## BURGLARS CARRIED SAFE INTO CELLAR

Cut Hole in it Four Inches  
Square and Got \$361—The  
Safe Weighs 300 Pounds.

Breaking into the premises of Carlton Catering System tavern, 67 St. Catherine street east Montreal, early on Sunday morning, burglars carried the safe into the cellar, where they cut a hole four inches square through the top of it and secured \$361. They made their escape through a rear door into a yard which was fenced around and the gate locked.

The discovery of the theft was made by Private Constable Paul Collins, who patrols the district for the merchants of the neighborhood, and who had a pass key to enter the yard for the purpose of seeing that the rear doors were locked, and Constable Bedard, of the City Hall avenue station, the patrolmen on the beat. They entered the yard and found the door leading into the cellar wide open, and going into the passageway found that the inner door also had been forced.

Turning on the lights they found that the safe had been pushed as far as the cellar door, where it had been taken down. Lieut. Paquette was notified and sent Sgt. Gaudin to investigate. Investigation made by the police officers showed that the 300-pound safe had been taken down the cellar steps and placed on the cement floor where the burglars had worked on it. Safe contained \$361.

With means of a cold chisel, traces of which could be seen, a hole, four inches square, had been pierced through the double protecting armature of the safe, passing through the day between the two iron sections. The inside of the safe was empty. E. Duplessis, manager of the tavern, was summoned, and he told the officers that there was \$361 in the safe when the place was closed for business on Saturday night. He believed that the job had been done by persons acquainted with the premises.

Investigation made by the officers showed that the rear outside door had been used only as a means of exit as this had been opened from the inside, while the door leading into the cellar from the hallway had been forced. This led the officers to look up a flight of stairs which lead into the Shears Billiard Hall, above the tavern.

The officers found that the door at the top of the stairs was open and,

## Worthy!

IN this day of wonders it is sometimes possible to achieve a temporary popularity for an article which does not really merit it.

But because there can be no permanent place in public esteem for merchandise not truly meritorious, these articles have their fleeting day and vanish.

Not in a day nor for a day has the success of RUBBERSET brushes been erected, but painstakingly throughout every business hour for nearly two score years the makers have labored "for tomorrow"—the tomorrows that have gone and all the countless ones that are to come.

And because they have striven faithfully and well, with heart and hand and mind, RUBBERSET brushes have been, are, and EVER WILL BE the world's standard quality article of their kind, WORTHY in every sense of the name and fame that has accrued to them.

Know them from all others by the trade name RUBBERSET as shown herewith.

looking inside, discovered that it had been opened from the inside as two bolts were pulled back. The detective headquarters were notified and Detective Adelard Laberge and Robillard sent out. They were shown over the ground already covered by the police, and in forming a theory of the burglary, it was decided that the burglars must have

hidden in the billiard room after closing time. The billiard room closes about one o'clock in the morning, and two, or possibly three, men hid themselves until that time. They then pulled back the bolts from inside and going down the stairs landed in the narrow passageway where, hidden from view, and in no

danger of being heard from the yard, they forced the tavern door open. After the successful looting of the safe, they passed through the same door and unlatched the outer door leading into the yard and jumped over the fence.

**HORSE MEAT SERVED.**

Nice Brown Roast for Alberta Legislators.

Edmonton, Nov. 23—Done up in a nice brown roast, horse meat was recently served at a dinner of government members arranged by Hon. George Hoadley, minister of agriculture for Alberta, an advocate of horseflesh as a table delicacy. His colleagues declared it to be delicious, one member refusing to believe it horse meat. He was convinced that it was moose.

Mr. Hoadley believes in direct action, apparently, for he found that the only way to convert the members of the government was to "show them." This he did. He ordered one of his horses on the farm killed and the flesh shipped here and invited the members, including Premier Greenfield, to the dinner. Now Mr. Hoadley is heading on a way to develop the horse meat trade.

