

tants, nurses, and patient for operations, both abdominal and vaginal; the best and most reliable methods of preparation and disinfection of sponges, ligatures, sutures, and instruments. In fact, the success of modern gynecological surgery rests on the adoption of the principles and details described in this chapter, which has been brought fully up to date.

Another chapter deserving special mention is the one on Pelvic Inflammation, which is considered from an entirely different standpoint from that found in the older text-books. The subject is covered in a thoroughly practical manner. The pathology and etiology are clearly pointed out, the result described, and the management and treatment in all places considered in detail. The old and confusing nomenclature and pathology have been dropped, and the data given from facts as found to-day, instead of from theory and tradition. Salpingitis, pyosalpinx, hydrosalpinx, hematosalpinx, pelvic peritonitis, and pelvic cellulitis are also included under this chapter-heading.

There are many other chapters in which important subjects are treated in a manner not usual in the text-book, so that the work is of special value to the practitioner. Much of the teaching in the older text-books will have to be untaught in the light of modern knowledge, but in this work such is not the case. If anything, in a few cases the treatment is a little ahead of the times, being rather more rigorous than is always warranted. But on the whole the views expressed are those held by the leaders of gynecological teaching in the United States. Considering the number of illustrations, the cost of the work is surprisingly moderate.

#### ESSENTIALS OF PRACTICE OF MEDICINE.

Arranged in the form of questions and answers. Prepared especially for students of medicine. By Henry Morris, M.D., late Demonstrator Jefferson Medical College, Philadelphia; Visiting Physician to St. Joseph's Hospital; Fellow College of Physicians, Philadelphia; co-editor Biddle's *Materia Medica*, author of *Essentials of Materia Medica*, etc, etc. With a very complete Appendix on the examination of Urine, by Lawrence Wolff, M.D., Demonstrator of Chemistry, Jefferson Medical College. Colored (Vogel) urine scale and numerous illustrations. Third edition, revised and enlarged by some three hundred essential formulæ, selected from the writings of the most eminent authorities of the medical profession. Collected and arranged by William M. Powell, M.D., Attending Physician to the Mercer House for Invalid Women at Atlantic City, N. J. Philadel-

phia: W. B. Saunders, 925 Walnut Street. 1894. Price \$2.00.

The fact that this small Manual of the Practice of Medicine should have passed three editions since its issue in the latter part of 1890 is sufficient guarantee of its popularity, and that the Author's plans have not miscarried.

Great care has been exercised in the revision not to increase its size, and thus rob it of its usefulness to the student, who has but little time for large and exhaustive works. All obsolete and useless matter has been omitted, and the very latest physical diagnosis and treatment substituted, thus bringing the work thoroughly abreast with the times.

## PAMPHLETS.

THE AFTER-TREATMENT OF CELIOTOMY CASES, WITH SPECIAL REFERENCE TO SHOCK AND SEPTIC PERITONITIS. By Eugene Boise, M.D., Grands Rapids, Mich., Gynecologist to St. Mark's Hospital; Fellow of the American Association of Obstetricians and Gynecologists.

CARCINOMA OF THE UTERUS. By J. M. Baldy, M.D., Professor of Gynecology in the Philadelphia Polyclinic; Surgeon to the Gyneccean Hospital. Reprinted from the Proceedings of the Medical Society of the State of Pennsylvania, May, 1893.

THE SURGERY OF THE URETERS; A CLINICAL, LITERARY AND EXPERIMENTAL RESEARCH. Read in the Section on Surgery and Anatomy at Forty-fourth Annual Meeting of the American Medical Association, June 8, 1893, by Weller Van Hook, A.B., M.D., Professor of Surgery in the Chicago Post-Graduate Medical School.

A CASE OF MEDIASTINO-PERICARDITIS IN A CHILD; SECONDARY EMPYEMA; OPERATION; DEATH. By William A. Edwards, M.D., San Diego, California, Fellow of the College of Physicians of Philadelphia, American Pediatric and Philadelphia Pathological Societies; formerly Instructor in Clinical Medicine and Physician to the Medical Dispensary in the University of Pennsylvania; Physician to St. Joseph's Hospital; Associate Pathologist to the Philadelphia Hospital; and Member Advisory Council for the Section on Diseases of Children of the Pan-American Medical Congress. Reprinted from the *International Medical Magazine* for June, 1893.
