

TENEYCK GETS PROMOTION

Salary Increases Recommended by Finance Committee Sent Back by Special Committee.

"NOW SIR,"

"Honest Injun," we want to ask you a question. It's this: If the price tags were not on the suits in our window, would you think that they cost more than they do? We frequently put price tags on the clothing we display for no other reason than to prevent people from thinking that the price is higher than it is.

OUR KIND OF CLOTHES

have a habit of looking more expensive than they really are. We are confident that we have just the Spring Suit you'll like, and will be pleased to show it to you any day you are ready to look at it. \$7.50, \$10, \$12, up to \$24, and satisfaction all along the line.

OAK HALL

CLOTHIERS - Right Opposite the "Chimes" - 115 King St. E. J. Coombes, Manager

SALMON FISHERIES.

Philippines and Porto Ricans Displacing the Chinese Laborers.

With the exception of the Puget Sound region, all salmon fisheries outside of Alaska had a prosperous season in 1904, handsome gains having been made on the Columbia River and the salmon streams of Washington, Oregon and California. This is quite contrary to the outlook about the middle of the summer, but the later runs were profuse, and packing was continued for a longer period than usual. The Puget Sound canneries suffered severely, meeting a loss from last year of nearly 50 per cent. The product of the several regions was as follows:

Table with 2 columns: Region, 1904, 1903. Rows include British Columbia, Puget Sound, Columbia River, Washington, Oregon, California Rivers, Alaska.

There is shown a loss on the world's total pack of 338,286 cases, wholly accounted for by the decrease in Alaska. The total value of the Alaska output, at the figures furnished by the packers in all cases but one, was \$7,128,782. The figures show a loss of \$5,553,853 from the aggregate market value of the pack for 1903.

The aggregate output of salmon of all varieties taken was 20,828,511, against 24,615,812 in 1903. The total number of hands employed was 12,597, made up of 9445 whites, 2002 natives, 3499 Chinese, and 1721 Japanese. The introduction of the Japanese was practically new last year, and was rendered necessary by the difficulty in procuring Chinamen for the work of the season. A considerable number of Filipinos and Porto Ricans were also employed in work heretofore done by Chinese.

Source of Banknotes.

The wife of a cattle dealer at Arisval, Inverness-shire, Scotland opened a box the other day in which her husband kept his money, and then left the room to attend to a caller. In her absence a four-year-old boy took possession of the box, and placed in the middle of the fire a bundle of banknotes of the value of \$124. When the woman returned, all that was left of the notes was a heap of ashes. A fund has been opened on behalf of the man, to whom the loss is very serious.

To Stay at Strathcona's

Montreal, April 25.—(Special.)—The Governor-general and suite will occupy Lord Strathcona's residence during the coming horse show.

Bright's Disease - Sure Death

If Your Kidneys are Diseased in the Slightest Form Your Life is in Danger from Bright's Disease Unless You Turn Speedily to the Reliable

WARNER'S SAFE CURE

Dull, grinding pains in the back, side or head; rheumatic twinges and swellings; loss of energy and appetite; sleeplessness; inflammation of the urinary organs; painful and too frequent passing of the water; female troubles, all indicate that your kidneys have been badly affected for months. If there is any doubt in your mind about your condition make this unflinching test at home. Just let a tumblerful of morning urine stand 24 hours, and if it becomes cloudy, or particles float about in it, or if a reddish-brown sediment forms, it is positive proof that your kidneys have been diseased for months, and unless properly treated at once, Bright's disease, diabetes, uric acid and blood poisoning with fatal results will surely follow.

"About two years ago I began to notice dull pains in my back and head. I had periods of great weariness and lack of energy. Some days I felt fine; others, oppressed and out of sorts. The doctors admitted they didn't know what ailed me, but gave me something and said I'd be all right in a day or two. However, I got no better and began taking advertised medicines, but without result. Finally I insisted upon knowing just exactly what was the matter with me, and the doctors made a thorough examination, and declared I had a deep seated case of Bright's disease. Their treatment had no effect, so I determined to place myself in the hands of the Warner Safe Cure doctors, who analyzed my urine and found my kidneys in a critical condition. By their orders I dropped everything else and began taking Warner's Safe Cure. It did me good from the first. The pains stopped; my general health improved. I got back my old time energy and ambition, and by the time I had finished four bottles every trace of kidney disease had disappeared, and I have not had the least trouble from that day to this. I cannot say too much in praise of your grand medicine."

Thousands of letters like the above are received from men and women who have been cured of all kinds of kidney diseases, and who owe their lives to Warner's Safe Cure. Warner's Safe Cure is what you need. It is taken by doctors themselves, prescribed by them, and used in hospitals for all disorders of kidneys, liver, bladder and blood, because, while it cures even the worst cases, it contains nothing that can possibly leave any bad after effects. The good effects are felt with the first few doses. Buy it at your druggists, or direct, \$1 a bottle. Accept nothing but Warner's Safe Cure. Medical advice and booklet free. Warner's Safe Cure Company, 44 Lombard-street, Toronto, Ont.

WARNER'S SAFE PILLS move the bowels gently and a speedy cure. TRIAL BOTTLE FREE. To convince every sufferer from diseases of the kidneys, liver, bladder and blood, that Warner's Safe Cure will cure them, a trial bottle will be sent absolutely free, postpaid, to any address. All you have to do is write Warner's Safe Cure Co., 44 Lombard-street, Toronto, Ont., and mention name of this paper. The genuineness of this offer is guaranteed by the publisher.

