In this lies his power to-day. The party in this lies his power to day. The party in this lies his power to day. The party in this lies his power to day. The party in this lies his power to day. The party in this lies his power to day. The party in this lies his power to day. The party in the grant of the wind to the accomplishment of all measures which his county demanded, no same man can deny. That he is bigoted in his boleth of party has ever swerved him in dot to take they have always received justice at that which was accorded to his own party. In this lies his power to-day. The party is devoted his mind to the accomplishment of all measures which his county demanded, no same man can deny. That he is bigoted in his boleth of party has ever swerved him boleth of party has ever swerved him in additionally devoted his mind to the accomplishment of all measures which has they have always received justice at the were then put on each side of the turn mace to enable the plate to be drawn out the more readily; but the flames set devour them as if mere shavings.

There was no time to lose, the order was justice at the with they have a was given, and machinery began to devour them as if mere shavings.

There was no time to neach side of the turn mace to enable the plate to be drawn out the more readily; but the flames seized upo to-day, thanks to his untiring energy, stands in the same position as if she was not represented by an opposition member; and Northumberland has cause to be grateful that she placed Mr. Mitchell in a position to do what he has already done in Northumberland. Had they chosen a man who adid not possess the same determination of mind; the same high sense of the normal stands of the same high sense of the normal stands.

TREBOR.

Is it right that 'Lent was done, made its appearance. Fierce as had been the heat before, it was now ten times greater. One could hardly look upon the plate, white with heat, over and around which little blue flames appeared to be lingering. Slowly it fell upon the trolly, the tongs were then removed, and in a moment or two the rolls, which had ing.

been revolving for a while, caught the end of the plate; and the huge mass, Experiment was lately made at the forwards it came six or seven times, great works of Charles Cammell & each time the distance between the
