ON THE SELF STARVERS.

Some people eat to live, some live to eat. Besides these two classes there are still two more—the people who mean to live to eat, but because they never have built up the reserve of strength that has saved you.

A reserve of strength is a blessed thing to have in all the crises of life. It not only carried this woman through a serious illness but it made her capable at her husband's death of taking on the double burden of bringing up children and supporting them.

To-day at 58 she is still capable of filling a useful position in society and of heartily enjoying life.

Don't Think You Know Better, You DON'T.

To eat properly neither too much nor too little, is one of the finest physical duties. You cannot neglect it without suffering and bringing suffering to others. If you are under 50 you may think that you can do it without feeling it, but unless you

ment your eyes you will feel it sooner or later.

Once more I am going to make myself a lot of work—but I am

pleased to do so as a contribution to the world's happiness—by promising that I will send to anyone who suspects he does not eat enough or that his nerves are undernourished, a book which will help him to find out. As your part of the bargain, please send a stamped envelope fully addressed.

She Owed Her Life to That.

A friend of mine had to go to a hospital for a serious operation not long ago. She was very, very ill, and for a time hovered between life and death. Finally she began to pull up.

It is no more possible to get the normal amount of food pounds energy out of brain or body if you do not give it enough coal.

ly approved, though he was a young man and unmarried. The jewels were kept in an old-fashioned safe in an office which was occupied by two clerks in the day time and by no body at night. The safe was opened with a ponderous key, which remained in the possession of Sir Arthur. So far as is known, there was no duplicate of it.

REFUSED TO RESIGN.

The fact that the jewels were missing from the safe was made in July 1907, just a year after Lord Aberdeen had been made Lord Lieutenant, and his family, including his son, Lord Haddo, and his bride installed in the castle. Preparations were going forward for the investiture of Lord Castledown as a Knight of St. Patrick, and an examination of the safe showed that the jewels were gone. Sir Arthur was not charged with having taken them, but as he was responsible, he was accused of having neglected proper precaution. He refused to give it and appealed to King Edward to order an investigation. Some months later he was informed by the Secretary of State for Ireland that as the King had decided to make a different disposition of the office of Ulster King at Arms, he could no longer be considered the incumbent. That is to say, he was dismissed in disgrace. He offered a thousand pounds for information as to the whereabouts of the jewels, and retired into private life, devoting himself, it was supposed, to an effort to solve the mystery.

THE LIBEL SUIT.

His troubles were by no means over, for he was made the victim of innuendoes in the less scrupulous newspapers and received a stream of anonymous letters, which made grave reflections, not only upon his own conduct, but upon that of members of the Viceroy's family. His detectives were unable to trace these letters, and to this day the so-called "Hidden Hand" remains hidden. Eventually, however he was given the opportunity of taking a slanderer to court when a London newspaper printed a story which he considered libellous. The paper said that the real thief was a woman and that Sir Arthur had shielded her, that the jewels were never taken out of the castle, and that there was something highly suggestive in the fact that Lord Aberdeen had almost vindictively pursued Sir Arthur, while his son, Lord Haddo, had defended him.

PARTLY VINDICATED.

Sir Arthur Vicars, through his attorneys, pleaded that the statements and suggestions in the article were false and asked for a substantial verdict. The newspaper's publisher tried to justify his statement by naming persons, the thief being a woman called Molly, and then known as Mme. Robinson. She was said to have been assisted to Paris by Sir Arthur. The jury gave Sir Arthur heavy damages, for the publisher failed to prove a single statement. Armed with this partial indication, Sir Arthur appealed to King George to hold an investigation, but His Majesty showed no more interest than had been shown by his father. In 1917 Sir Arthur found some assuagement of his troubles in marriage. He died last April, still under a cloud officially. It seems unlikely at this late date that the mystery will be solved. Possibly the truth will crop out in some spicy memoirs a half century hence.—Exchange.

The Gordian Knot.

Gordius, a peasant, being chosen king of Phrygia, dedicated his wagon to Jupiter and fastened the yoke to a beam with a knot that no one could untie. Alexander the Great was told that "whoever untied the knot would reign over the whole east." "Well, then," said the conqueror, "it is thus I perform the task." And so saying he cut the knot in two with his sword. This was in 330 B.C.

Captain Kidd.

Captain William Kidd, the pirate, lived from about 1645 to 1701. He was born in Scotland, and probably at Greenock, but his origin is obscure. As a young man he rendered service in New York, then a British colony, and the colonial council awarded him £150. Later he was commissioned to chase a hostile privateer off the coast, and is known to have served with credit against the French in the West Indies. In 1695 he was in London trading with a sloop of his own.

A large land owner in New York at the time was Col. R. Livingston, and he recommended Kidd to the newly appointed colonial governor, Lord Bellomont, as a fit man to command a vessel to cruise against the pirates in the Eastern Seas.

The "Adventure Galley" a vessel of 30 guns, was privately fitted out and the command given to Kidd, who received the King's commission to arrest and bring to trial all pirates, and he also received a commission of reprisal against the French.

In May, 1696, Kidd sailed from Plymouth, England, for New York, where he filled up his crew, and in 1697 he reached Madagascar, the pirates' principal rendezvous. He made no effort to hunt down the pirates, but on the contrary he associated himself with the notorious pirate Culliford. He captured some French ships, but when he found none to capture, he attacked, robbed and destroyed native trading vessels. He also plundered on the coast of Malabar. News of his doings reached England in 1699, and the Government instructed Lord Bellomont to arrest Kidd if he should return to America.

Abandoning the vessel "Adventure," Kidd sailed for America in one of his prizes, the "Quedah Merchant," which he left in the West Indies. He reached Boston in a sloop in July
