## The Deans Pronounce

**Science:**

During the second world war this University received, tested and processed blood for Canada's armed forces from dozens of donor centers in New Brunswick and Prince Edward Island. Well over 75,000 pints of blood were passed through our laboratories and, in the form of plasma, eventually found their way to all theatres of war where Canadians were serving.

From this wartime effort the present collection of blood for peace-time uses has been a natural outgrowth. It enables our hospitals to maintain adequate supplies of whole blood and plasma against the many needs of modern surgery and medical treatment and, importantly, at no direct cost to the patient.

It is natural and proper that students of the University of New Brunswick should support the donor clinics which from time to time are held on our campus, by freely offering their blood.

**C. W. Argue,**  
Dean of Science

☆ ☆ ☆

**Arts:**

The time has again come around for the visit of the Red Cross Blood Donor Clinic to the University of New Brunswick.

As we all know this is a most worthy undertaking since human lives may depend upon a good response on the part of all concerned. It is hoped that the stu-

dents will co-operate fully with the Red Cross, and that the University will make the best response this year it has ever made.

**A. G. Bailey**  
Dean of Arts

☆ ☆ ☆

**Law:**

The Blood Donor Clinic is to receive donations of blood at the Lady Beaverbrook Gymnasium next Tuesday and Wednesday. I urge students of the Law Faculty to co-operate with the Red Cross in this vital undertaking.

**William F. Ryan**  
Dean

☆ ☆ ☆

**Engineering:**

Through its Blood Donor Service, the Canadian Red Cross Society provides each of us with a unique opportunity to render invaluable and literally life-saving assistance to other persons. Great quantities of fresh human blood are required by modern techniques in the treatment of both accident and routine cases. This blood is a commodity which cannot be bought, because it can be manufactured only by the human body; therefore, it must be offered and given by those in good health if medical practice is to have its maximum effect in saving lives.

The gift of a small quantity of blood has no effect whatever on an average healthy person, and it represents the most personalized assistance that anyone can

## RED BLEEDERS GO FOR TITLE

The Corpuscle Cup, prize of the Canadian Intercollegiate Blood Donor Champions, is awarded annually to the university with the best percentage during their fall clinic.

After winning the trophy in 1953 and 1954, Mount A again won it last year. This year an effort is being launched to bring the National Championship to our University. UNB is organizing a team.

The Red Devils, Red Bombers, Red Raiders and our other "Red" teams have all won great glory for our school. This year the "RED BLEEDERS" are expected to be the largest team. In order for this squad to win the National Championship they need more people to turn out.

You too can play for the "Bleeders". Tryouts will be held in the gym today and tomorrow. In 1952 UNB came second in Canada. With you playing on the team, we should come first this year.

**B. L. JEWETT, M.D.**  
FREDERICTON, N.B.

"The donation of blood by a healthy individual is in no way deleterious, and has no ill effect on the health. This priceless life-giving gift is yours to give."

offer to another person.

I am glad to wholeheartedly endorse the Red Cross appeal for donors and trust that students in the Faculty of Engineering will demonstrate their appreciation of the value of this truly humanitarian service by turning out in very large numbers at the forthcoming Blood Donor Clinic.

**J. O. Dineen,**  
Dean of Engineering

☆ ☆ ☆

**Forestry:**

During the blood donor campaign being conducted this week by the student committee under the Pre-Medical Group at the University, I would like to urge that all Foresters who can, contribute. The blood bank that results from this campaign is extremely useful in not only surgical cases but all cases caused by accident. As foresters, all of you realize the danger of accidents in woods operations and the value of the blood donor service to help those unfortunate enough to meet with one.

It is hoped that the foresters will continue the good work that they have done in the past in contributing to this worthwhile service.

**J. Miles Gibson,**  
Dean of Forestry

## Remember . . . It Won't Hurt . . .

If you have not given blood before because you are not sure just what will happen, we assure you IT WON'T HURT.

This is what happens when you go to give blood. At the Lady Beaverbrook Gym:

1. You receive a FREE coke while you are waiting to register.
2. You register and get your blood type classification.
3. You are taken to a bed by a Red Cross nurse. Minutes later, after donating your pint of blood you are taken to a rest bed, where you remain for ten minutes.

Afterwards, you may go to the Gym kitchen and be served free coffee and cookies by the university co-eds.

### The Rules . . .

You are eligible to give blood if you are over 18 years of age and your general health is good. If for any good reason you are unable to donate your blood PLEASE go down to the gym and register. Your name will be counted in as a donor and hence you can aid in increasing the percentage of donors giving.

## Sigma Lambda Beta Rho

By the "Jones Boys"

### CANADA'S ODDEST STUDENT PUBLICATION

Oh! The Jones Boys  
Blood, glorious blood  
They fell with a thud  
They had no spoon for the gore on the door  
And they had no glass for the blood on the floor.  
Why do this to me God?

The Jones Boys have given blood. Why don't you? Just this once, as the Japanese suicide pilots used to say.

Actually we gave blood in the days when vampires did the draining. It was quite a day. Socrates Jones didn't have any blood in his alcohol stream, the vampires got drunk and flaked out. When it was Aristotle's turn, the vampires tried to get revenge by operating on his stone. Being evil, they hadn't read the Bible. They didn't know they couldn't get blood out of a stone. Thadeus Q., being an aristocratic, they refused his blue blood. But they got Methusaleh. Methusaleh was the fourth Jones Boy. He was only pint-sized anyway and when they took a pint of his blood there was nothing the other Boys could do . . . other than carve R.I.P. on his gravestone.

Most of us survived so don't be cowards, students. The murderous grin on the face of the woman with the long knife is only a happy smile. Be bold and resolute. Soon you'll be bloody as well.

Seriously, remember. The applejack jar full of YOUR blood can mean LIFE for hundreds of thirsty Asian vampires.

P.S.—And please note the third point above this column. YOU are taken to bed by a Red Cross nurse.

## ATTENTION SENIOR GRADUATES YEARBOOK PHOTOS

Any member of the Senior Class may have portrait sittings made at HARVEY STUDIOS

- \* Six Proofs from which to choose
- \* All proofs ready the day following sitting
- \* We give you FREE one retouched glossy photo for the Yearbook
- \* Special Student Prices
