STRENGTH FOR THE DAY'S WORK

DEPENDS UPON GOOD BLOOD TO NOURISH THE BODY

Weak People Need a Tonic, One Which Acts Directly Upon the Blood and that does Not Weaken the Body by Useless Purging.

There are thousands of people throughout Canada who are without ambition or strength to do their day's work, and who are always tired out, have but little appetite and a poor digestion. They cannot get a refreshing night's sleep and are subject to headaches, backaches and nervousness, because their blood is impure. To men and women in this condition Dr. Williams' Pink Pills give quick relief and permanent cure, because of their direct action on the blood which they build up to its normal strength. As the blood becomes rich and red it strengthens the muscles, tones up the nerves, makes the stomach capable of digesting food, and repairs the wastes caused by worry or work. In a word, the use of Dr. Williams' Pink Pills means restoration to perfect health.

BLOOD TURNED TO WATER

Miss Jessie McLean, Trenton, N.S., says:—"I was as weak as it was possible for any one to be, and yet be able to go about. My blood seemed to have turned almost to water. I was pale, the least exertion would leave me breathless, and when I went up stairs I would have to stop and rest on the way. I often had severe headaches, and at times my heart would palpitate alarmingly. A good friend urged me to try Dr. Williams' Pink Pills, and I have reason to be grateful that I took the advice. Soon after beginning the use of the Pills I began to get stronger, and by the time I had taken seven boxes I felt that I was again enjoying good health. I think Dr. Williams' Pink Pills are a blessing to weak girls and I shall always warmly recommend them."

RHEUMATIC PAINS

The sufferer from rheumatism who experiments with outward applications is only wasting valuable time and good money in depending upon such treatment, the trouble still remains, and is all the time becoming more firmly rooted—harder to cure when the proper treatment is applied. Treat this disease through the blood and you will soon be rid of the pains and tortures. As a cure for rheumatism Dr. Williams' Pink Pills are unequalled. They act directly on the impure, weak blood; they purify and strengthen it, and so root out the cause of rheumatism. Mr. D. Lewis, postmaster at Eschminac, N.B., says:—"I was attacked with rheumatism, which settled in my elbow, shoulder and knee joints, and at times caused me great suffering. The trouble was particularly severe last spring and I decided to try Dr. Williams' Pink Pills. After taking the Pills for some time the rheumatic pains and stiffness in the joints disappeared and I have not had any return of the trouble."

A GOOD DIGESTION

Mrs. William Dale, Midland, Ont., says:—"I suffered for a long time from a severe form of indigestion, and had doctored so much without benefit that I had all but given up hope of getting better. Everything I ate caused me

HOW WEEDS ARE SPREAD

In his struggle against weeds, a farmer is more likely to be successful in his efforts if he understands clearly how weeds gain an entrance on to the farm in the first instance and how these already there spread from one part of the farm to another. Weeds may gain entrance to the farm or be dispersed over a wider area in one of the following ways:—

(1) As impurities in the seed sown. Most samples of agricultural seeds contain weed seeds in greater or less amount, which are sown with the useful seeds and thus the weeds may, quite unknown to the farmer, gain an entrance on to his land. The seed sown should be absolutely free from weeds of all kinds—a condition of things which is seldom realized.

(2) By the agency of threshing machines. The threshing machine should be thoroughly cleaned before it is allowed to begin operations on the farm.

(3) In stables manure, and feeding stuffs. Hay and feeding stuffs often contain weed seeds, some of which are liable to find their way into the manure heap and eventually on to the land. Some seeds can pass through the bodies of animals and afterwards germinate.

(4) By the action of the wind. Many seeds, such as those of Dandelion and Thistle, are furnished with a tuft of hairs which enables them to float in the air for long distances. In other cases the seeds or even the whole plant may be blown over the frozen surface of the snow.

(5) By the agency of animals. The seeds, or those parts of plants which contain the seeds, as in the case of Blue Bur and Burdock, are provided with hooks by means of which they become attached to the wool of sheep or the clothing of workers on the farm and in this way may be carried into fields where formerly they did not exist.

(6) By cultivation. In some plants, especially those with creeping underground stems, such as Quack grass, the broken pieces may be carried all over the field by farm implements and thus dispersed over a much wider area than the parent plant originally occupied.

intense pain and some days I did not touch a thing but a cup of cold water and even that distressed me. As a result I was very much run down, and slept so poorly that I dreaded night coming on. I was continually taking medicine, but was actually growing weaker instead of better. Having often read the cures made by Dr. Williams' Pink Pills, I finally decided to give them a trial. I have had great cause to bless this decision, for by the time I had used a couple of boxes there was no doubt the pills were helping me, and in less time than I had anticipated the pills had cured me, and I was again enjoying not only good digestion, but better health in every way than before."