PROBERS, POORLY PAID

Ontario Educational Ass'n Devotes Much of First Day's Conference to Discussion of Material Subject.

Hamilton, April 25.—(Special.)—By a vote of 3 to 1, B. TenEyck, acting chief, was appointed to fill the position of chief of the fire department at \$1800 a year. Aldermen Baird, Martin and Gilbert voted for W. T. James. James was promoted from the position of sub-foreman to foreman of the department at \$1900 a year, and Archie Cameron was made sub-foreman at \$1000. The salary increases recommended by the finance committee were referred back to the salaries committee, to which

The forty-fourth annual meeting of the Ontario Educational Association is being held at the university. Matters are under discussion which relate to education in general; but the chief matter under discussion yesterday was how best to interest the public in giving a greater appreciation to the teaching profession, and raising it in the social scale. It was generally accepted that if salaries were raised, the social position of the teacher would at once be enhanced, and that the permanency of teaching as a profession would be thereby secured. Increased remuneration, otherwise educated men will find a reward for their services in the academic and business pursuits.

Principal Scott of the Normal School treated the question in a paper which gave the wages of every walk of life. His table shows that the highest salary paid to public school teachers in 1880 was \$2000, in 1890 it was \$1800, and in 1904 \$1600. The highest salary of high school teachers in 1880 was \$2000, in 1890 it was \$1800, and in 1904 \$1600. The average salary of principals in the province is \$2200, in towns \$3200. The average salary of principals in colleges and institutes is \$7,94 per day and assistants \$5.04. In Toronto the school board pays its women teachers \$1.75 per day for the first year. This is a less wage than is paid to the street sweepers who receive \$1.50. The bricklayers are started at \$7.00 or \$3.46 per teaching day. This is less than the government pays its six tax collectors \$1880, and its women school teachers \$1500 per school at \$1200. Any one earning \$3 per week or more is better off than the average school teacher.

H. P. Kennedy urged that since the publication of the findings of the committee it should also assume the responsibility of fixing a reasonable minimum salary. He suggested that a joint committee of the public schools and training colleges should be organized to study the matter. He also urged that the government should take the responsibility of fixing a reasonable minimum salary. He suggested that a joint committee of the public schools and training colleges should be organized to study the matter. He also urged that the government should take the responsibility of fixing a reasonable minimum salary.

The historical section elected the following officers: President, William Dale; vice-president, J. P. Hogg; secretary, J. P. Hogg; treasurer, J. P. Hogg. The section also elected a committee to study the matter of the social evolution of the province. They may be interested to know that the social evolution of the province has been a great factor in the social evolution of the province. They may be interested to know that the social evolution of the province has been a great factor in the social evolution of the province.

The president's address. In the evening, in giving the presidential address, the president, R. H. J. Orville, of Ottawa, and J. E. Parvillat, of Montreal, made a number of suggestions that the legislature should be petitioned to empower school boards to raise rates for the maintenance of the schools. The speaker also mentioned the fact that the average male teacher receives \$428, and the female teachers \$312. The average farm laborer receives \$274. The speaker also mentioned the fact that the average male teacher receives \$428, and the female teachers \$312. The average farm laborer receives \$274.

CONSUMPTION FOLLOWS SPRING DEBILITY

The Tubercular Germ Takes Root Very Easily When the System is Run Down.

In the spring-time the vigor and resisting power of the body fall very low. Instead of being rich and nourishing, the blood is thin and watery. As a result the bodily forces become less active, sleep fails to bring rest, and nervous energy develops into overexhaustion. Let the germ of consumption get to work like this and it is likely to take root. The only hope, lies in supplying an abundance of new blood, which must be rich in nourishment, brimming with vitality and building material. Where is the blood to come from? Easily answered with Ferrero's, which first renovates all the blood in the body and then constructs more blood possessing the very elements needed by a weak system. Remember this: Ferrero's establishes so high a standard of blood quality, nerve force and bodily vigor that sickness of any kind simply can't creep in. It rebuilds all the worn-out tissues, puts new life into the lungs and absolutely destroys any danger of consumption or spring fever. Mrs. E. Richardson of Manicoba, Ont., tells in the following words how she gained in health and spirits from the use of Ferrero's: "When I first read about Ferrero's I was convinced it might be tubercular, which it was not. I was thin and anemic. Towards spring I fell into a condition of nervous exhaustion, and my life was scarcely worth living. A dead tiredness seemed to hang over me like a load of bricks. I simply couldn't do housework of any kind. A bad cough developed that worried me greatly. For I thought it might be tubercular. When I first read about Ferrero's I was convinced it might be tubercular, which it was not. I was thin and anemic. Towards spring I fell into a condition of nervous exhaustion, and my life was scarcely worth living. A dead tiredness seemed to hang over me like a load of bricks. When I first read about Ferrero's I was convinced it might be tubercular, which it was not. I was thin and anemic. Towards spring I fell into a condition of nervous exhaustion, and my life was scarcely worth living. A dead tiredness seemed to hang over me like a load of bricks. I simply couldn't do housework of any kind. A bad cough developed that worried me greatly. For I thought it might be tubercular. When I first read about Ferrero's I was convinced it might be tubercular, which it was not. I was thin and anemic.
