

Though I understand it is not proposed to deal only with properties in that vicinity but throughout the whole of British Columbia. I hear the Company has in its employ very good & reliable mining experts, and it has occurred to me that Mr. Payne ^(I hear he goes to Canada this month) might be approached & given particulars of our Company as it might be worth his Company's while to allow their experts to thoroughly examine our properties with a view to purchase if they turned out satisfactory.

Of course ~~we~~ presume he would require a bond on them at a price at which we would sell before he took the trouble to send his experts there. If anything could be worked with Mr. Payne on these lines I think it would be well as even if the worst comes to the worst & our properties prove to be worthless we shall not be tempted to spend more money on them --