**PRESERVED EGGS.**

Ipswich, Eng., Nov. 22—A plant for egg-preservation just completed here is capable of holding more than 1,600,000 eggs.

## PRAISES INDIANS IN THE WORLD WAR

Dr. J. K. Dixon, Back from  
Battlefields, Tells of Their  
Heroic Deeds—150 Decorations  
Received.

American tourists visiting the battlefields of France and Belgium have seen in the cemeteries crosses with strange names, such as Fight the Enemy, Good Bear, Evening Star and Goes North. Beneath these crosses lie the bodies of North American Indians who served with the American forces and laid down their lives in France and Belgium that the white men's civilization should not perish from the earth.

Dr. Joseph K. Dixon, Secretary of the National American Indian Memorial Association, who has just returned to the United States after a three months' trip to the battlefields studying the conduct of the Indians in the World War, gleaned many interesting bits of information about the activities of the red men in the war and tells many tales of their heroic deeds. He says that there are more than seventeen thousand of these peculiarly marked graves and that the records show they were among the bravest of the soldiers who fought for democracy.

"One hundred and fifty American Indians received decorations and two of them were awarded the Croix de Guerre for special bravery," said Dr. Dixon at the Hotel Pennsylvania, where he stops when in New York. "One particular case which I recall was that of Joseph Oshaham, a Chocoma, who, while serving on the Argonne-Meuse front, dashed 200 yards into a violent barrage, breaking his way through entanglements and capturing a machine gun nest. He turned one of the captured guns on the enemy and retained his position for four days, although it was assailed by a constant rain of large projectiles and gas shells. Finally, single handed, he forced the surrender of 171 Germans. For this extraordinary bravery he was cited in orders."

"General Pershing included in his list of the one hundred bravest heroes of the war, Corporal Sevalis, an Indian, who swam the Meuse under heavy machine gun fire, carrying a cable for a pontoon, and later in the day carried another cable over the East Canal under heavy fire from the Germans and brought back to headquarters an exceedingly important message."

Dr. Dixon has spent fifteen years

-and then

studying the Indians and has visited every reservation in the United States. During his recent trip to Europe, he visited twenty-eight sectors of the Western front and made eleven hundred photographs of scenes of the fields of battles in which they took part and the crosses of the graves of those who fell.

**CLOSEBURN CASTLE SOLD.**

At the recent auction sale of the Closeburn Estate at Dumfries, eighteen lots were disposed of, including Closeburn Castle, with the policies and salmon fishing in the River Nith, several

important sheep farms, and a large portion of the timber. Closeburn Castle, one of the most ancient inhabited houses in Scotland, is reputed to be about 800 years old. The thick walls, arched ceilings, and spiral staircases give evidence of its antiquity.

**\$350,000 BAGGAGE.**

London, Nov. 22—Prof. Ralph Soddy, radiologist of Oxford University, was given all the privileges of a king's messenger while traveling from Czechoslovakia to London with a bag containing \$350,000 worth of radium.

18 inches at 28¢ an inch=\$5.04  
That is what the DELTOR  
Saved on this one gown

SHE had always cut her patterns economically, she thought, out of the material each pattern called for. And now to claim that the Deltor could save her money! Of course not! This time she planned to make a street dress. She bought the material her pattern specified and started to lay out her tissues.

Quickly and surely she worked at first, but gradually she slackened. Somehow the pattern refused to fit into her length of material. Like most women who had been making their own clothes for years, she did not realize until experience showed her that

her pattern now called for less material than it could were it not for the Deltor enclosed in the envelope.

She did not know that that half yard which her pattern was seemingly short, represented the money that the Deltor saved—\$5.04 on this one gown.

