through a mill with the rollers so wide apart that the mill can't grind. As a result of this continuous blood and nerve starvation, people become generally weakened, nervous and all run down and frequently develop all sorts of conditions. One is too thin; another is burdened with unhealthy fat; some are so weak they can hardly walk; some think they have dyspepsia, kidney or liver trouble; some can't sleep at night, others are sleepy and tired all day; some fussy and irritable; some skinny and bloodless, but all lack physical power and endurance. In such cases, it is worse than foolishness to take stimulating medicines or narcotic drugs, which only whip up your fagging vital powers for the moment, maybe at the expense of your life later on. No matter what any one tells you, if you are not strong and well you

### Cover That Floor With Linoleum

Linoleum is the most sanitary of all floor coverings. For years it has been recognized as the easiest to keep clean and free from dust. Recent extensive experiments have proven that Linseed Oil (the base of all good linoleum) retains its properties for the destruction of germ life even after it has been manufactured into floor

We call particular attention to our very fine display of Printed and Plain Linoleums in Rugs and Piece

GENUINE LINOLEUM RUGS are showing in beautiful new designs and color effects. They have a soft, velvety finish which renders them even more desirable than carpets for some rooms. Linoleum Rugs will not tear or wrinkle. They lie flat on the floor without tacking—and they have wonderful wearing quali-

# Electricity Is a Servant Of The Home

Recent visits to our electrical booth at the Exhibition went to show many men and women that electricity is actually the most dependable servant of the home. Here are just four demonstrations of that fact':

#### The "Easy" Vacuum Washing Machine

It thoroughly and quickly cleanses without the need of back-breaking manual labor. It is efficient, handy, clean and easy to operate.

#### The "Hoover" Vacuum Suction Sweeper

"It beats—as it sweeps—as it suction cleans." All these three operations are needed in order to thoroughly and effectively clean rugs and carpets. A demonstration of the Hoover will convince you of its superiority.

#### The McClary Electric Range

Cooking by electricity is fast becoming the most popular way. McClary Ranges may be had in various sizes—any one of them will give excellent cooking satisfaction. Think of the convenience of a stove that does away with carrying coal and ashes.

#### The "Emarnay" Sewing Machine

The rotary type of machine is ideal for home and dress making work. The owner of a "Rotary" can accomplish more in a given time than can be done with any other type of machine.

Demonstrations gladly given on request. Household Appliance Dept.—

# Why Pay the Toll Exacted by a Worn-out Range?

You are entitled to the best range that money can procure—one that bakes without spoiling food heats without using up excessive fuel. And turns baking day into a real pleasure. You can effect real savings and end kitchen range troubles by installing once and for all a high class McClary's range—the Kootenay, Canada's leading steel range that is reinforced to resist rust attacks at vital points, or, if you prefer, a cast iron range, the well-known Pandora.

### McClary's Ovens-White Nickeled Inside

Here's the secret of the success that women all over Canada achieve in their bakings in these wonderful ranges. The ovens are constructed of Armco Iron. This metal is famous for its rust-resisting quality and is particularly valuable in an oven because it heats so quickly. In addition the interiors of McClary's ovens are nickeled. This increases the radiating quality of the metal and makes a quick-heating, washable oven that it is a delight to work with

# Kootenay STEEL RANGE

With Enamel-Clad Flues

The distinctive features of this beautiful range is something that cannot be seen from the outside. The vital parts in its construction, the flues and smoke box, which in a steel range are most likely to be attacked by rust or corrosion, are protected by being "enamelclad." This prolongs the life of the range and ensures reliable baking qualities through many years of service.

Supplied with high closet, with enamel back, large directlyheated water reservoir; nickeled base; drop oven door, with cool handle and tested ther-mometer; smooth nickel trimnings and porcelain enamel

The popularity of the Pandora is due not only to its absolute reliability as a baker, but to the fuel economy which is brought about by its distinctive flue system. In the Pandora the fire travel is doubled which ensures against loss of heat up the chimney.
