

WANTED

John Bull is just now interested in the "Man With the Whiskers."—Omaha World-Herald.

A shipment of 200,000 Missouri chickens has been made to Hawaii.

The Kaiser has offered to paint some pictures for Queen Victoria.

The Misses women who married the lawyer who had won her suit for her probably thought she might just as well turn everything over to him in a lump.

Susan B. Anthony should lose no time in making a campaign in Cuba in the interest of women's rights.

The remains of Nero, it is claimed, have been discovered in the state of petrification.

In a Chicago dry goods establishment clerks are discharged if they marry.

In view of the fact that quite a number of ladies of experience are going to play Hamlet this fall, why don't they recast the chief character and call it "The Melancholy Dame?"

They seem to be running short of sherry in the French chateau.

French scientist says that he has made a discovery "by means of which the men of the most advanced science are accelerated by an application of electricity."

Orchard and Garden. Any land that will grow a good crop of apples is worth the price of the orchard.

Apple and pear trees are all right for planting when two or three years old from the root graft.

Next season Rose Coghlan may star in "The White Hen" at the Grand Opera.

William will be starred next season in "The Children of Israel" at the Grand Opera.

Clarence Fleming, who successfully managed the "Children of Israel" at the Grand Opera, has undertaken the management of Harry Corson Clarke's touring troupe.

Some of the princess dresses of the season will be made of rich brocade or figured tulle satin.

The silk net gowns worn this summer will be made of pure silk and tulle.

Many of the French gingham gowns are almost as sheer as silk, and the color is as beautiful as that of tulle.

The prettiest decorative waists that have appeared since the days of the "Children of Israel" are those of tulle and silk.

A new chain for a lady's watch resembles a double vert chain attached to a handsome brooch.

A striking ring for a man shows a square stone in one large orange diamond in the center surrounded with 12 smaller white stones.

Quite a noteworthy increase in size is made in some lines of handsome brooches which are much larger than the prevailing average round brooch.

AMONG THE MOUNTAINS.

A Young Athlete Writes His Observations on the Grand Old Mountain of Western Canada.

Grand Forks, B. C., Sept. 23. Editor Reporter—

Dear Sir,—Thinking that perhaps some of my old friends in and around Athens who are readers of the Reporter would appreciate a few lines concerning this little corner of our great British Empire, I decided to write you accordingly.

Some of those who wish to write them may have felt disappointed in not getting any word from me, and these I would ask to accept this with my humble plea of having been altogether too busy to meet all my little obligations.

A short description of our town and surroundings might be in order here. Grand Forks is situated in a depression of perhaps one thousand feet, lying at the junction of the North Fork with the main Kettle river, about two miles from the boundary, being now the chief distributing centre for the whole country.

It is almost entirely surrounded by mountains. These hills are rich in minerals—iron, copper, silver, and gold. Mines are being rapidly opened up in all directions, and, although no mineral has yet been mined, yet there are thousands of tons of rich ore on the dump, waiting the completion of railroad spurs to the mines, and for the smelters, one of which will be ready for operation next spring.

Grand Forks, with a population of 1,500, exclusive of an additional floating population of four or five hundred, is at present only in its infancy, and though its growth is rapid it is also substantial.

Last week, among the many new buildings started, the foundation was laid for a fine brick bank building of the Merchants' Bank of Halifax, which branch has been doing business here for some time.

We also have a branch of the Eastern Townships Bank. Electric lights and water are in operation. We can boast of an excellent base-ball team, though lawn tennis seems to be the favorite game with those for us to indulge.

Although the people here are essentially a mining people, yet agriculture is by no means neglected, and as the acreage of tillable land is small and the people have to be fed largely on preserved, cured, and canned staples, the farmer here is always sure of a good price for any fresh article he can put on the market.

Wages range from \$2.00 per day in a logging camp to \$3.50 per day for all practical tradesmen.

Girls and women get \$2.50 per day and board, cooking in restaurants, and about \$1.00 per month and board as housekeeper in a bachelor's private residence, with excellent chances of a permanent situation.

One fruitful source of profit to both rich and poor in this country is the opportunity for dealing in mining stocks. Some day a poor prospector discovers a rich deposit of mineral ore.

He develops it, and as far as his resources will allow, he turns it over to two or three men who form a company. This company, in order to get money to further develop the prospect, "stock" it, placing on the market several thousand "shares" at a set price per share.

As development proceeds all the shares are sold, and the proceeds are shown up. When the product is smelted and returns come in, each holder of shares gets his regular dividend. This can scarcely be called "speculating," where the one value is the prospect, and the other is the dividend.

Clarence Fleming, who successfully managed the "Children of Israel" at the Grand Opera, has undertaken the management of Harry Corson Clarke's touring troupe.

KNOW THE CRITTERS

HE WAS THOROUGHLY POSTED ON THE TRIBE OF HUSBANDS.

Her Experience Was as Wonderful as Her Inquisitiveness, and Both Were Fully Justified in the End.

The conversation began in the Erie ferryboat, going over.

The young woman was very young and very beautiful.

She was one of that sort of elderly stout women, not uncommon, who seem burdened with the fear that if they don't begin to talk with you on the car or on the boat or in the stage the moment they settle down you will think they don't want to be agreeable.

She glanced at the positive hair of the pretty young woman and it was so natural or by art. Vigorously agitating the atmosphere a moment with her fan, she turned the pretty young woman and said in a robust voice:

"Nasty weather!"

"The young woman replied, with a little start at the suddenness and roundness of the remark, that it was, and then she said: 'It is a very nice day for a young woman to be out in the open air. You look to me just as if you were going to the train to meet somebody.'"

"You look to me just as if you were going to the train to meet somebody."

"You look to me just as if you were going to the train to meet somebody."

"You look to me just as if you were going to the train to meet somebody."

"You look to me just as if you were going to the train to meet somebody."

"You look to me just as if you were going to the train to meet somebody."

"You look to me just as if you were going to the train to meet somebody."