Then she consulted the Deltor. There she found a series of layout charts, each one worked out for her size, one for each width of suitable material. She followed the Deltor and in ten minutes the pattern was laid. And she was not one inch short! Then and there she learned the value of the Deltor,

## The DELTOR

Saves 50c to \$10 on Materials

THOUSANDS of women who have always made their own clothes are learning that no matter how skilled they are in laying out a pattern, no matter how little material they have used before, Butterick patterns with the Deltor now call for less material than any other patterns can—less than even Butterick patterns could—before the Deltor.

And the Deltor does even more

THROUGH simple picture-and-word illustrations it guides your every stitch in putting your garment together. Through Parisian ideas of finish, the Deltor brings you the

charm you thought could belong only to Paris models—and it saves you 50c to \$10 always.

Go to the Butterick pattern counter

SELECT from the newest Parisian fashions, remembering that the Deltor suggests the correct materials and simplifies the making of the most intricate gown. It saves you 50c to \$10 because it specifies less material than would be possible without the Deltor.

## A Surprise Tonight

If you will try this way to prettier teeth

This test will surprise and delight you. The results are so quick, so pleasing, so conspicuous.

Millions have already made it. The gleaming teeth seen everywhere now show some benefits it brings.

Go get this free tube from any dealer named. Use it and watch the effects. It will open up to you and yours a new era in teeth cleaning.

**Why prettier teeth?**

This method brings whiter, prettier teeth because it fights the film. Your teeth are now covered with a viscous coat. Feel it with your tongue. It clings to teeth, enters crevices and stays.

Old brushing methods do not remove it all. Always remains to make the teeth both dingy and unsafe.

That is why teeth look cloudy. The film-coats absorb stains. Film also causes most tooth troubles. And, under old methods, all those troubles have been constantly increasing.

**How film ruins teeth**

Film dims the teeth's luster. It also forms the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. Many other serious troubles, local and internal, are now traced to them.

Countless people find that teeth brushed daily still discolor and decay. The main reason lies in that film.

**Now we daily fight it**

Dental science, after long research, has found ways to fight that film. Able authorities have proved their efficiency. Now leading dentists everywhere advise their daily use.

These methods are combined in a modern dentifrice called Pepsodent. Millions now employ it, largely by dental advice. The use is fast spreading the world over among those who know.

That is the tooth paste we ask you to try. Watch its effects on the film. See how your teeth improve. Then let your own good sense decide between old methods and the new.

**Three other essentials**

Modern science also requires three other essentials from tooth paste. The old methods did not bring them. Pepsodent brings them all.

## It is Free

To you this week

This 10-Day Tube of Pepsodent. Present the coupon to any dealer named below.

Make this delightful test. Watch the quick effects—see the change in a week. Then you will realize what this new way means to you and yours.

Each use of Pepsodent multiplies the salivary flow. That is Nature's great tooth-protecting agent. It multiplies the starch digestant in the saliva. That is there to digest starch deposits which may otherwise form acids.

It multiplies the alkalinity of the saliva. That is Nature's neutralizer for the acids which cause decay.

Five important effects come from every application. And modern authorities deem all of them essential.

**Not for women only**

The most conspicuous effect is gleaming teeth. Countless women employ it largely on that account. Few things add so much to beauty.

But men also want white teeth. Men who smoke find that teeth discolor quickly, due to stains in the film.

Pepsodent means more than this, however. It means cleaner, safer teeth. Children need it even more than others. Their teeth are easily attacked, and very few escape. Dentists advise that Pepsodent be used every day from the time the first tooth appears.

To all it means a new conception of clean, well-protected teeth.

Present the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear. Watch the other good effects.

This test will prove a delightful revelation. To you and yours it may bring life-long benefits. Every day you wait may mean new damage. Cut out the coupon now. Present it this week.

**10-DAY TUBE FREE**

Present this coupon, with your name and address filled in, to any store named. It is good for a 10-Day Tube of Pepsodent.

Your Name.....  
Address .....

Out-of-town residents should mail this coupon to The Pepsodent Company, 118 Sherbourne St., Toronto, Ont., and the tube will be sent by mail.