ALWAYS FEELS FIT

The wonderful success of Dr. Williams' Pink Pills is due to the fact that they go right to the root of the disease in the blood, and by making the fluid rich and red strengthen every organ and every nerve, thus driving out disease and pain, and making weak, despondent people bright, active and strong. Mr. W. T. Johnson, one of the best known and most highly esteemed men in Lunenburg County, N.S., says:—"I am a Provincial Land Surveyor, and am exposed the greater part of the year to very hard work travelling through the forests by day and camping out by night, and I find the only thing that will keep me up to the mark is Dr. Williams' Pink Pills. When I leave home for a trip in the woods I am as interested in having my supply of pills as provisions, and on such occasions I take them regularly. The result is I am always fit, I never take cold, and can digest all kinds of food such as we have to put up with hastily cooked in the woods. Having proved the value of Dr. Williams' Pink Pills as a tonic and health builder, I am never without them and I lose no opportunity in recommending them to weak people I meet."

SKIN TROUBLE CURED

Mrs. W. Ritchie, Parkburg, Sask., says:—"Two years ago I was attacked with eczema on my hands. I tried almost everything that was advised, but as the trouble was growing worse I consulted a doctor and took his treatment for some time with no better results. By this time my hands were a mass of sores and I began to despair of finding a cure. A friend strongly advised me to try Dr. Williams' Pink Pills, and I decided to do so. After using two boxes I could see an improvement and I got a further supply. I used altogether eight boxes, by which time every trace of the eczema had disappeared and there has been not a single symptom of the trouble since that time. I gladly recommend Dr. Williams' Pink Pills for troubles of this kind."

Dr. Williams' Pink Pills should be kept in every home and their occasional use will keep the blood pure and ward off illness. You can get these pills through any medicine dealer or by mail at 50c a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Beans the Vegetable meat

Beans might be called the vegetable meat plant because they make a good substitute for part of the meat in the diet, says to-day's bulletin from the National War Garden Commission of Washington. There are all kinds of beans, some grow short, some grow tall, some are shelled green to eat, some are ripened and others are cooked green in their jackets, such as bush or snap beans.

As the ground warms up get it in condition and lay off rows 20 to 24 inches apart for hand cultivation and 30 inches or more for horse cultivation. Drop the seeds three to four inches apart and cover one inch deep. When the plants are three inches high thin to about six inches apart. If hills are desired drop three to four beans together every 12 to 15 inches and thin to two plants per hill. Make planting every two to three weeks, so as to have young tender beans all season. This is for bush or snap beans.

Give beans good cultivation, but do not cultivate or hoe them when the plants are wet with dew or rain, because if any disease is present it spreads on wet plants.

For pole beans make the rows four feet apart and have the hills three to four feet apart. Plant four seeds in each hill and later thin to two plants. Set a pole five to six feet long at each hill for support or plant pole beans near the garden fence, so it may be used as a support.

It Must Have Been

"Is this a fast train?" asked the traveller of the conductor. "Of course, it is," was the reply. "I thought it was. Would you mind my getting out to see what it is fast to?" —Pearson's Weekly.

A preparation for restoring color to gray or faded hair, for removing dandruff and as a hairdresser. Is not a dye. Generous sized bottles at all dealers, ready to use. Philo Ray Co., Newark, N. J.

STRONG FOR CIVILIZED GARB

Sartorial Variety Seems to Be Chief Aim of Natives of Villages of Rhodesia.

Although we have not thought the people of Africa to be much concerned about clothes and fashions, yet styles, such as they are, have entered the villages of the dark continent and are beginning to cause the people much anxiety. Miss Pearl Mulliken, Methodist missionary to Rhodesia, writes of the African dress as seen in a day school, according to the Centenary Bulletin.

"Many of the pupils, who range from the kindergarten age to grandparents, are dressed in store clothes. Their store clothes, however, have largely lost their identity beneath a covering of many colored patches. Weather has nothing to do with clothes in this part of Africa. It may be a real summer day and you are wondering how you can keep cool, but not so these boys who have been to town to work and have clothes to exhibit to their less fortunate brothers. If these riches he is sure to have it on and perhaps a bath towel around his neck, while most of the small boys are content with a yard of unbleached cotton for their entire outfit. But sometimes the big boys are quite generous with their little brothers and divide with them; such is the case of one little fellow who is the proud possessor of a vest which about covers him. Two or three others wear their big brother's shirts, which is quite sufficient for all purposes."

