Monday Evening, Dec. 6. There were few features brought out in the trading at the local mining ex-

changes to-day. The general condition of the market was very dull and while some improvement was made at times, advances were few and far between, and the majority of the listed stocks did well to hold their own on Saturday's records.

The higher priced Cobalts were the specialties in the day's dealings. Niplising made an advance of 15 points at the close. Crown Reserve opened higher at \$5.05 but was inclined to sag, retreating to \$4.95, and closing five points higher. La Rose was quiet between \$4.95 and par, with little stoc kon offer.

Price changes were narrow in the Standard Stock and Mining Exchange.

Price changes were narrow in the lower priced securities. Nova Scotia, some others were shaded fractionally, but in no case was trading of a sensational nature. Timiskaming maintain ed between 71 and a point higher; Benver was comparatively unchanged from the close of last week; Chambers-Ferland was firm; the other stocks were not heavily traded in and quotations inderwent no material changes.

The market at the close was dull and in some cases heavy. barely held their own thruout the ses-sion, and the only redeeming feature of the day's transactions was the fact that at times the market was bare of stocks on offer. Should this condition continue an upward movement might eastly follow. Meanwhile the dominant

trait promises to be steadiness.

Ore shipments from the Cobalt camp for the week ending last Friday were 693 tons, against 594 tons the week pre-vious. There were 14 mines in the list of consignors, the Cobalt Townsite appearing for the first time. Nipissing was the largest shipper, having sent

Mocatta & Goldsmid, London, Eng., write under date of Nov. 26: China, as usual, has been operating both ways, and there has been some continental buying, but the bulk of the business has been bear covering by Indian operators. In view of the excellent reports of the cotton and other crops in India, this covering by the bears is readily understood, the evidence of this prosthis covering by the bears is readily understood, the evidence of this prosperity being already reflected by the steady reduction each week in the currency returns. Altho this reduction will probably continue, it will be very far from necessitating the Indian Gover: ment to buy silver, but sentimental by the effect will be hardening to the market, and we rather look for a steadiness at about the present level for the next few months.
