AMERICAN ADISTOCRACY.—Aldrich, in his new story in the Atlantic, gets off a pretty good thing on aristocratic circles as follows: "One is pained to find that the most exclusive folks have frequently passed their early manhood in selling tape or West India goods in home opathic quantities. This is not an immoral thing in itself, but it is certainly illogical of these people to be so intolerant of those less fortunate people who have not yet disposed of their stock." The Tecnsoncourse, on INDESTRIAL Mostmur, ron 1874.—The January num-ber of this standard journal, issued by the Industrial Publication Company, 176 Broadway, New York, has reached us, and, as naul, it is filled with valuable and interesting information. The table of contents gives a list of nearly fity important articles, not including mere-current items of information, of which there are seven or eight columns. Of these articles nineteen are illustrated, the illustratens including two full page engravings, printed in colors. In looking over its pages, one is struck with the clearness and simplicity which charac-terize the descriptions of new machines and processes; the earnestures and vigor of the editorials, and the spiciness of the new bitems. Those of our readers who re interested in industrial progress, ought by all means to examine this periodical, which may be obtained of any news agent, or direct from the publishers. There is much of bearty and artistic reallence in the February number, of a solume of surpassing worth and taste, is sustained in this issue. A dozen beautiful pictures embellish its pages, more than and if of which are ori-ginal American views. Mr. W. M. Cary has a spirited full page picture of "Ante-lope-Hinting on the Planas;" the hounds are in full pursuit of a herd of deer, which are coursing like the wind over the foot hills at the base of the Rocky Mountains. Mr John Hows has a series of five pictures, which is dere last sum-mer in the lovely region of the famous Juniata River in Pennsylvania. Mr. J. Davis contributes a characteristic sketch of pictures, which are ori-represents a proty maiden sitting by the open fire place.
