BANDITS GET \$8,000 IN NEW YORK BANK

Daylight Robbery—Six Men Drive
Up In Auto And Make Clean-
up

New York, Sept. 18.—While Police Commissioner Enright was discussing with the heads of the detective bureau today how to rid New York of its latest outbreak of banditry, six armed men robbed the Williamsbridge branch of the Bronx Borough Bank of \$8,000 in cash and escaped in one of the "high-powered automobiles" to which Mayor Hylan recently referred in a homily on the habits and habits of highwaymen.

The latest bandit exploit was peculiarly irritating to the police because of the calm assurance and impudence with which the robbers operated. They rode up to the bank in the "high-powered" car and walked in. Two of them backed three customers up against a wall, two more held off two bank clerks, a fifth covered the paying teller with his revolver and the sixth gathered up all the cash in sight after making a vain attempt to open a vault which contained \$15,000 in bills. Then they stuffed the money in their pockets, strolled out in leisurely fashion and rode away.

The latest crime came in the face of the utmost activity on the part of the police. They had just arrested three men, who are alleged to have confessed they robbed several hotels and were beginning to think the worst might be

Shirriff's ORANGE Marmalade

WHY are Seville oranges brought thousands of miles from Spain to make Shirriff's Marmalade? The reason is that only Seville oranges can give that exquisite flavor so characteristic of true marmalade. Shirriff's has a wealth of zestful tang brought out by many years of specializing on marmalade.

Sold everywhere in glass and large tins.

over. In connection with the hotel hold-ups, an effort is being made to find several women who are believed to have served as weapon-carriers and lookouts. The police suspect the women of having strolled through the hotel lobbies to see that no weapons were concealed there before the robberies were attempted.

Industrial Conference.

Ottawa, Sept. 17.—Minimum wage and the right to organize were before the National Industrial Conference this afternoon and brought some sharp differences of opinion, although manufacturers conceded the justice of a minimum wage for women and minors. Advocacy of a particular policy on the part of labor has, indeed, generally brought strong opposition from the employers.

THE GRAND PRIORY.

The thirty-sixth annual assembly of the Sovereign Grand Priory, Knights Templar, was brought to a close last evening with a theatre party at the Imperial followed by supper at the Royal Gardens. An exemplification of Scottish work was planned for the evening session, but was omitted on account of many of the delegates leaving the city last night. About eighty were present at the theatre and at the supper, which followed eloquent speeches were delivered by Supreme Grand Master A. Shaw, of Kingston, Past Supreme Grand Master C. H. Collins of Toronto, and Colin Campbell of London, Ont. Mrs. W. E. Raymond spoke in response to the toast to the ladies' committee.

IN TEARS AT HEARING

New York Milk Distributor Says
He is Persecuted, Though Losing
Money

New York, Sept. 18.—Asserting that, although his company was losing money at the price at which it was selling milk, he had been made "the victim of pernicious newspapers" and had received many letters threatening his life, Loton Horton, president of the Sheffield Farms Company, broke down while testifying at a hearing held by the Fair Price Committee investigating the high cost of fluid milk.

Bursting into tears and pressing a handkerchief to his eyes, Mr. Horton said sobbingly:

"I have been the victim of pernicious newspapers and Socialistic and Bolshevist issues. I have received many letters threatening my life. The cause of the high price of milk is the sentiment of the people, which is more money and less work."

This dramatic climax to the hearing came after Health Commissioner Cope-land, a member of the committee, had inquired if "the health department's restrictions upon pasteurization of milk had increased the infant mortality rate here," presumably through additional expense reflected in the price to the consumer. The witness sobbed out an answer in the negative.

The committee listened to the testimony of several other large distributors who were unanimous in asserting they were losing money.

THE ROTHESAY SCHOOLS.

With sixty-five pupils attending, the fall term of Netherwood School at Rothestay was commenced yesterday. The attendance is the largest in the school's history. One new member has been added to the teaching staff, Miss Arm-itage of the Froebel Institute, London.

The Rothestay Collegiate school opened on Friday last with eighty-five boys enrolled, the limit of the school's accommodation. G. H. Ryder has been added to the teaching staff as master of English and mathematics. Mrs. White of Ottawa replaces Miss Heath as matron. On Tuesday Col. Snow, cadet instructor, visited the school and formed the cadet corps for the coming year.

The exhibition and fair held in the hall of the Rothestay Consolidated school yesterday by the pupils was a gratifying success and the children were complimented upon the fine display of produce from home plots. Harry McMackin won the greatest number of prizes. Moore's Mills, Charlotte, N. B., won first prize this year in the school garden competition with Rothestay Consolidated next.

BANK OF ENGLAND HOLDS LICENSE TO SELL BEER.

London, Sept. 18.—The Bank of England has the privilege of selling beer. It was granted to the bank in its charter of incorporation under the great seal, dated July 27, 1694. The banks, under the circumstances, could, if it liked, open a public house in Threadneedle street or elsewhere, or could send drays around and peddle beer from door to door without violating any law.

The Blizzard of Klim A Modern Miracle

THE process of making Klim is simple. Anyone can understand from the above diagram how the water is evaporated from liquid separated milk by the "spray process" leaving the solids in a fine dry powder.

If you were to see the drying process in one of our plants, you would immediately think of whirling, fine, clean snow piling up in drifts. You would look through a little window and see the liquid change to dry powder—Klim—before your eyes.

Liquid separated milk is forced by cylinders through tiny pinholes by great pressure, coming out in the form of a cloud or mist, just as from a huge atomizer. This fine spray enters a large square room through which are blowing strong currents of filtered warm air. The spray of liquid is whirled about the room just as you have seen the wind blow snow or fog.

