LOW DOWN

Massey-Harris Spreader

WIDE SPREAD

Here is a Spreader that is low down, but not too low—plenty of clearance under the Frame.

It is a Wide-Spread Machine—spreading full seven feet wide although the Box measures only 3 1/2 feet.

Ample strength is secured by making the Frame of Steel—heavy 4-inch Channel Side Sills with Steel Cross Sills, forming the strongest Frame ever put on a Spreader.

The Simple Chain Drive does away with all Cogs, Clutches, and Springs, and when out of gear no parts of the machine are running to cause wear.

The Upper Beater is in two sections, set at an angle to spread the load out beyond the Wheels.

The Simple, Direct Drive—the Divided Beater and small size of same—the taper shape of the Bed—the Broad-Faced Wheels—the careful fitting of all parts—these combine to secure light draft.

A Disc Drill with Steel Boots

The Steel Boots are an Exclusive **MASSEY-HARRIS FEATURE**

They are light enough to make shallow seeding possible in light soils, yet by means of the Pressure Springs they can be made to enter hard soil to any required depth.

In strength they are superior to the usual Cast-Iron Boot, the lower part is separate from the balance and if worn from use in sand or gritty soil, can be easily and cheaply replaced.

Reliable Spring-Tooth Cultivator

This Cultivator is a great weed killer and thoroughly pulverizes the soil, making it an easy matter for the hair-like roots of the growing plants to get through and increasing the amount of surface on which the plant can feed, at the same time giving the soil a greater capacity for holding moisture and reducing the loss by evaporation.

High Yielding SEED CORN

Grown and offered by
ESSEX COUNTY SEED FARMS, LIMITED

This farm consisting of 1,000 acres was purchased some years ago for the exclusive purpose of producing High-Yielding Seed. Our motto, "Larger yields for the farm." We have not only given our customers corn that will yield, but seed that will grow, and will grow a strong, rugged plant. The location of our farm ensures, even in unfavorable years like 1915, early maturity. Our seed is mature when harvested. It is cured in drying houses light exclusively for the purpose. It is tested before shipment. Our literature is free. Write for circular.
