing amalgamation is anrounced to-night with a capital of £15,000,000, over one-third of which is asked for by Friday night.

The Paris and Berlin markets were quiet and featureless.
