

**SPORT FOR GIRLS ADVOCATED**

Under the heading of "Healthier Women" the London Times of recent date says:

"The remarkable change in the health of young women which has come about since girls took up games and outdoor recreation is referred to by Dr. J. M. N. Campbell, of Guy's Hospital. Chlorosis, the anaemia of young women, was for a

long time in this and other countries. The interesting fact is adduced that this disease is rapidly disappearing both from Europe and America. The phenomenon has much more than a medical interest, for it is the opinion of Dr. Campbell that the greater amount of exercise and the more ready access to fresh air enjoyed by women today are largely responsible for the diminution of this malady. What used to be known as 'the green sickness'

in fact is yielding to rational methods of life. It is pointed out that a similar fall has been observed in Sweden, in France, in Vienna, and in America. In Sweden and Finland, the disease diminished rapidly and suddenly some time between 1892 and 1902, since when it has diminished more slowly. It has now almost disappeared. In America the change for the better took place about 1900-1902. In England it was rather later. That

was the time when the first insistent demands for an outdoor life and regular exercise for school girls and even for grown women began to be made."

A Washington man has engraved the alphabet on a pinhead. A man foolish enough to waste his time that way could probably put his brains on the point of the same pin and have sufficient room left to build a fence around them.

the community. Making money is put first, for the paper that is not making money cannot serve the community and is bound to be a poor down-at-the-heels affair. You owe it to your community to make your paper make money."
