Suffered From Birth
With a Severe Form of
Scrofula Humor

"Until my boy was six years of age he was from birth a terrible sufferer from scrofula humor. Sores would appear on him and spread until as large as a dollar and then discharge, followed by others, so that the larger part of his body was one mass of sores all the time, especially severe on his legs and back of his head, having only the scars to show where they had been. These have all disappeared. We are unable to express our thanks for the good."

Intense Itching

We cannot tell how that poor boy suffered in all those years. Physicians did not effect a cure. At last I decided to give him Hood's Sarsaparilla, as my druggist recommended it. In about two weeks the Sarsaparilla began to have effect. The sores commenced to heal up; the flesh began to look more natural and healthy. Then the scales came off and over his body new and healthy flesh and skin formed. When he had taken two bottles he was entirely free from sores, having only the scars to show where they had been. These have all disappeared. We are unable to express our thanks for the good."

Women Refused Suffrage for the Assembly.

Mr. Waters' Bill "Held" by a Non-Partisan Vote of 17 to 16—Cost of Binder Twine.

[From Our Own Representative.]
PARLIAMENT HOUSE, TORONTO, May 10.
Among the 73 members present in the House, there were found sixteen only who were ready to do battle for Mr. Waters' bill, proposing womanhood suffrage for the Legislative Assembly.

The division (which was irrespective of party) resulted in a vote of 57 for and 16 against Hon. Mr. Dryden's amendment, which read as follows:

"That while the propriety of the extension of the suffrage to women has been strongly contended for by many in this country and elsewhere, the opposite view has generally prevailed:

"That women have no votes at elections for the Imperial Parliament or for the Legislature of any Province of the Dominion or the Empire, or so far as known, of any other country in the world (except the State of Wyoming);

"That the extension of suffrage to women would double or more than double the number of elections, and might, therefore, involve the transfer to women of a preponderating voting power in all matters affecting the laws and institutions of the Province;

"That such a far-reaching change in the electoral franchise is a subject which has not been seriously dealt with or considered at any general election in the Province, and that under all the circumstances it is the opinion of this House that it is the present duty of the House to refuse its assent to any measure providing for female suffrage at Parliamentary elections;

"This House therefore orders that the said bill be not now read a second time, but be read a second time this day six months."

RETURN OF DEFECTIONS.

There has been considerable talk this session about the looseness of the municipal bookkeeping in Ontario, and in this connection an important return has been brought down. It shows the defections that took place in the municipalities between 1871 and 1891, and does not warrant the sweeping statements made. The total amount of the defections, which were eighteen in number, was \$54,931, and the actual losses were \$32,823. The difference of \$22,000 was doubtless recovered. The Government issued several commissions to inquire into the various defections. The return shows that the treasurers of three cities, three towns, four villages, four counties and four townships were short in their accounts.

COST OF BINDER TWINE.

In response to Mr. Galt's inquiry as to the probable cost of the binder twine, Provincial Secretary Gibson has stated that it would be placed on the market at a figure commensurate with the rate estimated for prison labor 60 cents a day, and sufficient to give a small revenue to the Province. Although it would not be sold at actual cost price, it would reach the consumer directly and at a much lower figure than the present ruling prices. The very fact that such an industry had been established at the Central Prison, together with the uncertainty as to its selling price, had already acted as a discouragement to farmers to buy binder twine. The twine, however, had been reduced in price, an advantage which the farmer was even now sharing.

BEFORE THE MUNICIPAL COMMITTEE.

Mr. Gilmour's bill, requiring two-thirds of the owners to petition a council to submit in bonus by-laws in aid of a street railway, instead of a majority, was adopted. Mr. Waters' bill proposing to relieve members of municipal councils, qualifying as tenants, from the necessity of the tenancy being free from mortgage made by the landlord already acted as a discouragement to farmers to buy binder twine. The twine, however, had been reduced in price, an advantage which the farmer was even now sharing.

Mr. McCreary's bill to practically abolish power to impose market fees was fixed for discussion and hearing of deputations on Wednesday of next week.
Mr. Meadon's bill was adopted in a form providing that all towns may pass by-laws licensing hawkers and peddlers, whenever the county council in whose jurisdiction the town is has not passed such a by-law, the town by-law to be in force until the county pass a by-law enforcing such license.

IN COMMODIOUS QUARTERS.

Mr. Boomer's Handsome New Confectionery Establishment and Ice Cream and Lunch Parlors.

Confectionery is an ever-favorite food, to whose influence very few are unresponsive. Mr. John E. Boomer, the well-known dealer in this line, having at long last himself in his new and commodious premises, is better qualified than ever to minister to the wants of his devotees. His stock of chocolates, creams and kindred candies are unsurpassed in this city. In connection with his new premises, Mr. Boomer has instituted an ice cream and lunch parlor. Here during the day light meals will be served, and during the long summer evenings no doubt the cooling substance mentioned will be greatly in demand. Mr. Boomer is to be congratulated on the neat and comfortable appearance of his new quarters. Inspection by the public generally is invited. Mr. Boomer is thankful for the unqualified and favorable patronage of London's citizens in the past, and he looks for its continuance.

There will be serious trouble if you don't overcome those dyspeptic symptoms. Hood's Sarsaparilla is the medicine you need.

To the Land of the Kangaroo.

If further proof is required that the Canadian Pacific Railway Company has the interest of its patrons as well as the progress of Canada at heart it will be found in the fact that they have inaugurated a new steamship service between Vancouver, B. C., and Sydney, New South Wales, with arrangements for stop-over at the intermediate ports of Honolulu, Sandwich Islands, Brisbane, Queensland. The passage will take 21 days each way in the steamships Miowera and Warrimoo, which are of 5,000 tons burden, and steam at an average of fifteen knots an hour, with a capacity of 125 cabin passengers each. The Miowera is booked to leave Vancouver June 14.

As a guarantee that the voyage will be made as comfortable and attractive as possible it is only necessary to look at their other efforts in the providing of steamship accommodation both on the Pacific Ocean and the Great Lakes, which stand out foremost in the world. Any agent of the company is able to give full particulars.

MURDER OF A MURDERER!

Sequel to the Roehl-Pallister Escape from the Death House at Sing Sing—Roehl's Body Found in the River.

SING SING, N. Y., May 10.—The body of Frank W. Roehl, who with Thomas Pallister, escaped from the death house this morning in the Hudson River directly across from Sing Sing. The body was found by three fishermen. They towed the remains of the murderer to the upper dock and notified the prison officials.

When the body had been washed it was found that Roehl had been shot in the right side of the head, and the supposition is that Pallister shot him for the large sum of money which Roehl is supposed to have received from a relative as soon as he left the prison.

At the time of the escape, it will be remembered the two threw paper into the death watch's eyes, overpowered him, secured his keys and locked him and the night roundman into the cells. When they left the prison they offered to release Carlisle Harris, but at that time Harris had not abandoned hope of executive clemency and would not go. Roehl and Pallister were believed at that time to have tried to cross the river, and as a heavy gale was blowing it had been suspected all along that their disappearance without leaving a single trace would be explained by the discovery that they had been drowned.