The warm air immediately absorbs the moisture from the spray and the solids settle to the floor in white drifts of Klim. The moisture-laden air passes out through screens which prevent any of the Klim from escaping.

The drying rooms are opened to remove the Klim, which is then packed into the handy blue and white striped tins which you find in Canadian grocery stores.

Klim is just what you need for your camps, or for your trips. For your home, include a one pound tin in your next grocery order.

O-Cedar Polish

the Wonder Polish
for your Motor Car

Why should you let your car deteriorate in appearance. It is so easy to keep an auto body practically like new. It only requires a slight expenditure of money and effort, if you use the right polish.

With the O-Cedar Duster, you can dust your car in a few minutes, every day, and keep it looking bright.

Use O-Cedar Polish in the house as well as in the garage—use it for your furniture, your floors and your linoleum.

O-Cedar Polish is sold in various sized packages, from 25c. to \$3.00. The O-Cedar Duster 75c. You will find O-Cedar Products at any Grocery or Hardware Shop.

Channell Chemical Company, Limited, Toronto.

Good Roads Movement.

London, Sept. 18.—As a result of the great boom in the use of automobiles and motor trucks since the war, the County Councils' Association is organ-

izing a Roads and Transport Congress and Exhibition to arouse action in the movement for better highways. The Congress and Exhibition will be held at the Royal Agricultural Hall, London, during the week of November 20 to 27.

BATTLEFIELD GHOULS REAP RICH PROFITS IN FRANCE

Paris, Sept. 18.—Officials are taking steps to end the rich profiteering of battlefield ghouls in the war torn regions of France. These profiteers, working at night for fabulous fees, have been removing bodies from the battlefields and reburied them elsewhere at the direction of relatives of the deceased. The unscrupulous men engaged in the business have been disinterring bodies without taking the trouble to identify them, thereby deceiving the families and disturbing the last resting place of another man.

One of the profiteers arrested by the authorities at Lyons charged from \$600 to \$800 for each disinterment.

I. O. D. E. ACTIVITIES.

The Royal Arms Chapter, I. O. D. E., held its first meeting of the season yesterday at the home of the regent, Mrs. T. H. Carter. To the Municipal chapter a sum of \$10 was voted and the matter of a child welfare nurse was discussed. It was decided to assist the Navy League in their celebration on Trafalgar Day.

A delightful tea was given by Royal Standard chapter in the Sign of the Lantern yesterday in honor of Mrs. Frederick McNeil, who has resigned from the chapter. The presentation of a pin was made by Mrs. J. J. Pope Barnes. Mrs. James H. Frink presided over the tea table.

From a standpoint of Music, Mechanics Construction and Design the Pathephone is supreme

DOLLAR for dollar, you obtain more sound enjoyment and solid satisfaction out of a Pathephone than is possible out of any other musical instrument, and, in addition, the Pathephone, unlike most other phonographs, is a beautiful and correct piece of furniture. Remember that every

plays all records, and plays them best, because of its wonderful all-wood tone chamber—because of its perfect tone-control device—because of its smooth, silent, powerful, long-running motor—because of its marvellously efficient and exclusive Pathe sound-box. Best of all, of course, it plays Pathe records—because with these you may utilize the Pathe sapphire ball—by which scientific tests have proved forty per cent. more tone color is derived than from any other method of reproducing, and without in any way injuring the records. Four popular Pathe designs are shown herewith.

TYPE "A"	TYPE "C"	"GEORGIAN"	TYPE "B"
In mahogany or oak. A genuine Pathephone in a small compass. Plays all records.	Made in mahogany, fumed oak, or American walnut. Simple and chaste in design. Plays all records.	A true Period design, of exquisite finish, in mahogany, fumed oak, or American walnut. Plays all records.	Another compact model, in mahogany or fumed oak. Plays all records.
\$70.00	\$132.00	\$225.00	\$98.00

Most Pathe Dealers are prepared to offer exceptionally easy terms of payment if you so desire. For complete Pathe catalogue—full of interesting data regarding "Pathe" Furniture—address:

THIN, NERVOUS FOLKS SHOULD TAKES BITRO- PHOSPHATE

Women Need it to Bring Pink Glow of Health to Pale Cheeks and Forestall Tell-Tale Lines of Age. Men Need it to Make Strong, Vigorous Bodies and Steady Nerves.

Weak, thin people—men or women—are nearly always nervous wrecks; thus conclusively proving that thinness, weakness, debility and neurasthenia are almost invariably due to nerve starvation. Feed your nerves and all these symptoms due to nerve starvation will disappear.

Eminent specialists state that one of the best things for the nerves is an organic phosphate known among druggists as Bitro-Phosphate, a five-grain tablet of which should be taken with each meal. Being a genuine nerve builder and not a stimulant or habit-forming drug, Bitro-Phosphate can be safely taken by the weakest and most delicate sufferer, and the results following its use are often simply astonishing.

By strengthening the nerves, weak, tired people regain energy and vigor; thinness and angularity give way to plumpness and curves; sleep returns to the sleepless; confidence and cheerfulness replace debility and gloom; dull eyes become bright, and pale, sunken cheeks regain the pink glow of health. It is sold by the Ross Drug Co. in St. John and all good druggists.

CAUTION—Bitro-Phosphate, the use of which is inexpensive, also wonderfully promotes the assimilation of food, so much so, that many people report marked gains of weight in a few weeks. Those taking it who do not desire to put on flesh, should use extra care in avoiding fat producing foods.