"Some of the girls are dressed principally in beads, brass bracelets and anklets; while others have cloth draped around them forming a skirt and they are without a waist. One girl wears a pink silk waist with a dirty calico skirt. They often appear in evening dresses, the cast-off finery of the town women, and they may be seen digging in their gardens with these on. One came to school draped in a white bedspread."

Styles in names changing as well as in clothing. The following are some of the names which the African mothers have given their children: Spoon, Sauceman, Hotel, Pumpkin, Gingerbeer, Cigarette, Shilling, Sixpence, Penny, Coffee, Sweet Pudding, Very Nice, Office, Tomato, Fifteen, Vinegar, Sugar.

Uncle Sam Beneficiary.

Members of the American Flint Glass Workers' union, assembled in Memorial hall, Toledo, were told an inspiring story of patriotic devotion by a member of their union at the unfurling of a service flag, with 866 stars, representing union men in the army. After an introductory speech, in which John J. Quinn, business agent of the Toledo Central Labor union, told of the determination of the unions to back the government, President William P. Clarke described the heroic death of Charles H. McCarthy, who sacrificed his own life in France for the sake of a friend.

Not only had McCarthy, a former member of the Glass Workers' union, died heroically, but he had lived patriotically, Mr. Clarke said, for in taking out \$10,000 insurance when he entered the army, he asked that the sum be made payable to the United States government.

Saving Man-Power.

One of the recent devices designed to save man labor is the slab-handling storage battery truck, which is employed at the plant of a steel company in Cleveland to haul heavy pieces of steel from the storage yard to the heating furnaces, says Popular Science Monthly. The distance approximates 500 feet. Before electricity was substituted for man-power the slabs were loaded "on hand trucks."

The new truck is similar to the elevating platform truck, except that for its elevating mechanism a tilting platform is provided. This platform is secured to the rear axle by a pivot, being operated by a horizontal ram. By manipulating the ram the platform is moved toward a vertical position and its front edges are lowered.

Gentle Germans Quite Insulted.

Mr. E. J. Riggs writes this short but pointed letter to the New York Sun about German squealing: "On reading in the Sun that German newspapers are indignant because American soldiers are using shotguns, I was reminded of a 'card shark' in Leadville in '79. He had held out a big hand for a killing and had it stuck in the top of his boot. Finally he got his bank roll into a big pot and reached for his holdout to switch in, but found it gone. 'Hold on!' he yelled; 'I ain't going to play in this game—there's cheating going on.'"

Looking Far Ahead.

A wife, whose husband is on active service, recently presented him with a bouncing baby boy. She wrote to ask him when he should get leave, and also when the war would be over. His reply was as follows: "Dear Lucy—I don't know when I shall get leave or when the war will be over, but if the baby should be called up before I get leave, give him a parcel to bring out to me.—Your loving husband, Bill."—London Tit-Bits.

The Clever Japs.

Japanese manufacturers of electrical apparatus are planning to show their independence of Germany as a source of electric locomotives. Four locomotives are to be built for the Usui electrification as a start.

"SALADA"

Is the Purest & Finest Flavored Tea your money can purchase.

What Happened to the Governor?

The Governor of a Western state, determined not to be interrupted by so many callers, instructed his negro doorman to say to all callers that "the Governor is not in."

"But if they say they have an appointment with you, Governor?" asked the doorman.

Just say, "They all say that," ordered the Governor.

All went well until the next day, when a lady called, and when she was told that the Governor was not in she replied:

"I know better than that. You tell the Governor his wife is here to take him to the theatre."

"Oh," said the doorman, "They all say that."—The Elevator Constructor.

A Good One

A sportsman of great imaginative gift was telling how at one shot he had bagged two partridges and a rabbit. His explanation was that though he had hit only one partridge, the bird in falling had clutched at another partridge and brought that to earth entangled in its claws.

"But how about the rabbit?" he was asked.

"Oh," was the calm reply, "my gun kicked and knocked me backwards and I fell on the rabbit as it ran past."

CHOICE SEED CORN

This is especially cured for seeding purposes, and is the nicest Seed I have ever seen. Germination test from 95 to 100 p.c.

Be sure you get some of this before it is all gone.
